Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	28 October 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	14 February 2020
Global end of trial reached?	Yes
Global end of trial date	14 February 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study is to compare the changes in bone mineral density (BMD) over 96 weeks in women who switch from Truvada/NNRTI to Triumeq, as compared to women who stay on their current Truvada/NNRTI regimen.

Protection of trial subjects:

Patients are free to withdraw consent for study treatment and/or consent to participate in the study at any time and without the prejudice to further treatment. Patients who withdraw from study treatment, but are willing to continue to participate in the follow-up visits, should be followed according to the procedures outlined in the protocol.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 May 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 91
Worldwide total number of subjects	91
EEA total number of subjects	91

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	87
From 65 to 84 years	4
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

HIV positive women ≥ 40 years on stable antiretroviral therapy consisting of TDF/ FTC (or 3TC) plus an NNRTI with HIV RNA < 50 copies/mL for at least 12 months will be eligible to enter the trial.

Pre-assignment period milestones

Number of subjects started	102 ^[1]
Number of subjects completed	91

Pre-assignment subject non-completion reasons

Reason: Number of subjects	screen fail: 11
----------------------------	-----------------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: The pre-assignment period includes participants who were screened and then not enrolled into the study

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Switch ABC/3TC/DTG
------------------	--------------------

Arm description:

Switch to Triumeq (abacavir 600 mg, lamivudine 300 mg, dolutegravir 50 mg), one tablet daily

Arm type	Experimental
Investigational medicinal product name	Triumeq
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: 600mg abacavir, 300mg lamivudine, 50mg dolutegravir

Daily dose: 1 tablet

Duration of use: 96 weeks

Arm title	Ongoing TDF/FTC/NNRTI
------------------	-----------------------

Arm description:

Participants who are randomised to arm 2 will continue on their current antiretroviral therapy. This will contain tenofovir disoproxil fumarate, emtricitabine or lamivudine, and an NNRTI (nevirapine, efavirenz, etravirine, rilpivirine), administered singularly or as a fixed dose combination. Fixed dose combinations include Atripla, Eviplera or Truvada plus an NNRTI.

Arm type	Active comparator
----------	-------------------

Investigational medicinal product name	Tenofovir disoproxil fumarate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: 245mg tenofovir disoproxil fumarate

Daily dose: 1 tablet once daily

Duration of use: 96 weeks

Investigational medicinal product name	Lamivudine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: 150mg lamivudine or 300mg lamivudine

Daily dose: 300mg daily

Duration of use: 96 weeks

Investigational medicinal product name	Truvada
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: 245mg tenofovir disoproxil fumarate, 200mg emtricitabine

Daily dose: 1 tablet

Duration of use: 96 weeks

Investigational medicinal product name	Atripla
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: Efavirenz 600mg, emtricitabine 200mg, tenofovir disoproxil fumarate 245mg

Daily dose: 1 tablet

Duration of use: 96 weeks

Investigational medicinal product name	Eviplera
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: Rilpivirine 25mg, emtricitabine 200mg, tenofovir disoproxil fumarate 245mg

Daily dose: 1 tablet

Duration of use: 96 weeks

Investigational medicinal product name	Efavirenz
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule, Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: Efavirenz 600mg tablet or 200mg capsule
Daily dose: 600mg
Duration of use: 96 weeks

Investigational medicinal product name	Nevirapine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: Nevirapine 400mg prolonged release (PR) or 200mg tablet
Daily dose: 400mg
Duration of use: 96 weeks

Investigational medicinal product name	Etravirine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: 200mg
Daily dose: Etravirine 400mg
Duration of use: 96 weeks

Investigational medicinal product name	Rilpivirine
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Unit strength: Rilpivirine 25mg
Daily dose: 25mg
Duration of use: 96 weeks
