Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 September 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 April 2018
Global end of trial reached?	Yes
Global end of trial date	19 December 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Overall survival (OS)

Protection of trial subjects:

This study was designed and conducted in accordance with the Sponsor procedures, which comply with the ethical principles of Good Clinical Practice (GCP) as required by the major regulatory authorities and in accordance with the Declaration of Helsinki, ICH E6 Guideline for GCP, and local regulations.

The protocol and amendments, Informed Consent Form (ICF), and the Investigator's Brochure (IB) provided to the Investigators, and any other documents that pertained to patient information (eg, patient diaries), recruitment methods, and advertisements received Institutional Review Board (IRB)/Independent Ethics Committee (IEC) approval before the first patient was enrolled at the investigational site. When necessary, all protocol amendments and changes to the ICF were submitted by the Investigator to the IRB/IEC for approval. The Investigators notified the IRB/IEC of deviations from the protocol or serious adverse events occurring at the site according to local policies and IRB/IEC requirements, as well as other adverse event reports, in accordance with local procedures.

The Investigator or a designee under the Investigator's responsibility (according to applicable regulatory requirements) fully informed patients of all pertinent aspects of the clinical study. All participants were informed to the fullest extent possible about the study in a language and in terms they were able to understand.

Prior to participation in the trial, the written ICF was signed and personally dated by the patient or by the patient's legal representative and by the person who conducted the informed consent discussion. A copy of the signed and dated ICF was provided to the patient.

Background therapy:

Best Supportive Care according to local clinical practice i.e.:

- regimens including fluoropyrimidines, platinum derivatives, and either a taxane- and/or irinotecan-containing regimen;
- a anti-HER2+ therapy for patients whose tumors are HER2-neupositive (HER2+);
- pre- or post-operative adjuvant chemotherapy or chemoradiotherapy,

Evidence for comparator:

This present study was designed as a randomized, double-blind, Phase 3 study comparing TAS-102 plus best supportive care (BSC) to placebo plus BSC in patients with metastatic gastric cancer who have received at least 2 prior regimens for advanced disease and were refractory or unable to tolerate their last prior therapy.

A placebo-controlled design was considered appropriate as there are currently no standard therapies for patients with metastatic gastric cancer who have failed first- and second-line therapies.

Actual start date of recruitment	11 February 2016
Long term follow-up planned	Yes
Long term follow-up rationale	Safety, Efficacy
Long term follow-up duration	2 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Italy: 66
Country: Number of subjects enrolled	United States: 26
Country: Number of subjects enrolled	Turkey: 43
Country: Number of subjects enrolled	France: 24
Country: Number of subjects enrolled	Japan: 73
Country: Number of subjects enrolled	Israel: 12
Country: Number of subjects enrolled	Russian Federation: 46
Country: Number of subjects enrolled	Belarus: 30
Country: Number of subjects enrolled	Poland: 14
Country: Number of subjects enrolled	Portugal: 39
Country: Number of subjects enrolled	Romania: 8
Country: Number of subjects enrolled	Spain: 40
Country: Number of subjects enrolled	United Kingdom: 45
Country: Number of subjects enrolled	Belgium: 13
Country: Number of subjects enrolled	Czech Republic: 9
Country: Number of subjects enrolled	Germany: 11
Country: Number of subjects enrolled	Ireland: 8
Worldwide total number of subjects	507
EEA total number of subjects	277

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	279
From 65 to 84 years	159
85 years and over	69

Subject disposition

Recruitment

Recruitment details:

Patients were randomized at 110 centers in 17 countries.

A total of 625 patients signed informed consent for participation in the study.

Pre-assignment

Screening details:

All patients had to complete the following study procedures prior to a confirmation of eligibility: -Medical History, -Histologic Confirmation, -Human Epidermal Growth Factor Receptor 2 (HER2) Status, -Physical Examination, -Baseline Signs and Symptoms, -Height, Vital Signs, Weight, -ECOG performance status and - Clinical Laboratory Evaluations

Pre-assignment period milestones

Number of subjects started	625 ^[1]
Intermediate milestone: Number of subjects	Screening - Confirmation of Eligibility: 507
Number of subjects completed	507

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Consent withdrawn by subject: 1
Reason: Number of subjects	Protocol deviation: 1
Reason: Number of subjects	Screen failure: 111
Reason: Number of subjects	Other: 4
Reason: Number of subjects	Death: 1

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: A total of 625 patients provided signed informed consent for participation in the study. Of these, 118 (18.9%) were screened but not randomized primarily due to screen failures.

Period 1

Period 1 title	Baseline Period
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Baseline
------------------	----------

Arm description:

Baseline period; screening for participation in the study

Arm type	Screening
Investigational medicinal product name	TAS-102
Investigational medicinal product code	FTD, F3TdR, F3dThd
Other name	5-TRIFLUOROTHYMININE
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

TAS-102 is formulated as an immediate-release film-coated tablet, which is supplied in 2 strengths:

- The 15 mg white, round tablet
- The 20 mg pale-red, round tablet

The total dose is 70 mg/m² milligram(s)/square meter, per day within 1 hour after completion of

morning and evening meals, for 5 days a week with 2 days rest for 2 weeks, followed by a 14-day rest. This treatment cycle will be repeated every 4 weeks.

Number of subjects in period 1	Baseline
Started	507
Sign ICF	507
Enrollment	507
Medical History	507
Histological Confirmation	507
HER2 status (if available)	507
Physical Examination	507
Baseline Signs & Symptoms	507
Height	507
Vital Signs & Weight	507
ECOG Performance Status	507
Hematology	507
Serum Chemistry	507
Urinalysis	507
Pregnancy Test	507
Tumor Measurements	507
Quality of Life Assessment	507
Concomitant Medications	507
Completed	507

Period 2

Period 2 title	Treatment Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Blinding implementation details:

Eligible patients who met all of the inclusion and none of the exclusion criteria were centrally randomized (2:1) to TAS-102 plus BSC (experimental arm) or placebo plus BSC (control arm) using a

dynamic allocation method (biased coin) via an Interactive Voice/Web Response System (IXRS). Randomization was stratified by: region (Rest of World (ROW) vs Japan); ECOG performance status (0 vs 1); and prior treatment with ramucirumab (yes vs no).

Arms

Are arms mutually exclusive?	Yes
Arm title	TAS-102 plus BSC

Arm description:

Experimental arm, evaluating the efficacy and safety of TAS-102 (Investigational Medicinal Product) plus Best Supportive Care (BSC)

Arm type	Experimental
Investigational medicinal product name	TAS-102

Primary: Overall Survival (OS)

End point title	Overall Survival (OS)
End point description: Overall Survival (OS) was the primary endpoint of this study and was defined as the time from the date of randomization to the death date. In the absence of death confirmation or for patients alive on the survival cut-off date, survival was censored at the date of last study follow-up or the cut-off date, whichever was earlier.	
End point type	Primary
End point timeframe: The overall survival (OS) cut-off date used for the primary analysis was based on the survival data obtained through the date of the 384th death observed in the study (27 Mar 2018).	

End point values	TAS-102 plus BSC	Placebo plus BSC		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	337	170		
Units: Subjects				
Total patients	337	170

lower limit	0.5597
upper limit	0.8548
Variability estimate	Standard deviation

Secondary: Progression-Free Survival (PFS)

End point title	Progression-Free Survival (PFS)
-----------------	---------------------------------

End point description:

Progression free survival was defined as the time from the date of randomization until the date of the investigator-assessed radiological disease progression or death due to any cause. Patients who were alive with no disease progression as of the analysis cut-off date were censored at the date of the last tumor assessment. Patients who received non-study cancer treatment before disease progression, or patients with clinical but not radiological evidence of progression was censored at the date of the last evaluable tumor assessment before the non-study cancer treatment was initiated.

End point type	Secondary
End point timeframe:	
PFS was defined as the time from the date of randomization until the date of the investigator-assessed radiological disease progression or death due to any cause as of the pre-specified cut-off date of 31 Mar 2018 for non-survival data.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events (AE) were reported from the first dose of study medication through the period of patient follow-up (30 days after the last dose of study medication or until the start of new anti-tumor therapy, whichever was earlier).

Adverse event reporting additional description:

All adverse event reporting were performed using the as-treated (AT) analysis population.

The Common Terminology Criteria for Adverse Events (CTCAE Version 4.03) terms was used to assess severity/provide the grade for each adverse event (AE) that was reported.

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 February 2016	Various sections of the protocol was amended (namely Inclusion/Exclusion criteria etc) in response to Health Authority requests and in order to make changes for consistency and/or clarification.
05 May 2016	The following sections of the study protocol were updated in response to Health Authority requests, and in order to make changes for consistency and/or clarification: <ul style="list-style-type: none">- Section 8.8.1, Prohibited Medications and Therapies- Section 9.2.4.3, Dose Modification in Response to Hematologic Toxicities- Section 9.5, Study Drug Accountability- Section 12.1.1, Adverse Events

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
