

## Clinical trial results:

### A randomized phase II study comparing pembrolizumab with methotrexate in elderly, frail or cisplatin-ineligible patients with head and neck cancers

#### Summary

EudraCT number	2016-001331-12
Trial protocol	DE
Global end of trial date	03 December 2021

#### Results information

Result version number	v1 (current)
This version publication date	24 February 2023
First version publication date	24 February 2023

#### Trial information

##### Trial identification

Sponsor protocol code	AIO-KHT-0115
-----------------------	--------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03193931
WHO universal trial number (UTN)	-

Notes:

##### Sponsors

Sponsor organisation name	AIO-Studien-gGmbH
Sponsor organisation address	Kuno-Fischer-Str. 8, Berlin, Germany,

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	11 July 2022
Is this the analysis of the primary completion data?	Yes
Primary completion date	19 December 2020
Global end of trial reached?	Yes
Global end of trial date	03 December 2021
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

To assess antitumor activity of pembrolizumab in SCCHN

Protection of trial subjects:

This study was planned, analyzed and conducted according to the study protocol and in accordance with the International Conference on Harmonization (ICH) ,Guideline for Good Clinical Practice E6(R1)', CPMP/ICH/135/95, based on the principles of the Declaration of Helsinki (1964) and its October 1996 amendment (Somerset West, South Africa). The study was duly conducted in compliance with the German Arzneimittelgesetz (AMG; German Drug Law), and the corresponding Directive 2001/20/EC. Subjects were fully informed regarding all pertinent aspects of the clinical trial as well as the possibility to discontinue at any time in language and terms appropriate for the subject.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 February 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 47
Worldwide total number of subjects	47
EEA total number of subjects	47

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	14
From 65 to 84 years	30

85 years and over	3
-------------------	---

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Patients were recruited between Feb 2018 and Dec 2019 at 11 study sites in Germany. In total, 54 patients were screened, and 48 were randomized. One patient randomized to Arm B was excluded from treatment and from all analysis sets due to violation of in/exclusion criteria prior to treatment start.

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Arm A - Pembrolizumab
------------------	-----------------------

Arm description: -

Arm type	Experimental
Investigational medicinal product name	Pembrolizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

200 mg i.v., Q3W for a maximum duration of 24 months or until disease progression, occurrence of non-tolerable toxicity or patient withdrawal of consent.

<b>Arm title</b>	Arm B - Methotrexate
------------------	----------------------

Arm description: -

Arm type	Active comparator
Investigational medicinal product name	Methotrexate
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

40 mg i.v., weekly for a maximum duration of 24 months or until disease progression, occurrence of non-tolerable toxicity or patient withdrawal of consent.

Number of subjects in period 1	Arm A - Pembrolizumab	Arm B - Methotrexate
Started	23	24
Completed	3	0
Not completed	20	24
Disease progression	10	8
Patient's wish	-	2

Death	6	6
Investigator decision	3	2
Unacceptable toxicity	-	4
Unrelated medical illness	1	2

## Baseline characteristics

### Reporting groups

Reporting group title

Overall trial

Reporting group description: -

Reporting group values	Overall trial	Total	
Number of subjects	47	47	
Age categorical			
Units: Subjects			
In utero	0	0	
Preterm newborn infants (gestational age < 37 wks)	0	0	
Newborns (0-27 days)	0	0	
Infants and toddlers (28 days-23 months)	0	0	
Children (2-11 years)	0	0	
Adolescents (12-17 years)	0	0	
Adults (18-64 years)	14	14	
From 65-84 years	30	30	
85 years and over	3	3	
Gender categorical			
Units: Subjects			
Female	13	13	
Male	34	34	
ECOG status			
Units: Subjects			
ECOG 0	1	1	
ECOG 1	5	5	
ECOG 2	41	41	
Tumor location			
Units: Subjects			
Oral cavity	17	17	
Larynx	6	6	
Oropharynx	17	17	
Hypopharynx	7	7	

## End points

### End points reporting groups

Reporting group title	Arm A - Pembrolizumab
Reporting group description: -	
Reporting group title	Arm B - Methotrexate
Reporting group description: -	

### Primary: Overall survival (OS) rate after 1 year

End point title	Overall survival (OS) rate after 1 year
End point description:	
End point type	Primary
End point timeframe:	
Survival status one year after randomization was collected. Randomized subjects for whom survival data at 1 year post randomization was not available (i.e. lost-to-follow-up) were considered dead for the purpose of calculating the primary endpoint.	

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	24		
Units: Surviving patients				
Pts. alive at 1-year milestone	4	9		
Pts. deceased at 1-year milestone	19	15		

### Statistical analyses

Statistical analysis title	Primary endpoint
Comparison groups	Arm A - Pembrolizumab v Arm B - Methotrexate
Number of subjects included in analysis	47
Analysis specification	Pre-specified
Analysis type	other
P-value	= 0.123
Method	Chi-squared

### Secondary: Failure of strategy rate at 1 year

End point title	Failure of strategy rate at 1 year
End point description:	
End point type	Secondary

End point timeframe:

Failure of strategy rate at 1 year, defined as death, progressive disease (PD), treatment discontinuation or deterioration of the Instrumental Activities of Daily Living (IDAL) score by 2 points [Guigay et al. 2014]

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	24		
Units: Patients				
Pts. with failure of strategy	21	24		
Pts. without failure of strategy	2	0		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Objective response rate (ORR)

End point title	Objective response rate (ORR)
-----------------	-------------------------------

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

All lesions identified at screening were to be assessed at each scheduled tumor measurement. Tumor assessment was to be performed every 6 weeks until 24 weeks of treatment, thereafter every 12 weeks until progression.

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	24		
Units: Patients				
Response (CR or PR)	4	3		
No response	14	14		
Missing values	5	7		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Progression-free survival (PFS)

End point title	Progression-free survival (PFS)
-----------------	---------------------------------

---

**End point description:**

Subjects who died without a reported prior progression were considered to have progressed on the date of their death. Subjects who did not progress or die were censored on the date of their last evaluable tumor assessment. Subjects who did not have any on-study tumor assessment and did not die were censored on the date they were randomized. Subjects who started any subsequent anticancer therapy without a prior reported progression were censored at the last evaluable tumor assessment prior to or on the date of initiation of the subsequent anticancer therapy.

Results reported here are based on 21 progression events observed in each treatment arm.

---

End point type	Secondary
----------------	-----------

---

**End point timeframe:**

PFS was defined as the time from randomization to the date of the first documented tumor progression based on investigator assessments (per RECIST 1.1), or death due to any cause.

---

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	24		
Units: Months				
median (confidence interval 95%)	1.84 (1.4 to 4.6)	2.8 (1.4 to 4.4)		

---

**Statistical analyses**

No statistical analyses for this end point

---

---

**Secondary: Overall survival (OS)**

---

End point title	Overall survival (OS)
-----------------	-----------------------

---

**End point description:**

The data reported here is based on 20 observed events in Arm A and 19 events in Arm B.

---

End point type	Secondary
----------------	-----------

---

**End point timeframe:**

OS was defined as the time from randomization date to the date of death. A subject who has not died was censored at last known date alive.

---

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	24		
Units: Months				
median (confidence interval 95%)	6.1 (2.2 to 8.8)	9.8 (2.0 to 15.8)		

---

**Statistical analyses**

No statistical analyses for this end point

---

**Secondary: Duration of treatment beyond progression**

---

End point title	Duration of treatment beyond progression
-----------------	--

End point description:

End point type	Secondary
----------------	-----------

End point timeframe:

Duration of treatment beyond initial investigator assessed progression

---

End point values	Arm A - Pembrolizumab	Arm B - Methotrexate		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	12	9		
Units: Days				
median (confidence interval 95%)	15.5 (1.0 to 28.0)	8.0 (0.0 to 34.0)		

---

**Statistical analyses**

---

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were recorded from time of signed informed consent until 30 days after last dose of IMP.  
Serious adverse events were recorded from time of signed informed consent until 90 days after last dose of IMP.

Adverse event reporting additional description:

If the subject initiated new anticancer therapy after last dose of IMP, serious adverse events were recorded for 30 days after the last dose of IMP.

Assessment type	Non-systematic
