

Clinical trial results:

A Phase IIa, randomised, double blind, placebo controlled, three way crossover study to assess the pharmacokinetics of RPL554 administered to adult patients with Cystic Fibrosis.

Summary

EudraCT number	2015-004263-36
Trial protocol	GB DE
Global end of trial date	03 November 2017

Results information

Result version number	v1 (current)
This version publication date	17 November 2018
First version publication date	17 November 2018

Trial information

Trial identification

Sponsor protocol code	RPL554-010-2015
-----------------------	-----------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	03 November 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	03 November 2017
Global end of trial reached?	Yes
Global end of trial date	03 November 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To investigate pharmacokinetics of single nebulised doses of RPL554 in patients with Cystic Fibrosis.

Protection of trial subjects:

Standard procedures for emergency care were followed for any individual adverse events if clinically needed. Short acting bronchodilators could be used as rescue medication.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 January 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 10
Worldwide total number of subjects	10
EEA total number of subjects	10

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	10
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Overall, 16 patients were screened for the study and 10 were treated. Patients received study treatment between 20 March 2017 and 30 October 2017. A total of nine patients completed the study and one was withdrawn

Pre-assignment

Screening details:

16 patients were screened. The reasons for screen failure were: (1) ECG/heart rate not meeting protocol ranges, (2) withdrew consent, (3) patient unwell, (4) prednisolone use, (5) spirometry <40% predicted normal and (6) chest infection

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Assessor

Arms

Are arms mutually exclusive?	No
Arm title	1.5 mg RPL554

Arm description:

1.5 mg RPL554 administered with a nebuliser

Arm type	Experimental
Investigational medicinal product name	1.5 mg RPL554
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nebuliser suspension
Routes of administration	Inhalation use

Dosage and administration details:

1.5 mg RPL554 administered using a nebuliser

Arm title	6 mg RPL554
------------------	-------------

Arm description:

6 mg RPL554

Arm type	Experimental
Investigational medicinal product name	6 mg RPL554
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nebuliser suspension
Routes of administration	Inhalation use

Dosage and administration details:

6 mg RPL554 administered using a nebuliser

Arm title	Placebo
------------------	---------

Arm description:

Placebo

Arm type	Experimental

Primary: Plasma concentration area under the curve to time t

End point title	Plasma concentration area under the curve to time t ^{[1][2]}
End point description: AUC from time 0 to time t was estimated	
End point type	Primary
End point timeframe: For 24 hours after each dose	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive statistics by treatment group were applied

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Pharmacokinetics were not applicable to the placebo arm

End point values	1.5 mg RPL554	6 mg RPL554		
Subject group type	Reporting group	Reporting group

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
03 March 2017	The range for ECG heart rate in inclusion criterion 3 was amended from 45 to 90 bpm to 45 to 100 bpm. In addition, the reference for predicted spirometry values was updated from Quanjer, 1993 to GLI Quanjer, 2012 and there was a change to the timeframe in which pharmacokinetic blood samples must be centrifuged after collection to within 30 minutes instead of 15 minutes. The address for the biomarker laboratory was also updated

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
