

Clinical trial results:

Phase I/II study of oral administration of S 49076 given in combination with gefitinib in patients with EGFR mutated advanced non-small-cell lung cancer who have progressed after treatment with EGFR tyrosine kinase inhibitor.

Summary

EudraCT number	2015-002646-31

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No	No

1901/2006 apply to this trial?

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 November 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	07 November 2018
Global end of trial reached?	Yes
Global end of trial date	07 November 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate the safety and activity of S49076 in combination with gefitinib in patients with locally advanced or metastatic non-small cell lung cancer (NSCLC) harbouring activating Epidermal Growth Factor Receptor (EGFR) mutations, who had received clinical benefit and then progressed on an EGFR tyrosine kinase inhibitor (TKI) (erlotinib, gefitinib, icotinib, afatinib or dacomitinib).

Protection of trial subjects:

This study was conducted in accordance with Good Practice standards, ethical principles stated in the Declaration of Helsinki and applicable regulatory requirements. After the subject has ended his/her participation in the trial, the investigator provided appropriate medication and/or arranged access to appropriate care for the patient.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	26 January 2016
Long term follow-up planned	Yes
Long term follow-up rationale	Efficacy
Long term follow-up duration	9 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Korea, Democratic People's Republic of: 2
Country: Number of subjects enrolled	Italy: 3
Country: Number of subjects enrolled	Singapore: 3
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	Taiwan: 3
Worldwide total number of subjects	14
EEA total number of subjects	6

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	9
From 65 to 84 years	5
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The investigators were specialists in Medical Oncology.

Pre-assignment

Screening details:

Male/female patients aged ≥ 18 years with locally advanced or metastatic stage IIIB/IV NSCLC with measurable tumour disease according to RECIST V1.1, having EGFR Mutation without T790M mutation; with AXL overexpression or MET amplification and/or MET overexpression, who had received clinical benefit, and then progressed on one single agent EGFR TKI

Period 1

Period 1 title	Phase I period (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	S 49076
-----------	---------

Arm description:

Phase I / Dose-escalation part: patients received S49076 dose level of 500 mg or 600 mg in combination with fixed dose (250 mg) of gefitinib, orally once daily (q.d.), on a continuous schedule during 28-day cycles.

Cycles were repeated until disease progression, unacceptable toxicity, or investigator's/patient's decision.

Arm type	Experimental
Investigational medicinal product name	S 49076
Investigational medicinal product code	S 49076
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Patients took either 5 or 6 tablets of S49076 100 mg once daily on a continuous dosing schedule, during a 28-day cycle.

Patients took one tablet of 250 mg of gefitinib (Non IMP), orally, once daily on a continuous dosing schedule, during a 28-day cycle.

Number of subjects in period 1	S 49076
Started	14
Completed	11
Not completed	3
Consent withdrawn by subject	1
Adverse event, non-fatal	2

Baseline characteristics

Reporting groups

Subject analysis sets

Subject analysis set title	Safety Set
----------------------------	------------

Subject analysis set type	Safety analysis
---------------------------	-----------------

Subject analysis set description:

The Safety Set consisted of 14 patients included in the study and who received at least one dose of S49076 or one dose of gefitinib.

Subject analysis set title	DLT Evaluable Set
----------------------------	-------------------

Subject analysis set type	Safety analysis
---------------------------	-----------------

Subject analysis set description:

All patients who took at least one dose of S49076 or one dose of gefitinib, and were evaluable for DLT (Dose-Limiting Toxicities) according to the DLT assessment at end of cycle 1.

A patient was not considered evaluable if:

- He/she definitely discontinued during first cycle for a reason other than DLT or
- He/she did not undergo a DLT assessment at the start of cycle 2 or
- He/she did not receive at least 85% (24 doses over 28) of S49076 doses, unless treatment was stopped for a DLT.
- He/she did not receive at least 85% (24 doses over 28) of gefitinib doses, unless treatment was stopped for a DLT.

End points

End points reporting groups

Reporting group title	S 49076
-----------------------	---------

Reporting group description:

Phase I / Dose-escalation part: patients received S49076 dose level of 500 mg or 600 mg in combination with fixed dose (250 mg) of gefitinib, orally once daily (q.d.), on a continuous schedule during 28-day cycles.

Cycles were repeated until disease progression, unacceptable toxicity, or investigator's/patient's decision.

Subject analysis set title	Safety Set
----------------------------	------------

Subject analysis set type	Safety analysis
---------------------------	-----------------

Subject analysis set description:

The Safety Set consisted of 14 patients included in the study and who received at least one dose of S49076 or one dose of gefitinib.

Subject analysis set title	DLT Evaluable Set
----------------------------	-------------------

Subject analysis set type	Safety analysis
---------------------------	-----------------

Subject analysis set description:

All patients who took at least one dose of S49076 or one dose of gefitinib, and were evaluable for DLT (Dose-Limiting Toxicities) according to the DLT assessment at end of cycle 1.

A patient was not considered evaluable if:

- He/she definitely discontinued during first cycle for a reason other than DLT or
- He/she did not undergo a DLT assessment at the start of cycle 2 or
- He/she did not receive at least 85% (24 doses over 28) of S49076 doses, unless treatment was stopped for a DLT.
- He/she did not receive at least 85% (24 doses over 28) of gefitinib doses, unless treatment was stopped for a DLT.

Primary: Recommended Phase II Dose (RP2D)

End point title	Recommended Phase II Dose (RP2D) ^[1]
-----------------	---

End point description:

During the dose-escalation (Phase I of the study), two S49076 dose levels were tested in combination with fixed dose gefitinib : 500 mg and 600 mg once daily. DLT was assessed during cycle 1 according to a modified version of Continual Reassessment Method and stopping rules. One DLT at 600 mg (oral mucositis grade 3) was observed in the second cohort including 4 patients. At the end of dose escalation, no Maximum Tolerated Dose was reached, and the RP2D was defined as 600 mg once daily in combination with 250mg once daily of gefitinib.

End point type	Primary
----------------	---------

End point timeframe:

See the section description

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical analyses required for this end point.

Statistical analyses

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Emergent adverse events on treatment were defined -as adverse events which occurred or worsen (in terms of severity) or became serious between the first S49076 or Gefitinib intake date and the last S49076 / Gefitinib intake date +28 days

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 November 2015	Update to the list of treatments prohibited and non-inclusion criteria (related to Investigator Brochure version 5): rosuvastatin is contraindicated. Addition of a new country (Japan) and new centres in the phase I part of the study Corrections of inconsistencies and clarifications
27 January 2016	Concerned Japan : update related to Pharmaceuticals and Medical Devices Agency request.
19 April 2017	Dacomitinib allowed as previous line. Palliative radiotherapy allowed up to 1 week prior to inclusion. A 2-week time window added between biopsy collection and inclusion. Clarification on the reporting of adverse events possibly related to disease progression. The period for LVEF reassessment in case of asymptomatic decreased has been lengthened from 2 to 3 weeks in case of relative LVEF decrease ≥ 10 units from baseline or absolute LVEF $\geq 40\%$ and $< 50\%$. Addition of herbal product as a prohibited concomitant treatment.
04 June 2018	Update of the list of prohibited treatments and non-inclusion criteria
23 August 2018	Definition of the end of the study and cancellation of the follow-up period

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
04 July 2018	During phase I, the observed frequency of AXL dysregulation was lower than expected. Additionally, the global anti-tumoral preliminary data did not suggest an increase of activity by adding S 49076 to gefitinib. These elements taken together have led the Sponsor not to initiate the phase II part of the study due to feasibility challenges.	-

Notes:

Limitations and caveats

None reported
