

Clinical trial results:

A Phase 3b, Randomized, Open-Label Study to Evaluate the Safety and Efficacy of Switching From Regimens Consisting of Abacavir/Lamivudine (ABC/3TC) Plus a Third Antiretroviral Agent to the Elvitegravir/Cobicistat/Emtricitabine/Tenofovir Alafenamide (E/C/F/TAF) Fixed-Dose Combination (FDC) in Virologically-Suppressed HIV 1 Infected Adult Subjects

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 January 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	14 June 2017
Global end of trial reached?	Yes
Global end of trial date	24 January 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to evaluate the efficacy of switching to elvitegravir/cobicistat/emtricitabine/tenofovir alafenamide (E/C/F/TAF) fixed-dose combination (FDC) relative to continuing on a baseline regimen consisting of abacavir/lamivudine (ABC/3TC) plus a 3rd antiretroviral agent in HIV-1 infected participants.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	18 November 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 56
Country: Number of subjects enrolled	Italy: 59
Country: Number of subjects enrolled	Spain: 86
Country: Number of subjects enrolled	United Kingdom: 3
Country: Number of subjects enrolled	France: 63
Country: Number of subjects enrolled	Germany: 8
Worldwide total number of subjects	275
EEA total number of subjects	219

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	247
From 65 to 84 years	28
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at study sites in Europe and North America. The first participant was screened on 18 November 2015. The last study visit occurred on 24 Jan 2018.

Pre-assignment

Screening details:

346 participants were screened.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	E/C/F/TAF

Arm description:

Elvitegravir/ cobicistat/ emtricitabine/tenofovir alafenamide (E/C/F/TAF) 150/150/200/10 mg fixed dose combination (FDC) tablets administered orally once daily with food for 48 weeks

Arm type	Experimental
Investigational medicinal product name	Elvitegravir/ cobicistat/ emtricitabine/tenofovir alafenamide
Investigational medicinal product code	
Other name	E/C/F/TAF
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

150/150/200/10 mg administered once daily with food for 48 weeks

Arm title	ABC/3TC+3rd Agent
------------------	-------------------

Arm description:

Abacavir/lamivudine (ABC/3TC) 600/300 mg tablets plus a third antiretroviral agent administered orally once daily for 24 weeks followed by a delayed switch to E/C/F/TAF FDC

Arm type	Active comparator
Investigational medicinal product name	Abacavir/lamivudine
Investigational medicinal product code	
Other name	ABC/3TC, Epzicom, Kivexa
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

600/300 mg plus a third antiretroviral agent administered orally once daily for 24 weeks

Number of subjects in period 1^[1]	E/C/F/TAF	ABC/3TC+3rd Agent
Started	183	91
Completed	171	88
Not completed	12	3
Withdrew Consent	2	2
Non-Compliance with Study Drug	1	-
Adverse event, non-fatal	5	1
Lost to Follow-up	3	-
Investigator's Discretion	1	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 1 participant who was randomized/enrolled but not treated is not included in the subject disposition table.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Up to 48 weeks plus 30 days

Adverse event reporting additional description:

The reported percentages in the Adverse Events table were not adjusted for the different durations in adverse events (AE) collection. By study design, the AE collection time frame for the treatment groups was as follows:

- E/C/F/TAF group = 48 weeks plus 30 days
- ABC/3TC+3rd Agent = 24 weeks
- Delayed E/C/F/TAF group = 24 weeks plus 30 days

Assessment type	Systematic

Metabolism and nutrition disorders Vitamin D deficiency subjects affected / exposed occurrences (all)	13 / 272 (4.78%) 13		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
01 June 2016	Eligibility criteria updated to allow additional participants to enroll in the study without changing the overall risk/benefit ratio.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
