

Clinical trial results:

A phase IIa, open label study of multiple doses of GLPG1837 in subjects with cystic fibrosis and the G551D mutation.

Summary

EudraCT number	2015-003291-77
Trial protocol	GB DE CZ IE
Global end of trial date	06 October 2016

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 April 2017
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	06 October 2016
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Primary objective:

- To evaluate the safety and tolerability of multiple oral doses of GLPG1837 in subjects with CF and at least one copy of the G551D mutation.

Secondary objectives:

- To assess changes in sweat chloride from baseline (Day 1) as the biomarker of CFTR ion channel function.
 - To explore the changes in pulmonary function (FEV1) from baseline.
 - To assess the PK profile of GLPG1837.
-

Protection of trial subjects:

This study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and the International Council for Harmonization (ICH) Note for Guidance on Good Clinical Practice (GCP) (CPMP/ICH/135/95) and with applicable local requirements.

Prior to the performance of any study-specific procedure, written informed consent was obtained from each subject. All subjects were informed about the nature and purpose of the study, as well as of its risks and benefits. It was explained that s/he could withdraw from the study at any time for any reason and that this would not have any effect on her/his potential future medical care.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	23 February 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 11
Country: Number of subjects enrolled	United Kingdom: 5
Country: Number of subjects enrolled	Czech Republic: 2
Country: Number of subjects enrolled	Germany: 6
Country: Number of subjects enrolled	Ireland: 2
Worldwide total number of subjects	26
EEA total number of subjects	15

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	26
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study was conducted from 23 February 2016 to 06 October 2016.
Sixteen sites across five countries (Ireland, Czech Republic, Germany, United Kingdom, Australia) participated in the study; 15 sites actively enrolled subjects in the study.

Pre-assignment

Screening details:

In total, 34 subjects were screened of which 26 were eligible and enrolled.

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

This was an open label study.

Arms

Are arms mutually exclusive?	No
Arm title	GLPG1837 - 125 mg b.i.d
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	GLPG1837
Investigational medicinal product code	G510037
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Oral doses of GLPG1837 125 mg were administered as two tablets of 62.5 mg, twice daily (b.i.d) during 1 week period under fed conditions.

The study drug GLPG1837 was presented as a tablet containing 62.5 mg G510037 (G510037 is the compound code for GLPG1837).

Arm title	GLPG1837 - 250 mg b.i.d
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	GLPG1837
Investigational medicinal product code	G510037
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Oral doses of GLPG1837 250 mg were administered as two tablets of 125 mg, twice daily (b.i.d) during 1 week period under fed conditions.

The study drug GLPG1837 was presented as a tablet containing 125 mg G510037.

Treatment GLPG1837 - 250 mg b.i.d succeeded treatment GLPG1837 - 125 mg b.i.d, without washout in between dosing periods.

Arm title	GLPG1837 - 500 mg b.i.d
Arm description: -	
Arm type	Experimental

Investigational medicinal product name	GLPG1837
Investigational medicinal product code	G510037
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Oral doses of GLPG1837 500 mg were administered as two tablets of 250 mg, twice daily (b.i.d) during 2 week period under fed conditions.

The study drug GLPG1837 was presented as a tablet containing 250 mg G510037.

Treatment GLPG1837 - 500 mg b.i.d succeeded treatment GLPG1837 - 250 mg b.i.d, without washout in between dosing periods.

Number of subjects in period 1	GLPG1837 - 125 mg b.i.d	GLPG1837 - 250 mg b.i.d	GLPG1837 - 500 mg b.i.d

Primary: Safety - TEAE (Treatment-Emergent Adverse Events)

End point title	Safety - TEAE (Treatment-Emergent Adverse Events) ^[1]
End point description:	The number of subjects with treatment-emergent adverse events (TEAEs). An analysis of the treatment-emergent AEs (TEAEs) was performed. Laboratory assessments, 12-lead ECG, vital signs and oxygen saturation by pulse oximetry were analyzed descriptively.
End point type	Primary
End point timeframe:	From first study drug administration until the last follow-up visit at multiple time points.

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Analysis descriptive only.

Adverse events

Adverse events information

Timeframe for reporting adverse events:

AEs: from signing informed consent until the last follow-up visit at multiple time points.

TEAEs: from first study drug administration until the last follow-up visit at multiple time points.

Adverse event reporting additional description:

All TEAEs are presented.

TEAEs are tabulated by System Organ Class and Preferred Term.

Assessment type	Systematic
