

Clinical trial results:

Phase I trial of stereotactic body radiotherapy with concurrent pembrolizumab in metastatic urothelial cancer.

Summary

EudraCT number	2016-001263-37
Trial protocol	BE
Global end of trial date	18 December 2018

Results information

Result version number	v1 (current)
This version publication date	06 June 2024
First version publication date	06 June 2024
Summary attachment (see zip file)	Final Study Report (2016-001263-37_final study report.pdf)

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	12 June 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	02 April 2018
Global end of trial reached?	Yes
Global end of trial date	18 December 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To determine the SBRT-schedule associated with DLT in 20% of patients

Protection of trial subjects:

: Ethics review and approval, informed consent, supportive care and routine monitoring.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 June 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 23
Worldwide total number of subjects	23
EEA total number of subjects	23

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	12
From 65 to 84 years	11
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

30 patients were screened from 14/11/2016 and 2/1/2018. 23 patients were enrolled, 18 patients were randomized. End of trial notification was 27/12/18 (last patient last visit) and submitted to EC and CA on dd-mm-yyyy. There were 6 dropouts, 1 patient was excluded due to CNS lesion, 5 patients died during treatment

Pre-assignment

Screening details:

Inclusion Criteria:

≥ 18 years of age

Have measurable disease based on RECIST 1.1.

Have had any prior treatment more than 2 weeks prior to study day 1, treatment naive patients are allowed

Histologically confirmed diagnosis of urothelial carcinoma

Willing to provide tissue from a newly obtained core or excisional biopsy of a tumor lesion

Pre-assignment period milestones

Number of subjects started	23
Number of subjects completed	18

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Physician decision: 1
Reason: Number of subjects	drop-out before start of treatment: 4

Period 1

Period 1 title	Baseline period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Baseline Arm T1
------------------	-----------------

Arm description:

4 cycles of pembrolizumab with SBRT applied before the first cycle

Arm type	Experimental
Investigational medicinal product name	pembrolizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

200 mg per day 1 of each 3 week cycle

Investigational medicinal product name	Radio therapy
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Radionuclide generator
Routes of administration	Other use

Dosage and administration details:

8 Gy day 1, 3, 5

Arm title	Baseline Arm T2
Arm description: 4 cycles of pembrolizumab with SBRT applied before the third cycle	
Arm type	Experimental
Investigational medicinal product name	pembrolizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder for concentrate for solution for infusion
Routes of administration	Intravenous use
Dosage and administration details: 200 mg per day one of each 3 week cycle	
Investigational medicinal product name	Radio therapy
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Radionuclide generator
Routes of administration	Other use
Dosage and administration details: 8 Gy day 38, 40, 42	

Number of subjects in period 1 ^[1]	Baseline Arm T1	Baseline Arm T2
Started	9	9
Completed	9	9

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 23 patients were enrolled, 5 patients dropped out before start of treatment hereby only 18 patients were treated.

See attachment Final Study Report

Period 2

Period 2 title	Overall Trial
Is this the baseline period?	No
Allocation method	Not applicable
Blinding used	Not blinded

Blinding implementation details:

Randomized - non controlled - open label

This trial is open-label; therefore, the subject, the trial site personnel, the Sponsor and/or designee are not blinded to treatment. Drug identity (name, strength) is included in the label text; random code/disclosure envelopes or lists are not provided.

Arms

Are arms mutually exclusive?	Yes

deaths causally related to treatment / all	0 / 0	0 / 0	
Urinary tract infection			
subjects affected / exposed	1 / 9 (11.11%)	0 / 9 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Metabolism and nutrition disorders			
Hypercalcaemia			
subjects affected / exposed	1 / 9 (11.11%)	0 / 9 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Arm T1	Arm T2	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 9 (0.00%)	0 / 9 (0.00%)	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
09 August 2016	amendment 1: Use of liquid formulation of the IMP pembroluzimab in stead of the powder for solution for infusion formulation
31 January 2017	Amendment 2: Protocol adjustment to conform to recent scientific findings
26 April 2017	Amendment 3: Inclusion of phase II trial information in the protocol. Addition of recent findings concerning rare side effects of the IMP pembrolizumab to the ICF as provided by the manufacturer.
20 June 2017	Amendment 4: Adjustment to the number of participant from 20 to 25 patients to account for potential drop-outs.
23 October 2017	Amendment 5: Adjustments to EudraCT form sections D2.3 and D.9

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
