

Clinical trial results:

A 24 week treatment, multicenter, randomized, double blinded, double dummy, parallel-group, clinical trial evaluating the efficacy and safety of acclidinium bromide 400 g/formoterol fumarate 12 g fixed-dose combination BID compared with each monotherapy (acclidinium bromide 400 g BID and formoterol fumarate 12 g BID) and tiotropium 18 g QD when administered to subjects with stable chronic obstructive pulmonary disease

Summary

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 June 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	08 June 2017
Global end of trial reached?	Yes
Global end of trial date	08 June 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

For United States (US): To assess the bronchodilatory effect of Acclidinium bromide/Formoterol fumarate (AB/FF) 400/12 µg compared to each individual component when administered twice daily (BID) via inhalation to chronic obstructive pulmonary disease (COPD) subjects. For Market Access: To assess the non-inferior bronchodilation of AB 400 µg BID as compared to Tiotropium (TIO) 18 µg once daily (QD) in COPD subjects.

Protection of trial subjects:

This study was performed in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with International Council for Harmonisation /Good Clinical Practice (GCP), applicable regulatory requirements and the AstraZeneca policy on Bioethics. Each subject was given full and adequate oral and written information about the nature, purpose, possible risk and benefit of the study. Each subject was notified that they were free to discontinue from the study at any time and were given the opportunity to ask questions and allowed time to consider the information provided. Each subject provided signed and dated ICF before conducting any procedure specifically for the study. A copy of the signed informed consent form (ICF) was given to the subject. Any incentives for subjects who participated in the study as well as any provisions for subjects harmed as a consequence of study participation were described in the ICF that was approved by an Ethics Committee.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	05 July 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 699
Country: Number of subjects enrolled	Germany: 349
Country: Number of subjects enrolled	Poland: 124
Country: Number of subjects enrolled	Hungary: 116
Country: Number of subjects enrolled	Bulgaria: 106
Country: Number of subjects enrolled	Ukraine: 110
Country: Number of subjects enrolled	United Kingdom: 34
Country: Number of subjects enrolled	Czech Republic: 32
Country: Number of subjects enrolled	Spain: 7

Country: Number of subjects enrolled	Israel: 17
Worldwide total number of subjects	1594
EEA total number of subjects	768

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	795
From 65 to 84 years	793
85 years and over	6

Subject disposition

Recruitment

Recruitment details:

Study was conducted on subjects with stable COPD, in 11 countries: United States (US), Germany, Poland, Hungary, Bulgaria, Ukraine, United Kingdom (UK), Czech Republic, Spain, Israel & Russia (was not finally started).

Pre-assignment

Screening details:

Eligible subjects signed ICF; entered screening period (Run-in; 14 ± 3 days), inclusion/exclusion criteria were checked by medical & COPD history, physical examination, blood pressure, electrocardiogram, laboratory tests, concomitant drugs & COPD Assessment Test [CAT] & post-bronchodilator forced expiratory volume in 1 second [FEV1]

Period 1

Period 1 title	Period 1: Overall Study
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	No
Arm title	Acclidinium bromide (AB)/Formoterol fumarate (FF) 400/12 µg

Arm description:

Randomized subjects received AB 400 µg/FF 12 µg oral inhalation powder twice daily (BID) via dry powder inhaler (DPI).

Arm type	Experimental
Investigational medicinal product name	Acclidinium bromide/Formoterol fumarate
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

AB/FF 400/12 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	AB 400 µg
------------------	-----------

Arm description:

Randomized subjects received AB 400 µg oral inhalation powder BID via DPI.

Arm type	Experimental
Investigational medicinal product name	Acclidinium bromide
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

AB 400 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	FF 12 µg
------------------	----------

Arm description:

Randomized subjects received FF 12 µg oral inhalation powder BID via DPI.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Formoterol fumarate
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

FF 12 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	Tiotropium (TIO) 18 µg
------------------	------------------------

Arm description:

Randomized subjects received TIO 18 µg oral inhalation powder in capsule BID via DPI.

Arm type	Experimental
Investigational medicinal product name	Tiotropium
Investigational medicinal product code	
Other name	HandiHaler® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

TIO 18 µg inhalation powder QD (morning) via DPI for 24 weeks

Investigational medicinal product name	Tiotropium
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

TIO 18 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Number of subjects in period 1	Aclidinium bromide (AB)/Formoterol fumarate (FF) 400/12 µg	AB 400 µg	FF 12 µg
Started	317	478	320
Completed	279	405	267
Not completed	38	73	53

Lack of efficacy	20

Period 2

Period 2 title	Intent-to-treat (ITT) population
Is this the baseline period?	Yes ^[1]
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	AB/FF 400/12 µg

Arm description:

Randomized subjects received orally AB 400 µg/FF 12 µg inhalation powder twice daily (BID) via dry powder inhaler (DPI).

Arm type	Experimental
Investigational medicinal product name	Acclidinium bromide/Formoterol fumarate
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

AB/FF 400/12 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	AB 400 µg
------------------	-----------

Arm description:

Randomized subjects received AB 400 µg oral inhalation powder BID via DPI.

Arm type	Experimental
Investigational medicinal product name	Acclidinium bromide
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

AB 400 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	FF 12 µg
------------------	----------

Arm description:

Randomized subjects received FF 12 µg oral inhalation powder BID via DPI.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Formoterol fumarate
Investigational medicinal product code	
Other name	Pressair®/Genuair® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

FF 12 µg inhalation powder twice daily (morning and evening) via DPI for 24 weeks

Arm title	TIO 18 µg
------------------	-----------

Arm description:

Randomized subjects received orally TIO 18 µg inhalation powder in capsule QD via DPI.

Arm type	Experimental
Investigational medicinal product name	Tiotropium
Investigational medicinal product code	
Other name	HandiHaler® Dry Powder Inhaler
Pharmaceutical forms	Inhalation powder
Routes of administration	Oral use

Dosage and administration details:

TIO 18 µg inhalation powder QD (morning) via DPI for 24 weeks

Notes:

[1] - Period 1 is not the baseline period. It is expected that period 1 will be the baseline period.

Justification: Subject disposition (Period 1) data were presented for the randomized population (N = 1594). The baseline characteristics and endpoints data were presented for the safety population and Intent-to-treat population (ITT; Period 2), respectively; in these two population sets, the number of subjects (N) was 1583. Hence, period 2 (ITT) was mentioned as the baseline period.

Number of subjects in period 2^[2]	AB/FF 400/12 µg	AB 400 µg	FF 12 µg
Started	314	475	319
Completed	314	475	319

Number of subjects in period 2^[2]	TIO 18 µg
Started	475
Completed	475

Notes:

[2] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: All screened subjects were mentioned in the worldwide population of the trial whereas subjects who received at least 1 dose of the investigational product were mentioned in the ITT population (baseline period). Non-eligible subjects were not randomized in the study.

Secondary: Responder (number [%] of subjects) analysis of St. George's Respiratory Questionnaire (SGRQ) total score with AB/FF 400/12 µg versus AB 400 µg and FF 12 µg.

End point title	Responder (number [%] of subjects) analysis of St. George's Respiratory Questionnaire (SGRQ) total score with AB/FF 400/12 µg versus AB 400 µg and FF 12 µg.
-----------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------

End point description:

SGRQ was a standardized self-completed tool used to measure impaired health and perceived well-being ("quality of life") in respiratory diseases. The questionnaire contained 50 items divided into 3 (symptoms, activity and impacts) dimensions. Each of the 3 dimensions of the questionnaire was scored separately in the range from 0 to 100% (score 0 - no impairment and higher score - poorer health). A summary score utilized responses of all items as the total SGRQ score. SGRQ responders were those with a decrease in SGRQ total score of at least 4 units (criterion for minimal meaningful improvement) from baseline.

Statistical analyses

Statistical analysis title	AB/FF 400/12 µg versus AB 400 µg
-----------------------------------	----------------------------------

Statistical analysis description:

Number of subjects analyzed were 314 in AB/FF 400/12 µg arm and 475 in AB 400 µg arm.

Comparison groups	AB/FF 400/12 µg v AB 400 µg
Number of subjects included in analysis	789
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.8714
Method	Logistic random-effect model
Parameter estimate	Odds ratio
Point estimate	0.96

Confidence interval	
level	95 %
sides	2-sided
lower limit	0.61
upper limit	1.51

Statistical analysis title	AB/FF 400/12 µg versus FF 12 µg
Statistical analysis description:	
Number of subjects analyzed were 314 in AB/FF 400/12 µg arm and 319 in AB 400 µg arm.	
Comparison groups	AB/FF 400/12 µg v FF 12 µg
Number of subjects included in analysis	633
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.8873
Method	Logistic random-effect model
Parameter estimate	Odds ratio
Point estimate	0.97
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.59
upper limit	1.58

Adverse events

Adverse events information

Timeframe for reporting adverse events:

From time of signature of the ICF throughout the treatment period and including the follow-up period (2 weeks after the last study drug administration)

Adverse event reporting additional description:

An adverse event – An undesirable medical condition/deterioration of pre-existing medical condition following/during exposure to pharmaceutical product, whether/not considered causally related to product. An undesirable medical condition - symptoms (e.g. nausea), signs (e.g. tachycardia)/ abnormal investigation results (e.g. laboratory findings)

Assessment type	Systematic

Reporting groups

Reporting group title	AB/FF 400/12 µg
-----------------------	-----------------

Reporting group description:

Randomized subjects received orally AB 400 µg/FF 12 µg inhalation powder BID via DPI.

Reporting group title	AB 400 µg
-----------------------	-----------

Reporting group description:

Randomized subjects received AB 400 µg oral inhalation powder BID via DPI.

Reporting group title	FF 12 µg
-----------------------	----------

Reporting group description:

Randomized subjects received orally FF 12 µg inhalation powder BID via DPI.

Reporting group title	TIO 18 µg
-----------------------	-----------

Reporting group description:

Randomized subjects received orally TIO 18 µg inhalation powder in capsule QD via DPI.

Serious adverse events	AB/FF 400/12 µg	AB 400 µg	FF 12 µg
Total subjects affected by serious adverse events			
subjects affected / exposed	23 / 314 (7.32%)	41 / 475 (8.63%)	22 / 319 (6.90%)
number of deaths (all causes)	1	1	4
number of deaths resulting from adverse events	0	0	0
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
B-cell lymphoma
