Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 December 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 December 2016
Global end of trial reached?	Yes
Global end of trial date	18 December 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective of the trial was to demonstrate equivalence in efficacy of MSB11022 compared to EU-approved Humira in subjects with moderate to severe chronic plaque psoriasis.

Protection of trial subjects:

Subject protection was ensured by following high medical and ethical standards in accordance with the ethical principles of the International Council for Harmonisation (ICH) guideline for Good Clinical Practice (GCP) and the Declaration of Helsinki, as well as with applicable local regulations.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	16 February 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 34
Country: Number of subjects enrolled	Canada: 51
Country: Number of subjects enrolled	Czech Republic: 57
Country: Number of subjects enrolled	Estonia: 41
Country: Number of subjects enrolled	France: 2
Country: Number of subjects enrolled	Germany: 20
Country: Number of subjects enrolled	Hungary: 19
Country: Number of subjects enrolled	Mexico: 31
Country: Number of subjects enrolled	Poland: 156
Country: Number of subjects enrolled	Russian Federation: 24
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	United States: 6
Worldwide total number of subjects	443
EEA total number of subjects	331

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	422
From 65 to 84 years	21
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Subjects were randomized to receive either MSB11022 or EU-Humira in Core Treatment Period till Week 16. Subjects who achieved PASI 50 at Week 16 entered Extension Period where subjects in MSB11022 arm were continued to receive MSB11022 and subjects in EU-Humira arm were re-randomized to receive either MSB11022 or EU-Humira for additional 37 weeks.

Period 1

Period 1 title	Core Treatment Period (Week 1 to 16)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	MSB11022 (Core Treatment Period)

Arm description:

Subjects received MSB11022 subcutaneously at an initial dose of 80 milligram (mg) on Day 1 of Week 1 followed by 40 mg every other week starting at Week 2 up to and including Week 14 in Core Treatment Period.

Arm type	Experimental
Investigational medicinal product name	MSB11022
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received MSB11022 subcutaneously at an initial dose of 80 mg on Day 1 of Week 1 followed by 40 mg every other week starting at Week 2 up to and including Week 14.

Arm title	EU-Humira
------------------	-----------

Arm description:

Subjects received EU-Humira subcutaneously at an initial dose of 80 mg on Day 1 of Week 1 followed by 40 mg every other week starting at Week 2 up to and including Week 14 in Core Treatment Period.

Arm type	Active comparator
Investigational medicinal product name	EU-Humira
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received EU-Humira subcutaneously at an initial dose of 80 mg on Day 1 of Week 1 followed by 40 mg every other week starting at Week 2 up to and including Week 14.

Number of subjects in period 1	MSB11022 (Core Treatment Period)	EU-Humira
Started	222	221
Treated	221	220
Completed	213	202
Not completed	9	19
Consent withdrawn by subject	1	4
Adverse events	2	9
Other un-specified	1	-
Lost to follow-up	1	2
Randomized, not treated	1	1
Protocol deviation	3	1
Lack of efficacy	-	2

Period 2

Period 2 title	Extended Treatment Period(Week 16 to 52)
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	MSB11022 (Extended Treatment Period)

Arm description:

Subjects who had achieved PASI 50 and received MSB11022 during Core Treatment Period continued to receive MSB11022 subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 in extended treatment period.

Arm type	Experimental
Investigational medicinal product name	MSB11022
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects who received MSB11022 during core treatment period continued to receive MSB11022 subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 in extended treatment period.

Arm title	EU-Humira/EU-Humira
------------------	---------------------

Arm description:

Subjects who had achieved PASI 50 and received EU-Humira in Core Treatment Period and continued to receive EU-Humira subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 after re-randomization in extended treatment period.

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	EU-Humira
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects who received EU-Humira in core treatment period and continued to receive EU-Humira subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 after re-randomization in extended treatment period.

Arm title	EU-Humira/MSB11022
------------------	--------------------

Arm description:

Subjects who had achieved PASI 50 and received EU-Humira in Core Treatment Period were re-randomized to receive MSB11022 subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 in extended treatment period.

Arm type	Experimental
Investigational medicinal product name	MSB11022
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects who received EU-Humira in core treatment period were re-randomized to receive MSB11022 subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 in extended treatment period.

Number of subjects in period 2	MSB11022 (Extended Treatment Period)	EU-Humira/EU- Humira	EU- Humira/MSB11022
Started	213	101	101
Completed	195	90	90
Not completed	18	11	11
Consent withdrawn by subject	3	2	2
Adverse events	8	6	4
Other un-specified	1	-	1
Lost to follow-up	-	1	1
Lack of efficacy	4	2	2
Protocol deviation	2	-	1

Subject analysis set title	EU-Humira/EU-Humira (Overall Treatment Period)
Subject analysis set type	Sub-group analysis
Subject analysis set description: Subjects who received EU-Humira up to Week 16 continued to receive EU-Humira subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 after re-randomization in overall treatment period.	
Subject analysis set title	EU-Humira/MSB11022 (Overall Treatment Period)
Subject analysis set type	Sub-group analysis
Subject analysis set description: Subjects who received EU-Humira up to Week 16 were re-randomized to receive MSB11022 subcutaneously at dose of 40 mg every other week starting at Week 16 up to and including Week 50 in overall treatment period.	

Primary: Percentage of Subjects Who Achieved Psoriasis Area and Severity Index 75 (PASI 75) at Week 16

End point title	Percentage of Subjects Who Achieved Psoriasis Area and Severity Index 75 (PASI 75) at Week 16
End point description: PASI correlates to the physician's assessment of psoriasis symptoms including redness of lesions, thickness of lesions, scaliness of lesions and extent of disease. Each parameter is graded from 0-4, 0 refers to no disease and 4 to severe involvement. The body is divided into 4 areas for scoring (head, arms, trunk to groin, legs to top of buttocks), and the final score ranges from 0-72 with higher scores reflecting more disease severity. The PASI-75 response is defined as the percentage of subjects who achieved at least a 75% improvement in PASI score from Baseline. The per-protocol (PP) Analysis Set included all randomized and treated subjects who did not have any major protocol deviations during the	

Core Treatment Period with respect to factors likely to affect the efficacy of treatment.

Each parameter is graded from 0-4, 0 refers to no disease and 4 to severe involvement. The body is divided into 4 areas for scoring (head, arms, trunk to groin, legs to top of buttocks), and the final score ranges from 0-72, with higher scores reflecting more disease severity. Time to achieve at least 90% improvement in PASI from baseline was measured. PP analysis set was used.

Secondary: European Quality of Life 5-Dimensions and 5-Levels Questionnaire (EQ5D-5L) Based on VAS Score at Week 16

End point title	European Quality of Life 5-Dimensions and 5-Levels Questionnaire (EQ5D-5L) Based on VAS Score at Week 16
-----------------	--

End point description:

The EQ-5D-5L questionnaire assesses 5 dimensions: mobility, self-care, usual activities, pain/discomfort and anxiety/depression. Each dimension has 5 response options (no problems, slight problems, moderate problems, severe problems and extreme problems) that reflect increasing levels of difficulty. The subject was asked to indicate his/her current health state by selecting the most appropriate level on a visual analog scale, where the subject was asked to rate current health status on a scale of 0 to 100, with 0 being the worst imaginable health state. PP analysis set was used. Here "Number of subjects analyzed" signifies those subjects who were evaluable for this endpoint and "n" signifies those subjects who were evaluable for this endpoint at specified category.

Secondary: Number of Subjects With Treatment Emergent Adverse Events (TEAEs), Serious TEAEs, TEAEs of Special Interest and TEAEs Leading to Death up to Week 16

End point title	Number of Subjects With Treatment Emergent Adverse Events (TEAEs), Serious TEAEs, TEAEs of Special Interest and TEAEs Leading to Death up to Week 16
-----------------	--

End point description:

Adverse event(AE) was defined as any untoward medical occurrence in subject which does not necessarily have causal relationship with treatment. AE was any unfavorable and unintended sign(including abnormal laboratory finding), symptom/disease temporally associated with use of medicinal product, whether/not considered related to medicinal product. A serious adverse event(SAE) was AE that resulted in any of the following outcomes: death; life threatening; persistent/significant disability/incapacity; initial/prolonged inpatient hospitalization; congenital anomaly/birth defect or was otherwise considered medically important. Term TEAE is defined as AEs starting/worsening after first intake of the study drug. TEAEs included both Serious TEAEs and non-serious TEAEs. Safety (SAF) Analysis Set was all randomized subjects who received at least 1 dose of MSB11022 or EU-Humira. Subjects in SAF were analyzed according to actual treatment received initially during the relevant treatment period.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 February 2016	<ol style="list-style-type: none">1. Added 4-month Safety Evaluation visit in synopsis section and schedule of assessments section.2. Specified procedures for subjects who become QuantiFERON®-TB Gold test (QFT) positive at Weeks 24 or 523. Added safety monitoring committee in early termination visit section 7.4.1
21 April 2016	<ol style="list-style-type: none">1. Added of planned Week 24 analysis.2. Observation period added following second and third injection, in-line with first injection in overall trial design and plan.3. Subjects will be excluded if they have a body weight greater than (>) 120 kilogram instead of Body Mass Index greater than or equals to (>=) 30 kilogram per square meter (kg/m²).4. Added more detailed time frame in inclusion criteria.5. Added of AST >3[^]ULN as exclusion for LTBI positive subjects.6. Removed efficacy assessments during the safety follow-up period.
16 September 2016	<ol style="list-style-type: none">1. Updated the list of abbreviations.2. Updated the sample size.3. Clarified of the PK analysis subgroup.4. Concomitant medicines and procedures were removed from 4-month safety follow-up visit.5. Updated the timing of vital sign measurements updated.6. Clarified the use of immunogenicity blood samples for PK analysis

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
