

## Clinical trial results:

### **A MULTICENTER, PHASE 2B, RANDOMIZED, DOUBLE-BLIND, PLACEBO-CONTROLLED, PARALLEL-GROUP, DOSE-RANGING STUDY TO EVALUATE THE EFFICACY AND SAFETY OF BIMEKIZUMAB IN SUBJECTS WITH ACTIVE ANKYLOSING SPONDYLITIS**

#### Summary

EudraCT number	2016-001102-42
Trial protocol	HU ES CZ DE BG GB
Global end of trial date	30 August 2018

#### Results information

Result version number	v2 (current)
This version publication date	02 December 2020
First version publication date	21 September 2019
Version creation reason	<ul style="list-style-type: none"><li>• Correction of full data set Alignment with final posting on ClinicalTrials.gov after NIH review.</li></ul>

#### Trial information

##### Trial identification

Sponsor protocol code	AS0008
-----------------------	--------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02963506
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	UCB Biopharma SPRL
Sponsor organisation address	Allée de la Recherche 60, Brussels, Belgium, 1070

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 February 2019
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	30 August 2018
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

Assess the dose-response based on the efficacy of bimekizumab

Protection of trial subjects:

During the conduct of the study all subjects were closely monitored.

Background therapy:

Background therapy as permitted in the protocol.

Evidence for comparator:

Not Applicable

Actual start date of recruitment	27 October 2016
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	4 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 9
Country: Number of subjects enrolled	Canada: 2
Country: Number of subjects enrolled	Czech Republic: 96
Country: Number of subjects enrolled	Germany: 13
Country: Number of subjects enrolled	Hungary: 7
Country: Number of subjects enrolled	Poland: 100
Country: Number of subjects enrolled	Russian Federation: 34
Country: Number of subjects enrolled	Spain: 9
Country: Number of subjects enrolled	Ukraine: 21
Country: Number of subjects enrolled	United States: 12
Worldwide total number of subjects	303
EEA total number of subjects	234

Notes:

### Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	291
From 65 to 84 years	12
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

The study started to enroll participants in October 2016 and concluded in August 2018.

### Pre-assignment

Screening details:

The study included a 28-Day Screening Period, followed by a Double-Blind Period from Day 1 to Week 12, prior to treatment re-randomization, a Dose-blind Period, from Week 12 after the treatment re-randomization and up to Week 48 and a Safety Follow-Up (SFU) Period, post Week 48.

The Participant Flow refers to the Randomized Set and Dose-Blind Set.

### Period 1

Period 1 title	Double-Blind Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Assessor, Investigator, Subject

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Placebo

Arm description:

Participants received placebo during the 12 weeks Double-Blind Period.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered placebo, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Arm title</b>	BKZ 16 mg
------------------	-----------

Arm description:

Participants received bimekizumab (BKZ) 16 milligrams (mg) every 4 weeks (Q4W) during the 12 weeks Double-Blind Period.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Arm title</b>	BKZ 64 mg
------------------	-----------

Arm description:

Participants received bimekizumab (BKZ) 64 mg every 4 weeks (Q4W) during the 12 weeks Double-Blind Period.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Arm title</b>	BKZ 160 mg
------------------	------------

Arm description:

Participants received bimekizumab (BKZ) 160 mg every 4 weeks (Q4W) during the 12 weeks Double-Blind Period followed by the same dose during the 36 weeks Dose-Blind Period.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Arm title</b>	BKZ 320 mg
------------------	------------

Arm description:

Participants received bimekizumab (BKZ) 320 mg every 4 weeks (Q4W) during the 12 weeks Double-Blind Period followed by the same dose during the 36 weeks Dose-Blind Period.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Number of subjects in period 1</b>	Placebo	BKZ 16 mg	BKZ 64 mg

## Period 2

Period 2 title	Dose-Blind Period
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Assessor, Investigator, Subject

## Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Placebo - BKZ 160 mg
------------------	----------------------

### Arm description:

After the 12 weeks Double-Blind Period participants randomized to placebo were re-randomized to receive bimekizumab (BKZ) 160 mg every 4 weeks (Q4W) for 36 weeks in the Dose-Blind Period.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

### Dosage and administration details:

Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.

<b>Arm title</b>	Placebo - BKZ 320 mg
------------------	----------------------

### Arm description:

After the 12 weeks Double-Blind Period participants randomized to placebo were re-randomized to receive bimekizumab (BKZ) 320 mg every 4 weeks (Q4W) for 36 weeks in the Dose-Blind Period

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use
Dosage and administration details:	
Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.	
<b>Arm title</b>	BKZ 16 mg - BKZ 160 mg
Arm description:	
After the 12 weeks Double-Blind Period participants randomized to bimekizumab (BKZ) 16 mg every 4 weeks (Q4W) were re-randomized to receive BKZ 160 mg Q4W for 36 weeks in the Dose-Blind Period.	
Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use
Dosage and administration details:	
Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.	
<b>Arm title</b>	BKZ 16 mg - BKZ 320 mg
Arm description:	
After the 12 weeks Double-Blind Period participants randomized to bimekizumab (BKZ) 16 mg every 4 weeks (Q4W) were re-randomized to receive BKZ 320 mg Q4W for 36 weeks in the Dose-Blind Period.	
Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use
Dosage and administration details:	
Participants were administered different BKZ dose regimens, as 2 subcutaneous injections, in the lateral abdominal wall, or upper outer thigh.	
<b>Arm title</b>	BKZ 64 mg - BKZ 160 mg
Arm description:	
After the 12 weeks Double-Blind Period participants randomized to bimekizumab (BKZ) 64 mg every 4 weeks (Q4W) were re-randomized to receive BKZ 160 mg Q4W for 36 weeks in the Dose-Blind Period.	
Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ

Subject analysis set title	BKZ 320 mg (SS) - up to Wk 73
Subject analysis set type	Safety analysis
Subject analysis set description: This arm consisted of all participants who received bimekizumab (BKZ) 320 mg every 4 weeks (Q4W) at any time in the study (up to Week 73). Participants formed the SS.	

**Primary: Percentage of participants with Axial Spondyloarthritis International Society 40% response criteria (ASAS40) at Week 12**

End point title	Percentage of participants with Axial Spondyloarthritis International Society 40% response criteria (ASAS40) at Week 12
-----------------	---

End point description:

The ASAS40 response was defined as relative improvements of at least 40% and absolute improvement of at least 2 units on a 0 to 10 Numeric Rating Scale (NRS), where 0 is "not active" and 10 is "very active" in at least 3 of the 4 domains: Patient's Global Assessment of Disease Activity (PGADA), Pain assessment (total spinal pain NRS score), Function (Bath Ankylosing Spondylitis Functional Index (BASFI)), Inflammation (mean of Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) questions 5 and 6 concerning morning stiffness intensity and duration) and no worsening at all in the remaining domain.

Note: Participants with missing data or who discontinue study treatment prior to Week 12 were counted as non-responders.

The FAS consisted of all randomized participants who received at least 1 dose of investigational medicinal product (IMP) and had a valid measurement of the primary efficacy variable at Baseline.

End point type	Primary
----------------	---------

End point timeframe:

Week 12

End point values	Placebo (FAS)	BKZ 16 mg (FAS)	BKZ 64 mg (FAS)	BKZ 160 mg (FAS)
Subject group type	Subject analysis set	Subject analysis set	Subject analysis set	Subject analysis set
Number of subjects analysed	60	61	61	60
Units: percentage of participants				
number (not applicable)	13.3	29.5	42.6	46.7

End point values	BKZ 320 mg (FAS)			
Subject group type	Subject analysis set			
Number of subjects analysed	61			
Units: percentage of participants				
number (not applicable)	45.9			

**Statistical analyses**

Statistical analysis title	Statistical analysis 1
----------------------------	------------------------

Statistical analysis description:

Statistic and p-value were calculated using a Cochran-Mantel-Haenszel test (test for non-zero correlation statistic) based on modified ridit scores and including geographic region and prior Tumor Necrosis Factor (TNF) inhibitor exposure as stratification factors.

Note: 999 and 0% CI are used as placeholders. Using this methodology no point estimator will be calculated. The respective correlation statistic was 17.9.

Comparison groups	Placebo (FAS) v BKZ 16 mg (FAS) v BKZ 64 mg (FAS) v BKZ 160 mg (FAS) v BKZ 320 mg (FAS)
-------------------	---

Number of subjects included in analysis	303
Analysis specification	Pre-specified
Analysis type	other
P-value	< 0.001
Method	Cochran-Mantel-Haenszel
Parameter estimate	Correlation statistic
Point estimate	999
Confidence interval	
level	Other: 0 %
sides	2-sided
lower limit	999
upper limit	999

<b>Statistical analysis title</b>	Statistical analysis 2
-----------------------------------	------------------------

Statistical analysis description:

For differences in relation to placebo: Odds Ratio, confidence interval and p-value were derived from a logistic regression model including fixed effects for treatment, geographic region and prior tumor necrosis factor (TNF) inhibitor exposure.

Comparison groups	Placebo (FAS) v BKZ 16 mg (FAS)
Number of subjects included in analysis	121
Analysis specification	Pre-specified
Analysis type	other <sup>[1]</sup>
P-value	= 0.04 <sup>[2]</sup>
Method	Regression, Logistic
Parameter estimate	Odds ratio (OR)
Point estimate	2.6
Confidence interval	
level	95 %
sides	2-sided
lower limit	1.04
upper limit	6.48

Notes:

[1] - The pairwise testing of each bimekizumab dose versus placebo accounted for multiplicity by using a fixed sequence testing procedure with each bimekizumab dose being tested sequentially from the highest dose to the lowest dose. If the sequential testing failed to reach significance at a significance level of  $\alpha=0.05$ , then the pairwise testing continued and the comparison was seen as non-significant.

[2] - The p-values were displayed as nominal p-values.

<b>Statistical analysis title</b>	Statistical analysis 3
-----------------------------------	------------------------

Notes:

[3] - The pairwise testing of each bimekizumab dose versus placebo accounted for multiplicity by using a fixed sequence testing procedure with each bimekizumab dose being tested sequentially from the highest dose to the lowest dose. If the sequential testing failed to reach significance at a significance level of  $\alpha=0.05$ , then the pairwise testing continued and the comparison was seen as non-significant.

[4] - The p-values were displayed as nominal p-values.

### Secondary: Change from Baseline in Ankylosing Spondylitis Disease Activity Score - C-Reactive Protein (ASDAS [CRP]) at Week 12

End point title	Change from Baseline in Ankylosing Spondylitis Disease Activity Score - C-Reactive Protein (ASDAS [CRP]) at Week 12
-----------------	---

End point description:

The ASDAS was the sum of the following:

0.121xBack pain (BASDAI Q2 result)

0.058xDuration of morning stiffness (BASDAI Q6 result)

0.110xPGADA

0.073xPeripheral pain/swelling (BASDAI Q3 result)

0.579x(ln(hs-CRP [mg/L]+1))

Back pain, PGADA, duration of morning stiffness, peripheral pain/swelling and fatigue are assessed on a numerical scale (0-10 units).

The change from Baseline is calculated, a '-' value indicating improvement and a '+' one worsening.

There is a minimum score of 0.636 for the total ASDAS score, but no defined upper score as CRP does not have an upper limit.

If a component for the ASDAS-CRP was missing at a given visit that component was imputed by carrying the last observation forward and the ASDAS-CRP was calculated accordingly. If the hs-CRP value was <2 mg/L, then it was imputed as the constant value of 2 mg/L.

The FAS consisted of all randomized participants who received at least 1 dose of IMP and had a valid measurement of the primary efficacy variable at Baseline.

### Statistical analyses

No statistical analyses for this end point

### Secondary: Percentage of participants who withdrew due to an adverse event (AE) during the study

End point title	Percentage of participants who withdrew due to an adverse event (AE) during the study
-----------------	---

End point description:

An AE is any untoward medical occurrence in a participant or trial subject that is administered a drug or biologic (medicinal product) or that is using a medical device.

The event does not necessarily have a causal relationship with that treatment or usage. The results of this Secondary Outcome Measure were summarized from the adverse event pages of the Case Report Forms.

The SS consisted of all randomized participants who received at least 1 dose of IMP.

End point type	Secondary

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Treatment-emergent adverse events (TEAEs) were collected from Baseline until the Safety Follow-Up Visit (up to Week 73)

Adverse event reporting additional description:

At Week 12, placebo, BKZ 16 mg and BKZ 64 mg subjects were re-randomized to either BKZ 160 mg or BKZ 320 mg. Subjects randomized to BKZ 160 mg group or BKZ 320 mg at Baseline were not re-randomized at Week 12 and remained on their original treatment. The Safety Set is based on actual treatment, other populations are based on planned treatment.

Assessment type	Non-systematic

### Reporting groups

Reporting group title	BKZ 16 mg (SS) - up to Wk 12
-----------------------	------------------------------

Reporting group description:

This arm consisted of all participants who received bimekizumab (BKZ) 16 milligrams (mg) every 4 weeks (Q4W) at any time in the study (up to Week 12). Participants formed the SS.

Reporting group title	Placebo (SS) - up to Wk 12
-----------------------	----------------------------

Reporting group description:

This arm consisted of all participants who received placebo at any time in the study (up to Week 12). Participants formed the Safety Set (SS).

Reporting group title	BKZ 320 mg (SS) - up to Wk 73
-----------------------	-------------------------------

Reporting group description:

This arm consisted of all participants who received bimekizumab (BKZ) 320 mg every 4 weeks (Q4W) at any time in the study (up to Week 73). Participants formed the SS.

Reporting group title	BKZ 160 mg (SS) - up to Wk 73
-----------------------	-------------------------------

Reporting group description:

This arm consisted of all participants who received bimekizumab (BKZ) 160 mg every 4 weeks (Q4W) at any time in the study (up to Week 73). Participants formed the SS.

Reporting group title	BKZ 64 mg (SS) - up to Wk 12
-----------------------	------------------------------

Reporting group description:

This arm consisted of all participants who received bimekizumab (BKZ) 64 mg every 4 weeks (Q4W) at any time in the study (up to Week 12). Participants formed the SS.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 March 2018	The purpose of this substantial protocol amendment was the following: <ul style="list-style-type: none"><li>- To update the study contact details for the sponsor study physician and clinical trial biostatistician.</li><li>- To revise the withdrawal criteria section to provide instructions for the management of participants with newly diagnosed inflammatory bowel disease (IBD) or with IBD flares during the study.</li><li>- Amend the time window between doses during the Double-Blind Period of the study.</li><li>- To revise and clarify the SAE criteria for pregnancy for consistency.</li><li>- Amend the table for identification/exclusion of alternative etiology to include alanine aminotransferase (ALT) and aspartate aminotransferase (AST).</li></ul>

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
