

## Clinical trial results:

### BI 655066/ABBV-066 (risankizumab) Versus Adalimumab in a Randomized, Double Blind, Parallel Group Trial in Moderate to Severe Plaque Psoriasis to Assess Safety and Efficacy After 16 Weeks of Treatment and After Incomplete Adalimumab Treatment Response (IMMvent)

#### Summary

EudraCT number	2015-003623-65
Trial protocol	DE SE FI PT CZ PL
Global end of trial date	24 August 2017

#### Results information

Result version number	v1 (current)
This version publication date	09 September 2018
First version publication date	09 September 2018

#### Trial information

##### Trial identification

Sponsor protocol code	1311.30
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02694523
WHO universal trial number (UTN)	-

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 October 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	01 February 2017
Global end of trial reached?	Yes
Global end of trial date	24 August 2017
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The main objectives of this study were to assess the efficacy and safety of risankizumab compared with adalimumab in subjects with moderate to severe chronic plaque psoriasis, and the efficacy and safety of switching to risankizumab compared with continued adalimumab in patients with an inadequate response to adalimumab at Week 16.

Protection of trial subjects:

Only patients that met all the study inclusion and none of the exclusion criteria were to be entered in the study. All patients were free to withdraw from the clinical trial at any time for any reason given. Close monitoring of all patients was adhered to throughout the trial conduct. Rescue medication was allowed for all patients as required.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 March 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 94
Country: Number of subjects enrolled	Czech Republic: 29
Country: Number of subjects enrolled	Finland: 10
Country: Number of subjects enrolled	France: 21
Country: Number of subjects enrolled	Germany: 88
Country: Number of subjects enrolled	Mexico: 21
Country: Number of subjects enrolled	Poland: 79
Country: Number of subjects enrolled	Portugal: 22
Country: Number of subjects enrolled	Sweden: 12
Country: Number of subjects enrolled	Taiwan: 58
Country: Number of subjects enrolled	United States: 250
Worldwide total number of subjects	684
EEA total number of subjects	261

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	621
From 65 to 84 years	63
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Confirmatory, Randomized, DoubleBlind, DoubleDummy, ActiveControlled, ParallelDesign trial to compare risankizumab with adalimumab in patients with moderate to severe chronic plaque psoriasis. Randomization ratio was 1:1 to risankizumab or adalimumab, stratified by weight and by prior exposure to TNF antagonists. 684 were enrolled and 605 were treated.

### Pre-assignment

Screening details:

Patients were randomized to adalimumab or risankizumab in Part A. Who received risankizumab continued risankizumab in Part B; adalimumab responders ( $\geq$  Psoriasis Area and Severity Index (PASI) 90) continued adalimumab, nonresponders ( $<$  PASI 50) switched to risankizumab, inadequate responders (PASI 50 to  $<$  PASI 90) were rerandomized to adalimumab or risankizumab in Part B.

### Period 1

Period 1 title	Part A
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

This was a double-blind trial. Patients were randomized in blocks to double-blind treatments.

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Adalimumab (Part A)
------------------	---------------------

Arm description:

Participants randomized to receive double-blind adalimumab 80 milligram (mg) at Week 0, then 40 mg at Week 1 and every 2 weeks for 15 weeks (Part A).

Arm type	Active comparator
Investigational medicinal product name	Adalimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants randomized to receive double-blind adalimumab 80 mg at Week 0, then 40 mg at Week 1 and every 2 weeks for 15 weeks (Part A).

<b>Arm title</b>	Risankizumab (Part A)
------------------	-----------------------

Arm description:

Participants randomized to receive risankizumab at Weeks 0 and 4 (Part A) continued to receive risankizumab at Weeks 16 and 28.

Arm type	Experimental
Investigational medicinal product name	Risankizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants randomized to receive risankizumab at Weeks 0 and 4 (Part A) continued to receive risankizumab at Weeks 16 and 28.

<b>Number of subjects in period 1<sup>[1]</sup></b>	Adalimumab (Part A)	Risankizumab (Part A)
Started	304	301
Completed	291	294
Not completed	13	7
Consent withdrawn by subject	3	1
Adverse event, non-fatal	7	3
Not Specified	1	1
Lost to follow-up	1	2
Protocol deviation	1	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Baseline characteristics are based on patients who were randomised after successfully completing the screening period and received at least one dose of the trial medication.

## Period 2

Period 2 title	Part B
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

This was a double-blind trial. Patients were randomized in blocks to double-blind treatments.

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Risankizumab/Risankizumab (Part B)

Arm description:

Participants randomized to receive double-blind risankizumab in Part A continued to receive risankizumab 150 mg at Weeks 16, and 28 (Part B).

Arm type	Experimental
Investigational medicinal product name	Risankizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants randomized to receive double-blind risankizumab in Part A continued to receive risankizumab 150 mg at Weeks 16, and 28 (Part B).

<b>Arm title</b>	Adalimumab/Adalimumab (Part B)
------------------	--------------------------------

Arm description:

Participants who were responders after receiving adalimumab in Part A continued adalimumab 40 mg every other week through Week 41 (Part B).

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Adalimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants who were responders after receiving adalimumab in Part A continued adalimumab 40 mg every other week through Week 41 (Part B).

<b>Arm title</b>	Adalimumab/Risankizumab (Part B)
------------------	----------------------------------

Arm description:

Participants who were nonresponders after receiving adalimumab in Part A switched to risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

Arm type	Experimental
Investigational medicinal product name	Risankizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants who were nonresponders after receiving adalimumab in Part A switched to risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

<b>Arm title</b>	Adalimumab/Rerandomized to Adalimumab (Part B)
------------------	--

Arm description:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to continue to receive adalimumab 40 mg every 2 weeks through Week 41 (Part B).

Arm type	Active comparator
Investigational medicinal product name	Adalimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to continue to receive adalimumab 40 mg every 2 weeks through Week 41 (Part B).

<b>Arm title</b>	Adalimumab/Rerandomized to Risankizumab (Part B)
------------------	--

Arm description:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to receive risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

Arm type	Experimental
Investigational medicinal product name	Risankizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to receive risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

<b>Number of subjects in period 2</b>	<b>Risankizumab/Risankizumab (Part B)</b>	<b>Adalimumab/Adalimumab (Part B)</b>	<b>Adalimumab/Risankizumab (Part B)</b>
Started	294	144	38
Completed	274	140	34
Not completed	20	4	4
Consent withdrawn by subject	9	-	1
Adverse event, non-fatal	7	1	1
Not Specified	1	-	-
Lost to follow-up	2	3	2
Protocol deviation	1	-	-

<b>Number of subjects in period 2</b>	<b>Adalimumab/Rerandomized to Adalimumab (Part B)</b>	<b>Adalimumab/Rerandomized to Risankizumab (Part B)</b>

## Baseline characteristics

### Reporting groups

Reporting group title	Adalimumab (Part A)
-----------------------	---------------------

Reporting group description:

Participants randomized to receive double-blind adalimumab 80 milligram (mg) at Week 0, then 40 mg at Week 1 and every 2 weeks for 15 weeks (Part A).

Reporting group title	Risankizumab (Part A)
-----------------------	-----------------------

Reporting group description:

Participants randomized to receive risankizumab at Weeks 0 and 4 (Part A) continued to receive risankizumab at Weeks 16 and 28.

Reporting group values	Adalimumab (Part A)	Risankizumab (Part A)	Total
Number of subjects	304	301	605
Age categorical			
Units: Subjects			

Age Continuous			
Age at the time of signing informed consent form is presented. Intent-to-treat population in Part A (ITT_A): All subjects randomized at Baseline.			
Units: years			
arithmetic mean	47.0	45.3	
standard deviation	± 13.09	± 13.79	-
Sex: Female, Male			
Number of subjects is categorized as Male or Female. Intent-to-treat population in Part A (ITT_A): All subjects randomized at Baseline.			
Units: Subjects			
Female	92	91	183
Male	212	210	422
Race (NIH/OMB)			
Number of subjects is categorized for race data. Intent-to-treat population in Part A (ITT_A): All subjects randomized at Baseline.			
Units: Subjects			
American Indian or Alaska Native	0	2	2
Asian	35	41	76
Native Hawaiian or Other Pacific Islander	0	0	0
Black or African American	6	11	17
White	263	245	508
More than one race	0	2	2
Unknown or Not Reported	0	0	0
Ethnicity (NIH/OMB)			
Number of subjects is categorized for ethnicity data. Intent-to-treat population in Part A (ITT_A): All subjects randomized at Baseline.			
Units: Subjects			
Hispanic or Latino	59	44	103
Not Hispanic or Latino	245	257	502

## End points

### End points reporting groups

Reporting group title	Adalimumab (Part A)
Reporting group description: Participants randomized to receive double-blind adalimumab 80 milligram (mg) at Week 0, then 40 mg at Week 1 and every 2 weeks for 15 weeks (Part A).	
Reporting group title	Risankizumab (Part A)
Reporting group description: Participants randomized to receive risankizumab at Weeks 0 and 4 (Part A) continued to receive risankizumab at Weeks 16 and 28.	
Reporting group title	Risankizumab/Risankizumab (Part B)
Reporting group description: Participants randomized to receive double-blind risankizumab in Part A continued to receive risankizumab 150 mg at Weeks 16, and 28 (Part B).	
Reporting group title	Adalimumab/Adalimumab (Part B)
Reporting group description: Participants who were responders after receiving adalimumab in Part A continued adalimumab 40 mg every other week through Week 41 (Part B).	
Reporting group title	Adalimumab/Risankizumab (Part B)
Reporting group description: Participants who were nonresponders after receiving adalimumab in Part A switched to risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).	
Reporting group title	Adalimumab/Rerandomized to Adalimumab (Part B)
Reporting group description: Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to continue to receive adalimumab 40 mg every 2 weeks through Week 41 (Part B).

### Primary: Percentage of Participants Achieving 90% Improvement in Psoriasis Area and Severity Index (PASI) Score (PASI90) at Week 16 (Part A)

End point title	Percentage of Participants Achieving 90% Improvement in Psoriasis Area and Severity Index (PASI) Score (PASI90) at Week 16 (Part A)
End point description: PASI is a composite score based on the degree of effect on body surface area of psoriasis and the extension of erythema (reddening), induration (thickness), desquamation (scaling) of the lesions and area affected as observed on the day of examination. The severity of each sign was assessed using a 5-point scale, where 0=no symptoms, 1=slight, 2=moderate, 3=marked, 4=very marked. The PASI score ranges from 0 to 72, where 0 indicates no psoriasis and 72 indicates very severe psoriasis. PASI90 is defined as at least a 90% reduction in PASI score compared with the Baseline PASI score. The percent reduction in score is calculated as (PASI score at Baseline - score at follow-up visit) / PASI score at Baseline * 100. Nonresponder imputation (NRI) was used for missing data. Intent-to-treat population in Part A (ITT_A): All subjects randomized at Baseline.

## Primary: Percentage of Participants Achieving Static Physician Global Assessment (sPGA) score of Clear or Almost Clear at Week 16 (Part A)

End point title	Percentage of Participants Achieving Static Physician Global Assessment (sPGA) score of Clear or Almost Clear at Week 16 (Part A)
-----------------	---

End point description:

The sPGA is an assessment by the investigator of the overall disease severity at the time of evaluation. Erythema (E), induration (I), and desquamation (D) are scored on a 5-point scale ranging from 0 (none) to 4 (severe). The sPGA ranges from 0 to 4, and is calculated as Clear (0) = 0 for all three; Almost clear (1) = mean  $> 0$ ,  $< 1.5$ ; Mild (2) = mean  $\geq 1.5$ ,  $< 2.5$ ; Moderate (3) = mean  $\geq 2.5$ ,  $< 3.5$ ; and Severe (4) = mean  $\geq 3.5$ . No Response Imputation (NRI) was used for missing data.

## Secondary: Percentage of Participants Who Were Re-Randomized to Receive Either Adalimumab or Risankizumab in Part B Achieving sPGA score of Clear at Week 44 (Part B)

End point title	Percentage of Participants Who Were Re-Randomized to Receive Either Adalimumab or Risankizumab in Part B Achieving sPGA score of Clear at Week 44 (Part B)
End point description:	
The sPGA is an assessment by the investigator of the overall disease severity at the time of evaluation. Erythema (E), induration (I), and desquamation (D) are scored on a 5-point scale ranging from 0 (none) to 4 (severe). The sPGA ranges from 0 to 4, and is calculated as Clear (0) = 0 for all three; Almost clear (1) = mean $>0$ , $<1.5$ ; Mild (2) = mean $\geq 1.5$ , $<2.5$ ; Moderate (3) = mean $\geq 2.5$ , $<3.5$ ; and Severe (4) = mean $\geq 3.5$ . NRI was used for missing data.	
End point type	Secondary
End point timeframe:	
Week 44	

<b>End point values</b>	Adalimumab/Rerandomized to Adalimumab (Part B)	Adalimumab/Rerandomized to Risankizumab (Part B)		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	56 <sup>[13]</sup>	53 <sup>[14]</sup>		
Units: Percentage of participants				
number (not applicable)	7.1	39.6

## Statistical analyses

<b>Statistical analysis title</b>	Statistical Analysis 7
Statistical analysis description:	
P-value calculated according to the Cochran-Mantel-Haenszel test adjusted for baseline weight ( $\leq 100$ kg vs $> 100$ kg) and prior exposure to TNF antagonists (0 vs $\geq 1$ ).	
Comparison groups	Adalimumab/Rerandomized to Adalimumab (Part B) v Adalimumab/Rerandomized to Risankizumab (Part B)
Number of subjects included in analysis	109
Analysis specification	Pre-specified
Analysis type	other
P-value	$< 0.001$
Method	Cochran-Mantel-Haenszel
Parameter estimate	Difference in percentage of participants
Point estimate	32.8
Confidence interval	
level	95 %
sides	2-sided
lower limit	18.8
upper limit	46.9

## Other pre-specified: Percentage of Participants Who Were Re-Randomized to Receive Either Adalimumab or Risankizumab in Part B Achieving sPGA score of Clear or Almost Clear at Week 44 (Part B)

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) and serious adverse events (TESAEs) were collected from first dose of study drug until 15 weeks after the last dose of study drug, up to 48 weeks

Adverse event reporting additional description:

AEs in Part A defined as events from the first dose of drug in Part A until prior to the first dose in Part B (Week16) or up to 15 weeks after the last dose of study drug if the participant discontinued in Part A;

AEs in Part B defined as events from first dose of drug in Part B (Week16) until up to 15 weeks after last dose of study drug.

Assessment type	Systematic

### Reporting groups

Reporting group title	Adalimumab (Part A)
-----------------------	---------------------

Reporting group description:

Participants randomized to receive double-blind adalimumab 80 mg at Week 0, then 40 milligram (mg) at Week 1 and every 2 weeks for 15 weeks (Part A).

Reporting group title	Risankizumab (Part A)
-----------------------	-----------------------

Reporting group description:

Participants randomized to receive risankizumab at Weeks 0 and 4 (Part A) continued to receive risankizumab at Weeks 16 and 28.

Reporting group title	Adalimumab/Rerandomized to Adalimumab (Part B)
-----------------------	--

Reporting group description:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to continue to receive adalimumab 40 mg every 2 weeks through Week 41 (Part B).

Reporting group title	Adalimumab/Rerandomized to Risankizumab (Part B)
-----------------------	--

Reporting group description:

Participants who were inadequate responders after receiving adalimumab in Part A, and re-randomized to receive risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

Reporting group title	Adalimumab/Risankizumab (Part B)
-----------------------	----------------------------------

Reporting group description:

Participants who were nonresponders after receiving adalimumab in Part A switched to risankizumab 150 mg at Weeks 16, 20, and 32 (Part B).

Reporting group title	Risankizumab/Risankizumab (Part B)
-----------------------	------------------------------------

Reporting group description:

Participants randomized to receive double-blind risankizumab in Part A continued to receive risankizumab 150 mg at Weeks 16, and 28 (Part B).

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
17 June 2016	Abbreviation added. "Biologic therapy history" changed to "Psoriasis therapy history" and % body surface area involvement at Visit 1 and 2 added. Anti-drug antibodies sampling at Week 4 added. Randomization, Re-Randomization at Visit 8 should read footer 14. Several text changed in Overall Trial Design and Plan. Clarification on how efficacy data will be used upon submission to the Data Monitoring Committee (DMC) as well as additional information on unbinding. Thrombotic events added. New inclusion criterion added. Exclusion criteria number 4 and 7 slightly changed. Patients that discontinue study medication should complete all study visits and procedures as initially planned, if possible. Method of assigning patients to treatment groups Section revised. Revised text to specify timing of vital sign measurements and hypersensitivity monitoring at dosing visits; further information regarding drug injection details; additional description on patients late visit added. Added facitinib (Xeljanz®) and apremilast (Otezla®) and removed efalizumab (Raptiva®). Added "Absolute Psoriasis Area Severity Index (PASI) score of <3 at all visits collected" in further endpoints. Some laboratory parameters are better specified. Added Albumin/creatinine ratio in urine. Removed information from details of trial procedures. Some information added and removed from baseline conditions. Last paragraph of treatment period section revised. Patients that discontinue study medication should complete all study visits and procedures as initially planned, if possible. Clarified the important protocol violations. Hypothesis tests as described in Section 7.2 will be repeated on the Per Protocol Set or Re-Randomized Per Protocol Set, as appropriate. Added "Time to onset of Endpoint" definition. Clarified Residual Effect Period (REP). Interim analysis planning added. The Work Limitations Questionnaire (WLQ) is not applicable to unemployed patients added.
05 July 2016	Clarification provided in section 11, to implement only after approval of the Institutional Review Board (IRB) / Independent Ethics Committee (IEC) / Competent Authorities.
17 October 2016	1. In title page changed BI drug or BI 655066 to refer to either names for this compound: BI 655066/ABBV-066 (risankizumab). 2. Changed sponsor from Boehringer Ingelheim (BI) to AbbVie in the USA; BI remains the sponsor for all other participating countries. 3. Changed text to specify Statistical Evaluation will be done by AbbVie according to their SOPs.. 4. Updated text to "AbbVie/Boehringer Ingelheim reserves the right to discontinue the trial overall or at a particular trial site at any time for the following reasons". 5. Changed DNA banking sample storage from Boehringer Ingelheim to AbbVie or a third party delegate. 6. Skin biopsies will be collected only at Visit 2 (lesional and non-lesional) and at Visit 7 (only lesional) as shown in the Flow Chart. 7. Changed text to specify that AbbVie summary tables and listings will be produced and analyses are based on AbbVie standards.

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
