

## Clinical trial results:

**A randomized, double-blind, parallel-group, multicenter study to demonstrate similar efficacy and to compare safety and immunogenicity of GP2017 and Humira in patients with moderate to severe active rheumatoid arthritis**

### Summary

EudraCT number	2015-003433-10
Trial protocol	CZ GB DE HU RO ES IT
Global end of trial date	26 September 2017

### Results information

Result version number	v1 (current)
This version publication date	07 October 2018
First version publication date	07 October 2018

### Trial information

#### Trial identification

Sponsor protocol code	Hexal AG/Sandoz Inc
-----------------------	---------------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02744755
WHO universal trial number (UTN)	-

Notes:

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	26 September 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	26 September 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The main objective of the trial is to demonstrate similar efficacy of GP2017 and US-licensed Humira in patients with moderate to severe active RA with respect to DAS28-CRP score change from baseline at Week 12.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	29 March 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Czech Republic: 42
Country: Number of subjects enrolled	Germany: 22
Country: Number of subjects enrolled	United Kingdom: 2
Country: Number of subjects enrolled	Hungary: 17
Country: Number of subjects enrolled	Italy: 2
Country: Number of subjects enrolled	Malaysia: 4
Country: Number of subjects enrolled	Mexico: 38
Country: Number of subjects enrolled	Poland: 91
Country: Number of subjects enrolled	Romania: 15
Country: Number of subjects enrolled	Russian Federation: 11
Country: Number of subjects enrolled	Serbia: 11
Country: Number of subjects enrolled	Spain: 14
Country: Number of subjects enrolled	United States: 84
Worldwide total number of subjects	353
EEA total number of subjects	205

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	285
From 65 to 84 years	67
85 years and over	1

## Subject disposition

### Recruitment

Recruitment details:

353 patients were randomized (1:1) and received at least one dose of study drug; 303 patients completed the study. Eligible patients in the Humira group who completed Study Period 1 (baseline to week 24) with an at least moderate response by DAS28-CRP score were switched to GP2017 treatment during Study Period 2 (Week 24 to week 48).

### Pre-assignment

Screening details:

Full analysis set: randomized patients (study drug assigned)

Per protocol set study period 1 (SP1) / study period 2 (SP2): patients who completed Week 12 (SP1) / Week 48 (SP2) without major protocol deviations and received at least 5 doses of study drug up to Week 10 (SP1) / 10 doses of IMP from Week 24 to Week 46 (SP2)

### Period 1

Period 1 title	Study period 1
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	GP2017

Arm description:

Group 1 received treatment with 40 mg GP2017 in 0.8 mL of solution administered subcutaneously from pre-filled syringes up to 24 weeks (study Period 1) after which patients achieving at least a moderate clinical response continued treatment with 40mg GP2017 subcutaneous injection up to 46 weeks (study Period 2).

Arm type	Experimental
Investigational medicinal product name	GP2017
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen, Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

GP2017 in pre-filled syringes for subcutaneous injection containing 40 mg of active ingredient in 0.8 mL of solution

<b>Arm title</b>	Humira / switched GP2017
------------------	--------------------------

Arm description:

Group 2 received treatment with 40 mg Humira in 0.8 mL of solution administered subcutaneously from pre-filled syringes up to 24 weeks (study Period 1) after which patients achieving at least a moderate clinical response were switched to 40mg GP2017 subcutaneous injection up to 46 weeks (study Period 2).

Arm type	Active comparator
Investigational medicinal product name	Humira
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen, Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Humira in pre-filled syringes for subcutaneous injection containing 40 mg of active ingredient in 0.8 mL

<b>Number of subjects in period 1</b>	GP2017	Humira / switched GP2017
Started	177	176
Completed	163	168
Not completed	14	8
Consent withdrawn by subject	8	4
not defined	-	1
Adverse event, non-fatal	1	1
Pregnancy	1	-
Lost to follow-up	1	1
Protocol deviation	2	1
Lack of efficacy	1	-

## Period 2

Period 2 title	Study period 2
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	GP2017

### Arm description:

Group 1 received treatment with 40 mg GP2017 in 0.8 mL of solution administered subcutaneously from pre-filled syringes up to 24 weeks (study Period 1) after which patients achieving at least a moderate clinical response continued treatment with 40mg GP2017 subcutaneous injection up to 46 weeks (study Period 2).

Arm type	Experimental
Investigational medicinal product name	GP2017
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

### Dosage and administration details:

GP2017 in pre-filled syringes for subcutaneous injection containing 40 mg of active ingredient in 0.8 mL of solution

<b>Arm title</b>	Humira / switched GP2017
Arm description: Group 2 received treatment with 40 mg Humira in 0.8 mL of solution administered subcutaneously from pre-filled syringes up to 24 weeks (study Period 1) after which patients achieving at least a moderate clinical response were switched to 40mg GP2017 subcutaneous injection up to 46 weeks (study Period 2).	
Arm type	Switched to Experimental
Investigational medicinal product name	GP2017
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

GP2017 in pre-filled syringes for subcutaneous injection containing 40 mg of active ingredient in 0.8 mL of solution

<b>Number of subjects in period 2<sup>[1]</sup></b>	GP2017	Humira / switched GP2017
Started	159	166
Completed	145	158
Not completed	14	8
Consent withdrawn by subject	2	2
not defined	3	2
Adverse event, non-fatal	5	-
Lost to follow-up	-	2
Protocol deviation	1	-
Lack of efficacy	3	2

Notes:

[1] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: numbers are correct

## Statistical analyses

Statistical analysis title	equivalence assessment between GP2017 and Humira
----------------------------	--

Statistical analysis description:

Therapeutic equivalence in terms of change from baseline in DAS28-CRP at week 12 will be concluded if the 95% confidence interval for the LS mean difference between GP2017 and Humira is contained within the interval [-0.6; 0.6]. A mixed-model repeated measures analysis was performed for DAS28-CRP change from baseline including treatment, stratification factors, time, the interaction between time (visits) and treatment all as categorical variables, and baseline DAS28-CRP as a continuous variable.

Comparison groups	GP2017 v Humira / switched GP2017
Number of subjects included in analysis	284
Analysis specification	Pre-specified
Analysis type	equivalence <sup>[1]</sup>
Parameter estimate	Mean difference (final values)
Point estimate	0.02
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.24
upper limit	0.27
Variability estimate	Standard error of the mean
Dispersion value	0.129

Notes:

[1] - A 0.6 change in DAS28-CRP score is considered as no clinically meaningful difference by EULAR criteria and is therefore used as the equivalence margin limits [0.6,-0.6].

Statistical analysis title	equivalence assessment between GP2017 and Humira
----------------------------	--

Statistical analysis description:

Therapeutic equivalence in terms of change from baseline in DAS28-CRP at week 12 will be concluded if the 90% confidence interval for the LS mean difference between GP2017 and Humira is contained within the interval [-0.6; 0.6]. A mixed-model repeated measures analysis was performed for DAS28-CRP change from baseline including treatment, stratification factors, time, the interaction between time (visits) and treatment all as categorical variables, and baseline DAS28-CRP as a continuous variable.

## Secondary: Study period 2: Changes from Week 24 at Week 48 in DAS28-CRP and DAS28-ESR scores in patients treated continuously with GP2017 and in patients treated with GP2017 after switch from Humira

End point title	Study period 2: Changes from Week 24 at Week 48 in DAS28-CRP and DAS28-ESR scores in patients treated continuously with GP2017 and in patients treated with GP2017 after switch from Humira
-----------------	---

End point description:

Disease activity score (DAS) 28-CRP is based on 28-joint count (tender and swollen joints), C-reactive protein and patient's assessment of global disease activity (GDA) or general health (GH), values range from 0.96 to 10.0 while higher values mean a higher disease activity. • A DAS28-CRP value >5.1 corresponds to a high disease activity • A DAS28-CRP value between 3.2 and 5.1 corresponds to a moderate disease activity • A DAS28-CRP value between 2.6 and 3.2 corresponds to a low disease activity • A DAS28-CRP value < 2.6 corresponds to remission  $DAS28-CRP = 0.56 * \sqrt{\text{tender28}} + 0.28 * \sqrt{\text{swollen28}} + 0.36 * \ln(CRP+1) + 0.014 * GDA \text{ or } GH + 0.96$  where • tender28 and swollen28 are the number of tender and swollen joints as assessed using 28-joint count • CRP is C-reactive protein (mg/l) • GDA is the global disease activity measured on a Visual Analogue Scale (VAS) of 100 mm. For DAS-28 ESR,  $DAS28-ESR = 0.56 * \sqrt{TJC28} + 0.28 * \sqrt{SJC28} + 0.70 * \ln(ESR) + 0.014 * GH$

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 November 2015	Amendment 1 mainly provided further clarification of some inclusion and exclusion criteria and the blood sampling schedule.
15 February 2016	Amendment 2 introduced the following changes: The patients' HIV seronegativity was to be confirmed at the study eligibility screening. The ranges for clinically notable sodium and calcium values were amended in line with CTCAE version 4.
01 February 2017	Amendment 3 introduced the following substantial changes: The originally planned analysis and reporting of Week 12 data was removed. Instead all data were to be analyzed at the end of the study and reported in a single study report. The already collected serum samples that were left over after the assessment of adalimumab trough concentration and testing for ADAs were not to be destroyed (as originally planned) but to be stored for later additional exploratory research, if the patient agreed. The amended protocol and the additional Informed Consent to be signed by the affected patients had to be approved by or notified to the respective local authorities.

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

NA

Notes:
