

Clinical trial results:

An open label phase II study of Sirolimus in patients with segmental overgrowth syndrome

Summary

EudraCT number	2015-005416-15
Trial protocol	DE
Global end of trial date	19 July 2023

Results information

Result version number	v1 (current)
This version publication date	07 February 2025
First version publication date	07 February 2025

Trial information

Trial identification

Sponsor protocol code	SIPA-SOS
-----------------------	----------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-
Other trial identifiers	DRKS: DRKS00010085

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 August 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	19 July 2023
Global end of trial reached?	Yes
Global end of trial date	19 July 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the effect of sirolimus to reduce the size of defined target lesions in patients with segmental overgrowth syndromes.

Protection of trial subjects:

Before enrolment in the clinical trial, the patient/legal representative was informed that participation in the clinical trial is voluntary and that he/she may withdraw from the clinical trial at any time without having to give reasons and without penalty or loss of benefits to which the patient is otherwise entitled. The treating physician provided the patient/legal representative with information about the treatment methods and the possible risks involved. At the same time, the nature, significance, implications, expected benefits and potential risks of the clinical trial and alternative treatments were explained to the patient/legal representative. During the informed consent discussion, the patient was also informed about the insurance cover that exists and the insured's obligations. The patient/legal representative was given ample time and opportunity to obtain answers to any open questions. All questions relating to the clinical trial should be answered to the satisfaction of the patient and/or his/her legal representative. In addition, the patient/legal representative was given a patient information sheet that contains all the important information in writing.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	20 October 2021
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 18
Worldwide total number of subjects	18
EEA total number of subjects	18

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	7
Adolescents (12-17 years)	5
Adults (18-64 years)	6
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details: -

Pre-assignment period milestones

Number of subjects started	18
Number of subjects completed	18

Period 1

Period 1 title	Overall (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Not applicable, as this was an open-label study.

Arms

Arm title	Sirolimus
Arm description: -	
Arm type	Experimental
Investigational medicinal product name	Sirolimus
Investigational medicinal product code	
Other name	Rapamune
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Strength: 0.5 mg, 1 mg, 1 mg/mL; Dose: Recommended starting dose of sirolimus: 1.6 mg/m² (divided in two doses if patients age < 16 years)

Number of subjects in period 1	Sirolimus
Started	18
Completed	14
Not completed	4
Switch to other clinical trial, week 39	1
Lack of compliance, week 13	1
Progressive complaints after Sirolimus cessation	2

Baseline characteristics

Reporting groups

Primary: Best response: Complete Remission (CR) or Partial Remission (PR)

End point title	Best response: Complete Remission (CR) or Partial Remission (PR) ^[1]
-----------------	---------------------------------------------------------------------------------

End point description:

End point type	Primary
----------------	---------

End point timeframe:

until 6 months after baseline (start of study therapy)

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: A statistical test of the null hypothesis that the probability of best response CR or PR until 6 months after start of treatment was $\leq 2\%$ was tested at a one-sided sign. level of 5%. This null hypothesis can be rejected, if the number of patients with a best response CR or PR until 6 months after start of treatment is ≥ 2 out of 18 patients. As none of the 18 patients had CR or PR at month 6 after start of treatment, according to this decision rule, sirolimus cannot be considered as effective.

End point values	Sirolimus

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 November 2020	<p>CTP version V5.0:</p> <p>The main changes of the substantial amendment applied to the following items:</p> <ul style="list-style-type: none">• Primary purpose was a better definition of inclusion/exclusion criteria, objectives and endpoints• Most importantly, stable disease (SD) has been removed as successful treatment outcome, obviating the need for the observation period before therapy start• There were administrative modifications (including change of the coordinating investigator and project manager, redistribution of responsibilities for the conduct of the study, update of addresses, introduction of data monitoring committee (DMC), some wording specifications, and use of the CTCAE version 5.0 instead off 4.0

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
