Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 March 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 March 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective was to evaluate the pharmacokinetic (PK) parameters of pimodivir in combination with oseltamivir (OST) in elderly subjects (aged 65 to less than or equal to [\leq] 85 years) compared to adults (aged 18 to \leq 64 years) with influenza A infection.

Protection of trial subjects:

Safety evaluations included monitoring of adverse events (AEs), clinical laboratory tests (hematology, serum chemistry, and urinalysis), vital signs measurements, physical examinations, electrocardiography (ECGs), pregnancy testing and specific toxicities.

Background therapy:

All subjects received OST

Evidence for comparator: -

Actual start date of recruitment	19 January 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 3
Country: Number of subjects enrolled	Germany: 2
Country: Number of subjects enrolled	Spain: 23
Country: Number of subjects enrolled	France: 8
Country: Number of subjects enrolled	Hong Kong: 1
Country: Number of subjects enrolled	Malaysia: 7
Country: Number of subjects enrolled	Netherlands: 4
Country: Number of subjects enrolled	Singapore: 1
Country: Number of subjects enrolled	Sweden: 12
Country: Number of subjects enrolled	Turkey: 9
Country: Number of subjects enrolled	United States: 29
Worldwide total number of subjects	99
EEA total number of subjects	52

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	60
From 65 to 84 years	38
85 years and over	1

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Total 194 subjects were screened, 102 were randomized out of which 99 treated.

Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Subject

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Pimodivir 600 mg bid + Oseltamivir 75 mg bid
------------------	--

Arm description:

Subjects received Pimodivir 600 milligram (mg) tablets and oseltamivir 75 mg capsules orally twice daily (bid) for 7 days. Dose of oseltamivir was adjusted from 75 mg to 30 mg and vice versa during the course of treatment based on the estimated glomerular filtration rate (eGFR) value.

Arm type	Experimental
Investigational medicinal product name	Pimodivir 600 milligram (mg)
Investigational medicinal product code	JNJ-63623872
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received Pimodivir 600 mg (2*300 mg tablets) orally twice daily for 7 days.

Investigational medicinal product name	Oseltamivir 75 mg bid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Subjects received oseltamivir 75 mg capsules orally twice daily for 7 days.

Arm title	Pimodivir placebo bid + Oseltamivir 75 mg bid
------------------	---

Arm description:

Subjects received placebo matched to pimodivir tablets and oseltamivir 75 mg capsules orally twice daily for 7 days. Dose of oseltamivir was adjusted from 75 mg to 30 mg and vice versa during the course of treatment based on the eGFR value.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received placebo matched to Pimodivir tablets orally twice daily for 7 days

Investigational medicinal product name	Oseltamivir 75 mg bid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received oseltamivir 75 mg capsules orally twice daily for 7 days.

Number of subjects in period 1	Pimodivir 600 mg bid + Oseltamivir 75 mg bid	Pimodivir placebo bid + Oseltamivir 75 mg bid
Started	64	35
Completed	55	30
Not completed	9	5
Adverse event, serious fatal	1	-
Consent withdrawn by subject	8	3
Adverse event, non-fatal	-	1
Lost to follow-up	-	1

End point description:	
Time to improvement of respiratory status is defined as normalization of blood oxygen saturation and respiration rate. Full analysis set was defined as all randomly assigned subjects who received at least 1 dose of study drug and who have a confirmed infection with influenza A. Here 'N' signifies number of subjects who were evaluable for this endpoint. 99999 indicates that the upper limit of CI was not estimable due to less number of events.	
End point type	Secondary
End point timeframe:

Secondary: Number of Subjects Reporting Treatment-Emergent Adverse Events (TEAEs)

End point title	Number of Subjects Reporting Treatment-Emergent Adverse Events (TEAEs)
-----------------	--

End point description:

TEAEs are defined as adverse events with onset or worsening on or after date of first dose of study treatment. An adverse event is any untoward medical event that occurs in a subject administered an investigational product, and it does not necessarily indicate only events with clear causal relationship with the relevant investigational product. The Safety Analysis Set included all enrolled subjects who received at least 1 dose of study drug.

Reporting groups

Reporting group title	Pimodivir 600 mg bid + oseltamivir 75 mg bid
-----------------------	--

Reporting group description:

Subjects received Pimodivir 600 milligram (mg) tablets and oseltamivir 75 mg capsules orally twice daily (bid) for 7 days. Dose of oseltamivir was adjusted from 75 mg to 30 mg and vice versa during the course of treatment based on the estimated glomerular filtration rate (eGFR) value.

Reporting group title	Pimodivir placebo bid + oseltamivir 75 mg bid
-----------------------	---

Reporting group description:

Subjects received matching placebo to Pimodivir tablets and oseltamivir 75 mg capsules orally twice daily for 7 days. Dose of oseltamivir was adjusted from 75 mg to 30 mg and vice versa during the course of treatment based on the eGFR value.

Serious adverse events	Pimodivir 600 mg bid + oseltamivir 75 mg bid	Pimodivir placebo bid + oseltamivir 75 mg bid	
Total subjects affected by serious adverse events			
subjects affected / exposed	11 / 64 (17.19%)	4 / 35 (11.43%)

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
23 October 2015	The overall reason for the amendment INT-1 to remove text regarding inclusion of the adolescent population and accordingly, the sample size justification was re-written based on FDA feedback.
09 December 2015	The overall reason for the amendment INT-2 add a urine pregnancy test (for females of childbearing potential) was added to Day 5 procedures and a hierarchical ordinal scale for clinical outcome was added as a secondary efficacy endpoint based on feedback by Food and Drug Administration (FDA).
19 September 2016	The overall reason for the amendment INT-3 was to correct exclusion criteria.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
