Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 July 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	11 October 2018
Global end of trial reached?	Yes
Global end of trial date	11 July 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the study was to evaluate the efficacy of elvitegravir/cobicistat/emtricitabine/tenofovir alafenamide (E/C/F/TAF) fixed-dose combination (FDC) after switching from a stable regimen consisting of emtricitabine/tenofovir disoproxil fumarate (FTC/TDF) or abacavir/lamivudine (ABC/3TC) plus a third antiretroviral (ARV) agent in participants harboring the archived nucleoside/nucleotide reverse transcriptase inhibitor (NRTI) resistance mutation M184V and/or M184I in human immunodeficiency virus (HIV)-1 reverse transcriptase. This was a two part study. As the virologic failure in Part 1 was deemed acceptable and the internal data monitoring committee officially completed the interim review, the study was continued to Part 2.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	17 December 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	France: 30
Country: Number of subjects enrolled	Spain: 17
Country: Number of subjects enrolled	United States: 8
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Italy: 5
Worldwide total number of subjects	66
EEA total number of subjects	58

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	61
From 65 to 84 years	5
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at study sites in the United States and Europe. The first participant was screened on 17 December 2015. The last study visit occurred on 11 July 2019.

Pre-assignment

Screening details:

120 participants were screened.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Part 1: E/C/F/TAF

Arm description:

Participants with M184V and/or M184I mutations in reverse transcriptase and without any other NRTI-resistance mutation switched from their current HIV treatment regimen consisting of FTC/TDF or ABC/3TC plus a third antiretroviral agent to E/C/F/TAF (150/150/200/10 mg) FDC tablet orally once daily for 48 weeks.

Arm type	Experimental
Investigational medicinal product name	E/C/F/TAF FDC
Investigational medicinal product code	
Other name	Genvoya®
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

150/150/200/10 mg administered once daily

Arm title	Part 2: E/C/F/TAF
------------------	-------------------

Arm description:

Participants with M184V and/or M184I mutations in reverse transcriptase and with or without 1 or 2 thymidine analog-associated mutations (TAMs) switched from their current HIV treatment regimen consisting of FTC/TDF or ABC/3TC plus a third antiretroviral agent to E/C/F/TAF (150/150/200/10 mg) FDC tablet orally once daily for 48 weeks.

Arm type	Experimental
Investigational medicinal product name	E/C/F/TAF FDC
Investigational medicinal product code	
Other name	Genvoya®
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

150/150/200/10 mg administered once daily

Number of subjects in period 1 ^[1]	Part 1: E/C/F/TAF	Part 2: E/C/F/TAF
Started	37	27
Completed	34	26
Not completed	3	1
Withdrew Consent	1	-
Adverse Event	1	-
Death	-	1
Protocol Violation	1	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Two participants (1 in Part 1 and 1 in Part 2) who were enrolled but did not receive the study drug are not included in the subject disposition table.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

First dose date up to the last dose date (maximum: 48 Weeks) plus 30 days

Adverse event reporting additional description:

The Safety Analysis Set included all participants who received at least 1 dose of study drug.

Assessment type	Systematic

Reporting groups

Reporting group title	Total E/C/F/TAF
-----------------------	-----------------

Reporting group description:

Participants switched from their current human immunodeficiency virus (HIV) treatment regimen consisting of FTC/TDF or ABC/3TC plus a third antiretroviral agent to E/C/F/TAF (150/150/200/10 mg) FDC tablet orally once daily for 48 weeks.

Serious adverse events	Total E/C/F/TAF		
Total subjects affected by serious adverse events			
subjects affected / exposed	5 / 64 (7.81%)		
number of deaths (all causes)	1		
number of deaths resulting from adverse events			
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Lung adenocarcinoma			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Prostatic adenoma			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Tonsil cancer			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
General disorders and administration site conditions			
Death			

subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 1		
Renal and urinary disorders			
Acute kidney injury			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Proteinuria			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Renal failure			
subjects affected / exposed	1 / 64 (1.56%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Total E/C/F/TAF		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	26 / 64 (40.63%)		
Nervous system disorders			
Headache			
subjects affected / exposed	6 / 64 (9.38%)		
occurrences (all)	8		
Dizziness			
subjects affected / exposed	4 / 64 (6.25%)		
occurrences (all)	4		
General disorders and administration site conditions			
Asthenia			
subjects affected / exposed	7 / 64 (10.94%)		
occurrences (all)	9		
Gastrointestinal disorders			

Diarrhoea subjects affected / exposed occurrences (all)	5 / 64 (7.81%) 5		
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all)	5 / 64 (7.81%) 6		
Musculoskeletal and connective tissue disorders Back pain subjects affected / exposed occurrences (all)	5 / 64 (7.81%) 5		
Infections and infestations Bronchitis subjects affected / exposed occurrences (all) Nasopharyngitis subjects affected / exposed occurrences (all)	7 / 64 (10.94%) 11 7 / 64 (10.94%) 9		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 August 2016	Amendment 1: <ul style="list-style-type: none">- Addition of FPV: Fosamprenavir, SQV: Saquinavir and ETR: Etravirine in the Glossary of Abbreviations- Addition of Titles Code of Federal Regulations (CRF) referenced- Addition of the K70E RT mutation as an exclusionary mutation for Part 1 and Part 2 of the study

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
