

Clinical trial results:

A multi center, multi national, open label, extension study to evaluate the long-term efficacy and safety of BMN 044 (PRO044) in subjects with Duchenne muscular dystrophy

Summary

EudraCT number	2015-003681-87
Trial protocol	BE IT
Global end of trial date	12 September 2016

Results information

Result version number	v1 (current)
This version publication date	23 March 2017
First version publication date	23 March 2017

Trial information

Trial identification

Sponsor protocol code	BMN-044-201
-----------------------	-------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02958202
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 November 2016
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	12 September 2016
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To evaluate the long-term safety of BMN 044 in subjects with DMD correctable by BMN 044 induced DMD exon 44 skipping who have previously participated in an eligible study with BMN 044

Protection of trial subjects:

Not applicable.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	19 April 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 4
Country: Number of subjects enrolled	Sweden: 3
Worldwide total number of subjects	7
EEA total number of subjects	7

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	2
Adolescents (12-17 years)	3
Adults (18-64 years)	2
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

For subjects enrolling directly after completion of an existing BMN044 study, assessments from their last visit will be used as the baseline assessment. For subjects who have not received any BMN044 treatment for more than 28 days, these assessments will be performed: Physical examination, ECG, echocardiography, urinalysis hematology/biochemistry.

Period 1

Period 1 title	044201 (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	6 mg/kg/week IV

Arm description:

6 mg/kg/week IV

Arm type	Experimental
Investigational medicinal product name	BMN-044
Investigational medicinal product code	BMN-044
Other name	PRO-044
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects will receive 6 mg/kg weekly through IV administration.

BMN 044 is presented in a 2R glass vial (Type 1) containing a solution of the active ingredient dissolved in 20 mM aqueous phosphate buffer, pH 7 solution for injection, 100 and 200 mg/mL. Each vial of BMN 044 contains 1.0 mL (0.8 mL extractable amount) of active ingredient. The solution is colorless to slightly yellow in appearance.

Arm title	9 mg/kg/week IV
------------------	-----------------

Arm description:

9 mg/kg/week IV

Arm type	Experimental
Investigational medicinal product name	BMN-044
Investigational medicinal product code	BMN-044
Other name	PRO-044
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects will receive 9 mg/kg weekly through IV administration.

BMN 044 is presented in a 2R glass vial (Type 1) containing a solution of the active ingredient dissolved in 20 mM aqueous phosphate buffer, pH 7 solution for injection, 100 and 200 mg/mL. Each vial of BMN 044 contains 1.0 mL (0.8 mL extractable amount) of active ingredient. The solution is colorless to slightly yellow in appearance.

Arm title	6 mg/kg/week SC
------------------	-----------------

Arm description:

6 mg/kg/week SC

Arm type	Experimental
Investigational medicinal product name	BMN-044
Investigational medicinal product code	BMN-044
Other name	PRO-044
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects will receive 6 mg/kg weekly through SC administration.

BMN 044 is presented in a 2R glass vial (Type 1) containing a solution of the active ingredient dissolved in 20 mM aqueous phosphate buffer, pH 7 solution for injection, 100 and 200 mg/mL. Each vial of BMN 044 contains 1.0 mL (0.8 mL extractable amount) of active ingredient. The solution is colorless to slightly yellow in appearance.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
18 January 2016	<p>The rationale for this amendment is to improve the understanding of the required assessments to be completed and to address feedback from Regulatory and Ethics Groups.</p> <ol style="list-style-type: none">1. Clarification of how subjects will transition from parent studies to this study depending on whether they are still taking BMN 044 or have been off treatment for more than 28 days.2. Clarification of assessments required during the 2 phases of the study, including revising the schedule of assessment tables.3. Confirm monitoring requirements for intravenous infusions.4. Making the laboratory stopping criteria consistent with the BioMarin AON programme.5. Amending the statistical section to account for handling transitioning subjects and their data.6. Administrative changes to improve the readability of the document and ensure consistency throughout.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

BioMarin terminated the study early due to a company decision to stop the development of exon-skipping DMD therapies. This decision was based on the marketing authorisation filing in the US and EU for a related compound, drisapersen, for which regula
