

## Clinical trial results:

**A randomized, double-blind, placebo-controlled multicenter study of subcutaneous secukinumab to demonstrate efficacy in the treatment of enthesitis at the Achilles tendon up to 1 year in adult patients with active Psoriatic Arthritis (PsA) and axial Spondyloarthritis (axSpA) (ACHILLES)**

**Summary**

EudraCT number	2016-000972-91
Trial protocol	DE GB ES SK CZ GR BG IT
Global end of trial date	11 December 2019

### Results information

Result version number	v1 (current)
This version publication date	19 December 2020
First version publication date	19 December 2020

### Trial information

#### Trial identification

Sponsor protocol code	CAIN457F3301
-----------------------	--------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02771210
WHO universal trial number (UTN)	-

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	18 September 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	11 December 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of this study was to demonstrate that the efficacy of secukinumab was superior to placebo based on the percentage of patients with resolution of Achilles tendon enthesitis as assessed by the respective subcomponent of the Leeds enthesitis index (LEI) at 24 weeks in patients with active PsA and axSpA.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 August 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 21
Country: Number of subjects enrolled	Czechia: 40
Country: Number of subjects enrolled	Germany: 54
Country: Number of subjects enrolled	Greece: 11
Country: Number of subjects enrolled	Italy: 15
Country: Number of subjects enrolled	Slovakia: 2
Country: Number of subjects enrolled	Spain: 36
Country: Number of subjects enrolled	United Kingdom: 25
Worldwide total number of subjects	204
EEA total number of subjects	204

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	192
From 65 to 84 years	12
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

304 patients were screened. Of these, 94 patients discontinued during screening phase, 6 patients were re-screened and 204 patients completed the screening phase and were randomized in the trial.

### Pre-assignment

Screening details:

A total of 175 patients (85.8%) completed treatment period 1 (up to Week 24); 29 patients (14.2%) discontinued study treatment in treatment period 1. A total of 170 patients (83.3%) completed treatment period 2 (up to Week 52); 5 patients (2.5%) discontinued in treatment period 2.

### Period 1

Period 1 title	Period 1
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Secukinumab

Arm description:

Secukinumab 150 mg or 300 mg s.c., administered at baseline, weeks 1, 2, 3, 4 and every 4 weeks until week 24, respective dose was assigned according to underlying condition, in case of PsA according to severity of concomitant Psoriasis or preexposure to anti-TNF $\alpha$

Arm type	Experimental
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution and suspension for suspension for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Secukinumab as one (1.0 mL PFS of 150 mg dose) or two (2  $\times$  1.0 mL PFS of 150 mg dose, 300 mg) s.c. injections according to axSpA or PsA disease at Baseline, Week 1, Week 2, and Week 3, followed by administration every 4 weeks starting at Week 4.

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo 150 mg or 300 mg s.c., administered at baseline, weeks 1, 2, 3, 4 and every 4 weeks until week 24, respective dose was assigned according to underlying condition, in case of PsA according to severity of concomitant Psoriasis or preexposure to anti-TNF $\alpha$

Arm type	Placebo
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo as one (1.0 mL PFS of 150 mg dose) or two (2  $\times$  1.0 mL PFS of 150 mg dose, 300 mg) s.c. injections according to axSpA or PsA disease at Baseline, Week 1, Week 2, and Week 3, followed by administration every 4 weeks starting at Week 4.

<b>Number of subjects in period 1</b>	Secukinumab	Placebo
Started	102	102
Completed	91	84
Not completed	11	18
Physician decision	-	1
Consent withdrawn by subject	-	3
Adverse event, non-fatal	5	3
Lost to follow-up	2	-
Withdrawal of informed consent	1	5
Lack of efficacy	3	6

## Period 2

Period 2 title	Period 2
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

Period 2 has no loading and all patients received Secukinumab - no Placebo in this period. Open-label

## Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Secukinumab

Arm description:

From week 24 Secukinumab 150 mg or 300 mg s.c. was administered every 4 weeks; respective dose was assigned according to underlying condition, in case of PsA according to severity of concomitant Psoriasis or preexposure to anti-TNFα

Arm type	Experimental
Investigational medicinal product name	AIN457
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection/infusion in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Secukinumab as one (1.0 mL PFS of 150 mg dose) or two (2 × 1.0 mL PFS of 150 mg dose, 300 mg) s.c. injections according to axSpA or PsA disease at Baseline, Week 1, Week 2, and Week 3, followed by administration every 4 weeks starting at Week 4.

<b>Arm title</b>	Placebo/Secukinumab
------------------	---------------------

Arm description:

From week 24 Secukinumab 150 mg or 300 mg s.c. was administered every 4 weeks; respective dose was assigned according to underlying condition, in case of PsA according to severity of concomitant Psoriasis or preexposure to anti-TNFα

Arm type	Placebo
----------	---------

Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion in pre-filled syringe, Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

placebo as one (1.0 mL PFS of 150 mg dose) or two (2 × 1.0 mL PFS of 150 mg dose, 300 mg) s.c. injections according to axSpA or PsA disease at Baseline, Week 1, Week 2, and Week 3, followed by administration every 4 weeks starting at Week 4.

<b>Number of subjects in period 2</b>	Secukinumab	Placebo/Secukinumab
Started	91	84
Completed	89	81
Not completed	2	3
Consent withdrawn by subject	1	-
Adverse event, non-fatal	1	-
Withdrawal of informed consent	-	2
Lack of efficacy	-	1

## Baseline characteristics

### Reporting groups

Reporting group title	Secukinumab
Reporting group description:

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected from first dose of study treatment until end of study at week 52

Adverse event reporting additional description:

Adverse Events (AEs) are any untoward sign or symptom that occurs during the study treatment. Where a patient reported more than 1 AE with the same preferred term, the AE was counted only once; and where a patient reported more than 1 AE within the same primary system organ class, patient was counted only once at the system organ class level.

Assessment type	Systematic
