

Clinical trial results:

Immunogenicity and Safety of the Aventis Pasteur DTacP-IPV//PRP~T Combined Vaccine (PENTAXIM™), Given as a Three-Dose Primary Vaccination at 6, 10, and 14 Weeks of Age and Followed by a Booster Dose at 18 to 19 Months of Age in Healthy Infants in South Africa. All Infants Receiving Hepatitis B Monovalent Vaccine at 6, 10 and 14 Weeks of Age.

Summary

EudraCT number	2015-005354-35
Trial protocol	Outside EU/EEA
Global end of trial date	15 February 2008

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	Yes
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 February 2008
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 February 2008
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Immunogenicity:

-To assess the seroprotection rates (Diphtheria, Tetanus, polio types 1, 2 and 3, and Polyrribosyl Ribitol Phosphate conjugated to Tetanus protein [PRP]) and seroconversion rates (Pertussis toxoid, Filamentous Hemagglutinin [FHA]) of Sanofi Pasteur's DTacP-IPV//PRP~T combined vaccine, one month after the three-dose primary vaccination.

-To describe the immunogenicity of the study combined vaccine (PENTAXIM™) one month after the three-dose primary vaccination (Visit 5), prior to the booster dose (at Visit 6) and one month after the booster dose (Visit 7).

-To describe the immunogenicity of the recombinant hepatitis B vaccine antigen one month after the three-dose primary vaccination (Visit 5) and approximately 14 to 15 months later (Visit 6).

Safety:

-To describe the safety after each dose of the study combined vaccine (PENTAXIM™).

-To describe the safety after each dose of recombinant hepatitis B vaccine.

Protection of trial subjects:

Only subjects that met all the study inclusion and none of the exclusion criteria were vaccinated in the study. Vaccinations were performed by qualified and trained study personnel. Subjects with allergy to any of the vaccine components were not vaccinated. After vaccination, subjects were also kept under clinical observation for 30 minutes to ensure their safety. Appropriate medical equipment was also available on site in case of any immediate allergic reactions.

Background therapy:

Not applicable

Evidence for comparator:

Not applicable

Actual start date of recruitment	18 October 2005
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	South Africa: 212
Worldwide total number of subjects	212
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	212
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Study subjects were enrolled from 18 October 2005 to 01 July 2006 at 1 clinic center in South Africa.

Pre-assignment

Screening details:

A total of 212 subjects who met all inclusion and none of the exclusion criteria were enrolled and vaccinated in the study.

Period 1

Period 1 title	Primary Phase
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Not applicable

Arms

Arm title	Study group
-----------	-------------

Arm description:

Subjects received DTacP-IPV//PRP-T vaccine (PENTAXIM™) at 6, 10, and 14 weeks of age and hepatitis B vaccine (HEBERBIOVAC®) at 6, 10, and 14 weeks of age.

Arm type	Experimental
Investigational medicinal product name	DTacP-IPV//PRP~T combined vaccine (PENTAXIM™)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

0.5 mL, intramuscular into the right anterolateral external aspect of the upper thigh, 1 injection each at 6, 10, and 14 weeks of age.

Investigational medicinal product name	Hepatitis B vaccine (HEBERBIOVAC HB®)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

0.5 mL, intramuscular into the left anterolateral external aspect of the upper thigh, 1 injection each at 6, 10, and 14 weeks of age.

Number of subjects in period 1	Study group
Started	212
Completed	207
Not completed	5
Serious adverse events	1
Lost to follow-up	1

Protocol deviation	3
--------------------	---

Period 2

Period 2 title	Booster Phase
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded
Blinding implementation details:	
Not applicable	

Arms

Arm title	Study group
Arm description:	
Subjects received a booster dose of DTacP-IPV//PRP~T vaccine at 18 to 19 months of age.	
Arm type	Experimental
Investigational medicinal product name	DTacP-IPV//PRP~T combined vaccine (PENTAXIM™)
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for suspension for injection
Routes of administration	Intramuscular use

Dosage and administration details:

0.5 mL, intramuscular into the right anterolateral external aspect of the upper thigh, 1 injection each at 6, 10, and 14 weeks of age.

Number of subjects in period 2	Study group
Started	207
Completed	179
Not completed	29
Consent withdrawn by subject	9
Serious adverse events	2
Lost to follow-up	15
Protocol deviation	3
Joined	1
Withdrawn from study and re-included for booster	1

Subject analysis sets

Subject analysis set title	Immunogenicity Analysis Set Post-dose 3
Subject analysis set type	Sub-group analysis

Subject analysis set description:

The Immunogenicity Analysis Set was defined as all infants who received DTacP-IPV//PRP~T at Visit 02 (Day 42), Visit 03 (Day 70), and Visit 04 (Day 98) without any delays, had a blood sample performed at Visit 05 (Day 126; blood sample 02) without any delays, and had an antibody titration available in blood sample 02.

Subject analysis set title	Immunogenicity Analysis Set Pre-Booster
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Immunogenicity Analysis Set Pre-Booster was defined as all subjects who had received the DTacP-IPV//PRP-T combined vaccine on Visit 02 (Day 42), Visit 03 (Day 70), and Visit 04 (Day 98), had a blood sample performed on Visit 06 (Visit 05 + 14-15 months; blood sample 03), age at blood sample on Visit 06 (blood sample 03) less than 17 months (no older than 20 months), and had an antibody titer available for blood sample 03.

Subject analysis set title	Immunogenicity Analysis Set Post-Booster
Subject analysis set type	Sub-group analysis

Subject analysis set description:

Immunogenicity Analysis Set Post-Booster was defined as all subjects who received the vaccination with DTacP-IPV//PRP~T combined vaccine on Visit 02 (Day 42), Visit 03 (Day 70), Visit 04 (Day 98) or Visit 06 (Visit 05 + 14-15 months) who were < 17 months (no older than 20 months) on Visit 06, had a blood sample performed on Visit 07 (Visit 06 + 28-42 days) without any delays, and had an antibody titer available for blood sample 04.

Primary: Percentage of Subjects with Seroconversion/Seroconversion to Vaccine Antigens One Month After A Three Dose Primary Vaccination with DTacP-IPV//PRP~T Combined Vaccine (PENTAXIM™) Concomitantly with Hepatitis B Vaccine (HEBERBIOVAC™)

End point title	Percentage of Subjects with Seroconversion/Seroconversion to Vaccine Antigens One Month After A Three Dose Primary Vaccination with DTacP-IPV// PRP~T Combined Vaccine (PENTAXIM™) Concomitantly with Hepatitis B Vaccine (HEBERBIOVAC™) ^[1]
End point description: Anti-Diphtheria, Anti-Tetanus, Anti-Pertussis toxoid, Anti-Filamentous hemagglutinin (FHA) were assessed by enzyme-linked immunosorbent assay (ELISA). Anti-Polio types 1, 2, and 3 were assessed by seroneutralization. Anti-Polyribosyl Ribitol Phosphate conjugated to Tetanus protein (PRP) was assessed by Farr type radioimmunoassay and Anti-Hepatitis B surface antigen were assessed by radioimmunoassay. Seroconversion for Anti-Diphtheria and Anti-Tetanus was defined as antibody titers ≥ 0.1 IU/mL, ≥ 8 (dil) for Anti-Polio types 1, 2, and 3, ≥ 0.15 µg/mL for Anti-PRP, and ≥ 10 mIU/mL for Hepatitis B. Seroconversion for Anti-Pertussis toxoid and Anti-FHA was defined as antibody titers ≥ 2 -fold and ≥ 4 -fold increase EU/mL.	
End point type	Primary
End point timeframe: 1 month post-dose 3 of primary vaccination	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Descriptive analyses were performed based on the study group and the study vaccine administered for this outcome.

Statistical analyses

No statistical analyses for this end point

Other pre-specified: Percentage of Subjects with Solicited Injection-site and Systemic Reactions After A Booster with DTacP-IPV//PRP~T Vaccine (PENTAXIM) After a Primary Series with DTacP-IPV//PRP~T Vaccine (PENTAXIM) Concomitantly with Hepatitis B (HEBERBIOVAC)

End point title	Percentage of Subjects with Solicited Injection-site and Systemic Reactions After A Booster with DTacP-IPV//PRP~T Vaccine (PENTAXIM) After a Primary Series with DTacP-IPV//PRP~T Vaccine (PENTAXIM) Concomitantly with Hepatitis B (HEBERBIOVAC)
-----------------	---

End point description:

Solicited injection site reactions: Tenderness, Erythema, and Swelling. Solicited systemic reactions: Fever, Vomiting, Crying abnormal, Drowsiness, Appetite lost, and Irritability.

Grade 3 solicited injection site reactions: Tenderness, Cries when injected limb is moved or the movement of the injected limb is reduced; Erythema and Swelling, ≥ 5 cm. Grade 3 systemic reactions: Fever, $\geq 39.0^{\circ}\text{C}$; Vomiting, ≥ 6 episodes per 24 hours or requiring parenteral hydration; Crying abnormal, > 3 hours; Drowsiness, Sleeping most of the time or difficult to wake up; Appetite lost, Refuses ≥ 3 feeds or refuses most feeds; Irritability, Inconsolable.

End point type	Other pre-specified
----------------	---------------------

End point timeframe:

Post-booster vaccination

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse event data were collected from Day 0 post-vaccination up to 1 month post-booster vaccination.

Assessment type	Non-systematic

Reporting groups

Reporting group title	Study group
-----------------------	-------------

Reporting group description:

Subjects received DTaP-IPV//PRP-T vaccine (PENTAXIM™) at 6, 10, and 14 weeks of age and hepatitis B vaccine (HEBERBIOVAC®) at 6, 10, and 14 weeks of age.

Serious adverse events	Study group		
Total subjects affected by serious adverse events			
subjects affected / exposed	25 / 212 (11.79%)		
number of deaths (all causes)	2		
number of deaths resulting from adverse events	0		
Injury, poisoning and procedural complications			
Dehydration with acidosis herbal intoxication			
subjects affected / exposed	1 / 212 (0.47%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Nervous system disorders			
Epilepsy			
subjects affected / exposed	1 / 212 (0.47%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Gastrointestinal disorders			
Gastrooesophageal reflux			
subjects affected / exposed	1 / 212 (0.47%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Infections and infestations			
Gastroenteritis			

subjects affected / exposed	6 / 212 (2.83%)			
occurrences causally related to treatment / all	0 / 7			
deaths causally related to treatment / all	0 / 2			
Bronchopneumonia				
subjects affected / exposed	7 / 212 (3.30%)			
occurrences causally related to treatment / all	0 / 7			
deaths causally related to treatment / all	0 / 0			
Viral bronchiolitis				
subjects affected / exposed	1 / 212 (0.47%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Bronchiolitis				
subjects affected / exposed	7 / 212 (3.30%)			
occurrences causally related to treatment / all	0 / 10			
deaths causally related to treatment / all	0 / 0			
Pneumonia				
subjects affected / exposed	3 / 212 (1.42%)			
occurrences causally related to treatment / all	0 / 3			
deaths causally related to treatment / all	0 / 0			
Acute gastroenteritis				
subjects affected / exposed	1 / 212 (0.47%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Bilateral bronchopneumonia				
subjects affected / exposed	1 / 212 (0.47%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Streptococcus viridans septicemia				
subjects affected / exposed	1 / 212 (0.47%)			
occurrences causally related to treatment / all	0 / 1			
deaths causally related to treatment / all	0 / 0			
Pulmonary tuberculosis				

subjects affected / exposed	1 / 212 (0.47%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Study group		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	145 / 212 (68.40%)		
Nervous system disorders			
Drowsiness			
alternative assessment type: Systematic			
subjects affected / exposed	102 / 212 (48.11%)		
occurrences (all)	102		
General disorders and administration site conditions			
Injection site Tenderness			
alternative assessment type: Systematic			
subjects affected / exposed	145 / 212 (68.40%)		
occurrences (all)	145		
Injection site Erythema			
alternative assessment type: Systematic			
subjects affected / exposed	96 / 212 (45.28%)		
occurrences (all)	96		
Injection site Swelling			
alternative assessment type: Systematic			
subjects affected / exposed	89 / 212 (41.98%)		
occurrences (all)	89		
Fever			
alternative assessment type: Systematic			
subjects affected / exposed	76 / 212 (35.85%)		
occurrences (all)	76		
Gastrointestinal disorders			
Diarrhoea			
subjects affected / exposed	14 / 212 (6.60%)		
occurrences (all)	14		

Vomiting alternative assessment type: Systematic subjects affected / exposed occurrences (all)	91 / 212 (42.92%) 91		
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all) Nasal congestion subjects affected / exposed occurrences (all)	21 / 212 (9.91%) 21 13 / 212 (6.13%) 13		
Skin and subcutaneous tissue disorders Dermatitis subjects affected / exposed occurrences (all)	15 / 212 (7.08%) 15		
Psychiatric disorders Crying abnormal alternative assessment type: Systematic subjects affected / exposed occurrences (all) Irritability alternative assessment type: Systematic subjects affected / exposed occurrences (all)	137 / 212 (64.62%) 137 118 / 212 (55.66%) 118		
Infections and infestations Gastroenteritis subjects affected / exposed occurrences (all) Rhinitis subjects affected / exposed occurrences (all) Upper respiratory tract infection subjects affected / exposed occurrences (all)	19 / 212 (8.96%) 19 27 / 212 (12.74%) 27 81 / 212 (38.21%) 81		
Metabolism and nutrition disorders			

Appetite lost			
alternative assessment type: Systematic			
subjects affected / exposed	76 / 212 (35.85%)		
occurrences (all)	76		

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
05 January 2006	Informed investigators of the protocol to replace screening failures

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
