Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	08 May 2017
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	08 May 2017
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The main purpose of this study is to investigate the safety and efficacy of the study drug solanezumab in participants with prodromal Alzheimer's disease (AD).

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 June 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 1
Country: Number of subjects enrolled	Japan: 2
Country: Number of subjects enrolled	Poland: 2
Country: Number of subjects enrolled	United States: 21
Worldwide total number of subjects	26
EEA total number of subjects	2

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	2
From 65 to 84 years	24

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Participants were randomized by site and by use of florbetapir positron emission tomography (PET) scanning or cerebrospinal fluid (CSF) for study eligibility.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer

Arms

Are arms mutually exclusive?	Yes
Arm title	Solanezumab

Arm description:

Solanezumab given intravenously (IV) once every 4 weeks for up to 2 years.

Arm type	Experimental
Investigational medicinal product name	Solanezumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Solanezumab 400 milligram (mg) given IV once every 4 weeks for up to 2 years.

Arm title	Placebo
------------------	---------

Arm description:

Placebo given IV once every 4 weeks for up to 2 years.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Placebo given IV once every 4 weeks for up to 2 years.

Number of subjects in period 1	Solanezumab	Placebo
Started	13	13
Completed	0	0
Not completed	13	13
Consent withdrawn by subject	1	-

Terminated by sponsor	12	13

End points

End points reporting groups

Reporting group title	Solanezumab
Reporting group description: Solanezumab given intravenously (IV) once every 4 weeks for up to 2 years.	
Reporting group title	Placebo
Reporting group description: Placebo given IV once every 4 weeks for up to 2 years.	

Primary: Change from Baseline in Alzheimer's Disease Assessment Scale- Cognitive Subscale (ADAS-Cog14) Score

End point title	Change from Baseline in Alzheimer's Disease Assessment Scale- Cognitive Subscale (ADAS-Cog14) Score ^[1]
End point description: ADAS-Cog14 is ADAS-Cog11 augmented with orientation, verbal memory, language, praxis, delayed free recall, digit cancellation, and maze-completion measures. The ADAS-Cog14 scale ranges from 0 to 90. Higher scores indicate greater disease severity.	
End point type	Primary
End point timeframe: Baseline, 24 Months	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Zero participants were analyzed due to trial termination. Therefore, no inferential statistics were planned or conducted for this endpoint.

End point values	Solanezumab	Placebo

Secondary: Change from Baseline on the Functional Activities Questionnaire (FAQ)

End point title	Change from Baseline on the Functional Activities Questionnaire (FAQ)
-----------------	---

End point description:

FAQ is a 10-item, caregiver-based questionnaire and was administered to the study partner who was asked to rate the participant's ability to perform a variety of activities ranging from Writing checks, Assembling tax records, shopping, playing games, food preparation, traveling, keeping appointments, Traveling out of neighborhood, keeping track of current events and understanding media. FAQ total score was calculated by adding the scores from each of the 10 items. Each activity is rated on a scale from 0 to 3 (Never did and would have difficulty now = 1; Never did [the activity] but could do now = 0; Normal = 0; Has difficulty but does by self = 1; Requires assistance = 2; Dependent = 3). The maximum FAQ total score is 30, with higher scores indicating greater impairment.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

The study was terminated due to insufficient scientific evidence that solanezumab would likely demonstrate a meaningful benefit to participants with prodromal AD as defined by the study protocol.

Notes:
