Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 October 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	29 September 2017
Global end of trial reached?	Yes
Global end of trial date	15 October 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study is to evaluate the safety and tolerability of elvitegravir/cobicistat/emtricitabine/tenofovir alafenamide (E/C/F/TAF) fixed-dose combination (FDC) in human immunodeficiency virus (HIV-1) infected adults with end-stage renal disease (ESRD) on chronic hemodialysis (HD).

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 December 2015
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 46
Country: Number of subjects enrolled	France: 7
Country: Number of subjects enrolled	Austria: 1
Country: Number of subjects enrolled	Germany: 1
Worldwide total number of subjects	55
EEA total number of subjects	9

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	55
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at study sites in Europe and the United States. The first participant was screened on 14 December 2015. The last study visit occurred on 15 October 2019.

Pre-assignment

Screening details:

75 participants were screened.

Period 1

Period 1 title	GEN Phase
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Arm title	E/C/F/TAF (GEN Phase)
------------------	-----------------------

Arm description:

Participants received elvitegravir/cobicistat/emtricitabine/tenofovir alafenamide (E/C/F/TAF) (Genvoya®, GEN) (150/150/200/10 mg) fixed-dose combination (FDC) tablet once daily with food for 96 weeks. At Week 96, participants in the United States (US) who wished to participate in the open-label (OL) rollover extension either discontinued E/C/F/TAF FDC or continued to take E/C/F/TAF FDC for up to 114 weeks.

Arm type	Experimental
Investigational medicinal product name	E/C/F/TAF FDC
Investigational medicinal product code	
Other name	Genvoya®
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

150/150/200/10 mg administered once daily

Number of subjects in period 1	E/C/F/TAF (GEN Phase)
Started	55
Completed	39
Not completed	16
Withdrew Consent	5
Adverse Event	2
Non-Compliance with Study Drug	1
Death	2
Lost to follow-up	2
Investigator`s Discretion	4

Period 2

Period 2 title	BVY OL Extension Phase
Is this the baseline period?	No
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Arm title	E/C/F/TAF to B/F/TAF (BVY OL Extension Phase)
------------------	---

Arm description:

At Week 96 or the end of E/C/F/TAF visit (whichever occurred last), participants were given the option to receive open-label (OL) bictegravir/emtricitabine/tenofovir alafenamide (B/F/TAF) (Biktarvy®, BVY) (50/200/25 mg) FDC tablet once daily without regard to food for up to 52 weeks.

Arm type	Experimental
Investigational medicinal product name	B/F/TAF FDC
Investigational medicinal product code	
Other name	Biktarvy®
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

50/200/25 mg administered once daily

Number of subjects in period 2^[1]	E/C/F/TAF to B/F/TAF (BVY OL Extension Phase)
Started	10
Completed	10

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: 29 participants completed the GEN Phase, but did not enter in the BVY OL Extension Phase.

Baseline characteristics

Primary: GEN Phase: Percentage of Participants Experiencing Treatment-Emergent Grade 3 or Higher Adverse Events Up to Week 48

End point title	GEN Phase: Percentage of Participants Experiencing Treatment-Emergent Grade 3 or Higher Adverse Events Up to Week 48 ^[1]
End point description: Treatment-emergent Adverse Events (TEAE) were defined as AEs with onset dates on or after the study drug start date and no later than 30 days after the permanent discontinuation of the E/C/F/TAF (GEN Phase) study drug or all AEs for participants still on E/C/F/TAF. It also includes the AEs that led to premature discontinuation of E/C/F/TAF study drug. Clinical events and clinically significant laboratory abnormalities were graded according to the GSI Grading Scale for Severity of Adverse Events and Laboratory Abnormalities. Adverse events were graded as Grade 1 (mild), Grade 2 (moderate), Grade 3 (severe), or Grade 4 (life threatening). The GEN Safety Analysis Set included participants who were enrolled and received at least 1 dose of GEN (E/C/F/TAF FDC).	
End point type	Primary
End point timeframe: First Dose Date Up to Week 48	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: No statistical comparison was planned or performed.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

First dose date up to the last dose date [maximum: 114 Weeks (GEN Phase), 52 Weeks (BVY OL Extension Phase)] plus 30 days

Adverse event reporting additional description:

The GEN Safety Analysis Set included all participants who received at least 1 dose of GEN.

The BVY Safety Analysis Set included all participants who received at least 1 dose of BVY.

Metabolism and nutrition disorders Hyperkalaemia subjects affected / exposed occurrences (all)	8 / 55 (14.55%) 11	1 / 10 (10.00%) 2	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 October 2015	Amendment 1: <ul style="list-style-type: none">• Excluded participants with hepatitis B infection from the study• Removed toxicity management text related to the management of hepatitis B flare• Updated the timing of first administration of study drug to occur on Day 1• Updated the rationale for dose selection with the inclusion of new modeling data• Updated the intensive PK substudy visit schedule such that blood sampling was to occur at or between the Week 2 or 4 study visits• Clarified the procedure for predose whole blood sample collection and processing• Added the collection of a long-term plasma storage samples from participants who provided consent
28 November 2016	Amendment 2: <ul style="list-style-type: none">• Extended the study to Week 96• Revised study objectives and endpoints to reflect the extension of data collection to Week 96• Revised study procedures in accordance with extension of the study to Week 96• Clarified the timing of the blood draw for the chemistry panel in relation to hemodialysis

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
