Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 June 2017
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 June 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study is to evaluate the magnitude and duration of the analgesic effect achieved following single-dose injection femoral nerve block with EXPAREL in subjects undergoing primary unilateral total knee arthroplasty (TKA).

Protection of trial subjects:

Initially, unblinded review of the data and a relative risk analysis were to be conducted if any of the following, based on the incidence rate, were identified during blinded data review:

- Severe or serious AE of special interest (AESI), including cardiac AESI and neurologic AESI exceeding 5% and in at least 5 subjects
- Severe dizziness exceeding 10% or in at least 5 subjects
- Severe AEs or serious AEs (SAEs), regardless of relationship to study drug, exceeding 20% or in at least 10 subjects

If the risk relative to placebo was greater than 2, the study was to be either permanently stopped or the study eligibility criteria were to be revised to exclude subjects who were at a higher risk for a particular AE.

After review of the Study Stopping Rules with the FDA (05 January 2017), these were changed as follows:

- Incidence rate of severe or serious AESIs as defined by the protocol including cardiac AESIs and neurologic AESIs exceeding 5% or in at least 5 subjects
- Incidence rate of severe dizziness exceeding 10% or in at least 5 subjects
- Incidence rate of severe or SAEs regardless of relationship to study drug exceeding 20% or in at least 10 subjects

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 April 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 116
Country: Number of subjects enrolled	Belgium: 109
Country: Number of subjects enrolled	Denmark: 5
Worldwide total number of subjects	230
EEA total number of subjects	114

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	100
From 65 to 84 years	128
85 years and over	2

Subject disposition

Recruitment

Recruitment details:

Participants were recruited between June 3, 2016 and June 30, 2017 at 13 sites in the US and Europe

Pre-assignment

Screening details:

Participants were recruited between June 3, 2016 and June 30, 2017 at 13 sites in the US and Europe

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor

Blinding implementation details:

Only pharmacist and administrator were unblinded onsite. These personnel were not involved with study assessments. An unblinded CRA monitored the site data.

Arms

Are arms mutually exclusive?	Yes
Arm title	EXPAREL 133 mg

Arm description:

10 mL EXPAREL (bupivacaine liposome injectable suspension) expanded with 10 mL normal saline as single-injection femoral nerve block ≥ 1 h preoperatively

Arm type	Experimental
Investigational medicinal product name	EXPAREL
Investigational medicinal product code	
Other name	bupivacaine liposome injectable suspension
Pharmaceutical forms	Suspension for injection
Routes of administration	Not mentioned

Dosage and administration details:

10 mL EXPAREL (bupivacaine liposome injectable suspension) expanded with 10 mL normal saline as single-injection femoral nerve block ≥ 1 h preoperatively

Arm title	EXPAREL 266 mg
------------------	----------------

Arm description:

20 mL EXPAREL (bupivacaine liposome injectable suspension) as single-injection femoral nerve block ≥ 1 h preoperatively

Arm type	Experimental
Investigational medicinal product name	EXPAREL
Investigational medicinal product code	
Other name	bupivacaine liposome injectable suspension
Pharmaceutical forms	Suspension for injection
Routes of administration	Other use

Dosage and administration details:

20 mL EXPAREL (bupivacaine liposome injectable suspension) as single-injection femoral nerve block ≥ 1 h preoperatively

Arm title	Placebo
------------------	---------

Arm description:

American Society of Anesthesiologists classification (ASA)			
American Society of Anesthesiologists (ASA) classification was determined by physicians using the ASA Physical Status Classification System which assesses the patient's pre-anesthesia medical co-morbidities. ASA 1 patients would be considered a normal, healthy patient. ASA 2 is a patient with mild systemic disease (eg, smoker, well controlled diabetes or high blood pressure (HBP)). ASA 3 is a patient with severe systemic disease (eg poorly controlled diabetes or HBP). ASA 4 is a patient with severe systemic disease that is a constant threat to life (eg, recent myocardial infarction, stroke).

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From screening to day 29 postsurgery

Adverse event reporting additional description:

adverse event (AE) was defined as any untoward medical occurrence associated with the use of a drug in humans whether or not considered drug-related. An AE could therefore have been any unfavorable and unintended sign (eg, abnormal laboratory finding), symptom, or disease temporally associated with the use of a drug without judgment about causality

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
15 February 2016	Amendment 1
28 September 2016	Amendment 2
14 November 2016	Amendment 3

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

none

Notes:
