Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 February 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	04 February 2019
Global end of trial reached?	Yes
Global end of trial date	04 February 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To assess the safety and tolerability of OLT1177 Capsule after oral administration in subjects with an acute gout flare

Protection of trial subjects:

The OLT1177-05 Study Protocol and associated documents, including the Investigator Brochure, Informed Consent Form and any informational documentation given to study subjects, were reviewed by an appropriately constituted Institutional Review Board (IRB), or Ethics Committee (EC). Proposed changes to the conduct of the study were documented in Protocol Amendments and submitted to and reviewed and approved by the EC before implementation. If at any time during the study a subject was unable to tolerate his/her pain and wished to receive standard medical intervention for their gout flare, the subject was withdrawn from the study, considered a Treatment Failure and treated with either methylprednisolone 500 mg IV, prednisolone (30 mg PO QD), or colchicine (0.5 mg PO TID). Subjects were also given Rescue Medication (paracetamol, 1 g/dose or up to 4 g/day) at the Baseline Visit to use if needed following the first 12 hours post-initial dose of Investigational Product. Additionally, a Data Monitoring Committee (DMC) was convened to review all relevant safety and efficacy data for all subjects in a cohort to determine if an increase or decrease in total daily exposure was warranted for the subsequent cohort.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	18 May 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 34
Worldwide total number of subjects	34
EEA total number of subjects	34

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	21
From 65 to 84 years	13
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Subjects were recruited for the study directly from the Investigator's clinic as well as by referral from general practitioners in the Netherlands and by local and internet advertisements. The first subject was enrolled in May 2017 and the last subject completed the final study visit in February 2019.

Pre-assignment

Screening details:

Subjects had to meet all inclusion and no exclusion criteria to be eligible for enrollment. Presence of monosodium urate in synovial fluid of the target joint at Baseline with confirmed gout flare starting within 96 hours of Baseline Visit were required for enrollment. Both first-time gout and recurrent gout patients were included in the study.

Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Cohort 1

Arm description:

500 mg BID for 8 days (1000 mg total/day)

Arm type	Experimental
Investigational medicinal product name	OLT1177 Capsule
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

500 mg twice daily (BID) for 8 days

Arm title	Cohort 2
------------------	----------

Arm description:

500 mg QID for 8 days (2000 mg total/day)

Arm type	Experimental
Investigational medicinal product name	OLT1177 Capsule
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

500 mg four times daily (QID) for 8 days

Arm title	Cohort 3
------------------	----------

Arm description:

200 mg (am) and 100 mg (pm) BID for 8 days (300 mg total/day)

Arm type	Experimental
----------	--------------

Investigational medicinal product name	OLT1177 Capsule
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

200 mg (am) and 100 mg (pm) for 8 days

Arm title	Cohort 4
------------------	----------

Arm description:

100 mg QD for 8 days (100 mg total/day)

Arm type	Experimental
Investigational medicinal product name	OLT1177 Capsule
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

100 mg once daily (QD) for 8 days

Number of subjects in period 1	Cohort 1	Cohort 2	Cohort 3
Started	10	8	8
Completed	6	8	8
Not completed	4	0	0
Adverse event, non-fatal	2	-	-
Worsening condition as determined by Investigator	2	-	-

Primary: Change in Pain Intensity Score from Baseline to Day 3 and from Baseline to Day 7

End point title	Change in Pain Intensity Score from Baseline to Day 3 and from Baseline to Day 7 ^[1]
End point description: Target joint pain was measured using a 100-mm Visual Analog Scale (VAS).	
End point type	Primary
End point timeframe: Baseline, Day 3, and Day 7	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Statistical inference tests were not conducted. The purpose of the study was to assess, on an unblinded basis, a small number of subjects exposed for safety, tolerability, and clinical and inflammatory biomarker activity of oral OLT1177 Capsules in the treatment of acute gout flare. As such, the study was not powered to achieve significance.

Secondary: Subject-reported General Disability Score

End point title	Subject-reported General Disability Score
End point description:	
Subjects recorded their level of general disability on a 100 mm Visual Analog Scale (VAS) in response to the question "How limited do you feel right now, this [insert time of day,] in your daily activities as a result of this gout attack?". The scale went from 0 (I can do everything I was able to do before this gout attack started) to 100 (I cannot do anything).

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were reported from time of informed consent form signature through Day 14. Serious adverse events were reported from time of informed consent signature through Day 35.

Assessment type	Systematic

Reporting groups

Reporting group title	Cohort 1
-----------------------	----------

Reporting group description:

500 mg BID for 8 days

Reporting group title	Cohort 2
-----------------------	----------

Reporting group description:

500 mg QID for 8 days

Reporting group title	Cohort 3
-----------------------	----------

Reporting group description:

BID (am and pm dosing) for 8 days

Reporting group title	Cohort 4
-----------------------	----------

Reporting group description:

100 mg QD for 8 days

Reporting group title	All Subjects
-----------------------	--------------

Reporting group description:

Includes all subjects in the Safety Population (n=34).

Serious adverse events	Cohort 1	Cohort 2	Cohort 3
Total subjects affected by serious adverse events			
subjects affected / exposed	2 / 10 (20.00%)	0 / 8 (0.00%)	0 / 8 (0.00%)
number of deaths (all causes)	0	0	0
number of deaths resulting from adverse events	0	0	0
Injury, poisoning and procedural complications			
Post procedural myocardial infarction			
subjects affected / exposed	1 / 10 (10.00%)	0 / 8 (0.00%)	0 / 8 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0
Metabolism and nutrition disorders			
Gout			
subjects affected / exposed	1 / 10 (10.00%)	0 / 8 (0.00%)	0 / 8 (0.00%)
occurrences causally related to treatment / all	0 / 1	0 / 0	0 / 0
deaths causally related to treatment / all	0 / 0	0 / 0	0 / 0

Serious adverse events	Cohort 4	All Subjects	
Total subjects affected by serious adverse events			
subjects affected / exposed	0 / 8 (0.00%)	2 / 34 (5.88%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Injury, poisoning and procedural complications			
Post procedural myocardial infarction			
subjects affected / exposed	0 / 8 (0.00%)	1 / 34 (2.94%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metabolism and nutrition disorders			
Gout			
subjects affected / exposed	0 / 8 (0.00%)	1 / 34 (2.94%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 2 %

Non-serious adverse events	Cohort 1	Cohort 2	Cohort 3
Total subjects affected by non-serious adverse events			
subjects affected / exposed	8 / 10 (80.00%)	7 / 8 (87.50%)	4 / 8 (50.00%)
Investigations			
C-reactive protein increased			
subjects affected / exposed	0 / 10 (0.00%)	0 / 8 (0.00%)	1 / 8 (12.50%)
occurrences (all)	0	0	1
Serum amyloid A protein increased			
subjects affected / exposed	0 / 10 (0.00%)	0 / 8 (0.00%)	1 / 8 (12.50%)
occurrences (all)	0	0	1
Weight decreased			
subjects affected / exposed	1 / 10 (10.00%)	0 / 8 (0.00%)	0 / 8 (0.00%)
occurrences (all)	1	0	0
Injury, poisoning and procedural complications			
Joint injury			
subjects affected / exposed	0 / 10 (0.00%)	0 / 8 (0.00%)	0 / 8 (0.00%)
occurrences (all)	0	0	0
Post procedural myocardial infarction

occurrences (all)	0	1	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
20 September 2017	Key revisions included change of prohibited use of paracetamol before Baseline Visit to within 4 hours (from within 12 hours of Baseline Visit).
11 April 2018	Key revisions included added exclusion criteria for known diagnosis of chronic kidney disease or known history of renal impairment, change of Cohort 2 dose administration to 500 mg QID (from 1000 mg BID), change of urate-lowering therapy (a prohibited concomitant medication/therapy) stable dosing condition to 1 month (from 3 months), allowance of usage of medical data from synovial fluid collection/analysis from within 24 hours prior to Baseline Visit as part of standard medical diagnosis to be used and reported in study case report forms, addition of discretionary replacement of any subject who did not complete dosing through the Day 7 Visit, removal of requirement that at least three subjects per cohort be enrolled with a gout flare that began within 36 hours of the Baseline Visit, and addition of optional, suggested subject contact for dosing compliance.
10 October 2018	Key revisions included addition of Cohort 4 with 8 patients dosing at 100 mg per day thereby changing total enrollment to approximately 32 eligible subjects (from approximately 24 eligible subjects), and removal of decision tree for determination of dose schedules and replacement with a table to reflect actual trial dosages.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

This proof-of-concept trial was conducted in a small number subjects, therefore no statistical analyses between groups were conducted.
