Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000783-PIP01-09
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 January 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	12 January 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The purpose of this study is to evaluate the safety, efficacy, pharmacokinetics and pharmacodynamics of the study drug dulaglutide compared to placebo in pediatric participants with type 2 diabetes. The study duration is approximately 60 weeks.

Protection of trial subjects:

This study was conducted in accordance with International Conference on Harmonization (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy:

Background therapy included diet and exercise with or without metformin and/or basal insulin.

Evidence for comparator: -

Actual start date of recruitment	29 December 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Brazil: 16
Country: Number of subjects enrolled	France: 4
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	India: 11
Country: Number of subjects enrolled	Mexico: 36
Country: Number of subjects enrolled	Puerto Rico: 2
Country: Number of subjects enrolled	Saudi Arabia: 3
Country: Number of subjects enrolled	Turkey: 3
Country: Number of subjects enrolled	United Kingdom: 5
Country: Number of subjects enrolled	United States: 71
Worldwide total number of subjects	154
EEA total number of subjects	7

Notes:

Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	15
Adolescents (12-17 years)	139
Adults (18-64 years)	0
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were randomized at 46 centers in 9 countries.

Pre-assignment

Screening details:

Not Applicable.

Period 1

Period 1 title	Double-Blind Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants received placebo administered subcutaneously (SC) for 26 weeks during the double-blind period.

Arm type	Experimental
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo administered SC for 26 weeks during the double-blind period.

Arm title	0.75 milligram (mg) Dulaglutide
------------------	---------------------------------

Arm description:

Participants received 0.75 mg/week dulaglutide administered SC for 26 weeks during the double-blind period.

Arm type	Experimental
Investigational medicinal product name	Dulaglutide
Investigational medicinal product code	LY2189265
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

0.75 mg/week dulaglutide administered SC for 26 weeks during the double-blind period.

Arm title	1.5 mg Dulaglutide
------------------	--------------------

Arm description:

Participants received 1.5 mg/week dulaglutide administered SC for 26 weeks during the double-blind period.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Dulaglutide
Investigational medicinal product code	LY2189265
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants assigned to the dulaglutide 1.5-mg group were administered the 0.75-mg/week dose for the first 4 weeks and were then escalated to the 1.5-mg/week dose if they tolerated the 0.75-mg dose based on investigator assessment

Number of subjects in period 1	Placebo	0.75 milligram (mg) Dulaglutide	1.5 mg Dulaglutide
Started	51	51	52
Received at Least 1 Dose of Study Drug	51	51	52
Completed	47	49	50
Not completed	4	2	2
Physician decision	1	-	-
Consent withdrawn by subject	1	1	-
Adverse event, non-fatal	1	-	1
Withdrawal by Parent or Guardian	-	-	1
Lost to follow-up	-	1	-
Protocol deviation	1	-	-

Period 2

Period 2 title	Open Label Extension (OLE)
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo/0.75 milligram (mg) Dulaglutide

Arm description:

Participants received placebo administered subcutaneously (SC) for 26 weeks during the double-blind period and open-label 0.75 mg/week dulaglutide for 26 weeks during the Open Label Extension (OLE).

Arm type	Experimental
Investigational medicinal product name	Dulaglutide
Investigational medicinal product code	LY2189265
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

0.75 mg/week dulaglutide administered SC for 26 weeks during the OLE.

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use
Dosage and administration details:	
Placebo administered SC for 26 weeks during the double-blind period.	
Arm title	0.75 mg Dulaglutide

Arm description:

Participants received 0.75 mg/week dulaglutide administered SC for 26 weeks during the double-blind period and open-label 0.75 mg/week for 26 weeks during the OLE.

Arm type	Experimental
Investigational medicinal product name	Dulaglutide
Investigational medicinal product code	LY2189265
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

0.75 mg/week dulaglutide administered SC for 26 weeks during the double-blind period and open-label 0.75 mg/week for 26 weeks during the OLE.

Arm title	1.5 mg Dulaglutide
------------------	--------------------

Arm description:

Participants received 1.5 mg/week dulaglutide administered SC for 26 weeks during the double-blind period and open-label 1.5 mg/week for 26 weeks during the OLE.

Arm type	Experimental
Investigational medicinal product name	Dulaglutide
Investigational medicinal product code	LY2189265
Other name	
Pharmaceutical forms	Solution for injection in pre-filled pen
Routes of administration	Subcutaneous use

Dosage and administration details:

1.5 mg/week dulaglutide administered SC for 26 weeks during the double-blind period and open-label 1.5 mg/week for 26 weeks during the OLE.

Number of subjects in period 2	Placebo/0.75 milligram (mg) Dulaglutide	0.75 mg Dulaglutide	1.5 mg Dulaglutide
Started	47	49	50
Completed	45	46	48
Not completed	2	3	2
Physician decision	1	2	2
Consent withdrawn by subject	1	1	-

Notes:

[1] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events only occurring in male or female participants were adjusted accordingly.

[2] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Gender specific events only occurring in male or female participants were adjusted accordingly.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
25 February 2019	Exclusion criteria were modified as follows: -To exclude participants with a history of hyperglycemic hyperosmolar syndrome after initial diagnosis of type 2 diabetes mellitus (T2DM). - Clarified that use of bolus insulin at screening is excluded, shortened the exclusion period of bolus insulin to 6 weeks prior to screening, and added exception for short-term use of insulin for medical management of acute conditions. - Specified exclusion of only chronic [greater than (>)14 consecutive days] use of oral steroids. This revision prevents the unnecessary exclusion of participants who may have received short-term steroid therapy to treat an acute condition within 60 days of screening.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
24 March 2020	Global enrollment hold due to Covid-19.	27 May 2020

Notes:

Limitations and caveats
