

Clinical trial results:

A Phase III, Randomized, Double-Blind, Double Dummy, Active Controlled, Multi-Center Study To Evaluate The Efficacy And Safety Of Intravenous Pegylated Liposomal Prednisolone Sodium Phosphate (Nanocort) Compared With Intramuscular Injection Of Methylprednisolone Acetate In Subjects With Active Rheumatoid Arthritis

Summary

EudraCT number	2015-002924-17
Trial protocol	NL BE
Global end of trial date	13 June 2018

Results information

Result version number	v1 (current)
This version publication date	18 May 2019
First version publication date	18 May 2019

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 November 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	13 June 2018
Global end of trial reached?	Yes
Global end of trial date	13 June 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess efficacy and safety (treatment of signs and symptoms) of Nanocort in subjects with active rheumatoid arthritis who are experiencing a flare/exacerbation in comparison to a standard of care medication (Depo-Medrol).

Protection of trial subjects:

This study was conducted in compliance with the protocol and in accordance with International Council for Harmonisation (ICH) guidance, Good Clinical Practice (GCP) standards, the Declaration of Helsinki, the European Clinical Trial Directive 2001/20/EC of 4 Apr 2001 and European Clinical Trial Directive 2005/28/EC of 8 Apr 2005 and local ethical and legal requirements.

Concomitant therapies taken for the long-term treatment of pre-existing conditions (as per Investigator's opinion) could be continued during the study. However, these needed to be stabilized prior to entry and continued wherever practical without variation of dose or regimen during the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 March 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 120
Country: Number of subjects enrolled	Belgium: 30
Worldwide total number of subjects	150
EEA total number of subjects	150

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	150
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

A total of 150 subjects were randomized in the study in 3 treatment groups.

Period 1

Period 1 title	Period 1 (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Arm 1
------------------	-------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Treatment I
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Intramuscular use, Intravenous use

Dosage and administration details:

Day 1 and 15

Arm title	Arm 2
------------------	-------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Treatment II
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Intramuscular use, Intravenous use

Dosage and administration details:

Day 1 and 15 up to 12 weeks

Arm title	Arm 3
------------------	-------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Treatment III
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion
Routes of administration	Intramuscular use, Intravenous use

Dosage and administration details:

Day 1 and 15

occurrences (all)	4	6	6
Nervous system disorders			
Dizziness	Additional description: One of the subjects in Treatment group I had Dizziness Exertional.		
subjects affected / exposed	4 / 49 (8.16%)	2 / 52 (3.85%)	2 / 49 (4.08%)
occurrences (all)	5	2	2
Headache	Additional description: One of the subjects in Treatment group III had Tension Headache.		
subjects affected / exposed	8 / 49 (16.33%)	9 / 52 (17.31%)	6 / 49 (12.24%)
occurrences (all)	11	9	9

General disorders and administration site conditions			
Fatigue			
subjects affected / exposed	6 / 49 (12.24%)	6 / 52 (11.54%)	5 / 49 (10.20%)
occurrences (all)	6	7	9
Gastrointestinal disorders			
Nausea			
subjects affected / exposed	9 / 49 (18.37%)	6 / 52 (11.54%)	1 / 49 (2.04%)
occurrences (all)	9	7	1
Respiratory, thoracic and mediastinal disorders			
Cough	Additional description: One of the 3 subjects in the Treatment group II had Production Cough.		
subjects affected / exposed	4 / 49 (8.16%)	2 / 52 (3.85%)	4 / 49 (8.16%)
occurrences (all)	4	3	4
Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	6 / 49 (12.24%)	5 / 52 (9.62%)	4 / 49 (8.16%)
occurrences (all)	6	6	5

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 March 2016	The Rheumatoid Arthritis diagnosis selection criterion was amended in Amendment 2. There were no other major changes in the amended protocols.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
