

## Clinical trial results:

### Combined Phase 2b/3, Double-Blind, Randomized, Placebo-Controlled Studies Evaluating the Efficacy and Safety of Filgotinib in the Induction and Maintenance of Remission in Subjects with Moderately to Severely Active Ulcerative Colitis

#### Summary

EudraCT number	2016-001392-78
Trial protocol	HU GB BE SE AT PT GR SK IS ES BG DE NL HR NO IT
Global end of trial date	31 March 2020

#### Results information

Result version number	v1 (current)
This version publication date	08 April 2021
First version publication date	08 April 2021

#### Trial information

##### Trial identification

Sponsor protocol code	GS-US-418-3898
-----------------------	----------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT02914522
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	Gilead Sciences
Sponsor organisation address	333 Lakeside Drive, Foster City, CA, United States, 94404
Public contact	Gilead Clinical Study Information Center, Gilead Sciences, GileadClinicalTrials@gilead.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	31 March 2020
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 March 2020
Global end of trial reached?	Yes
Global end of trial date	31 March 2020
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

To evaluate the efficacy of filgotinib as compared with placebo in establishing endoscopy/bleeding/stool frequency (EBS) remission at Week 10 and Week 58.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	14 November 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 4
Country: Number of subjects enrolled	Norway: 6
Country: Number of subjects enrolled	Poland: 188
Country: Number of subjects enrolled	Portugal: 2
Country: Number of subjects enrolled	Slovakia: 4
Country: Number of subjects enrolled	Spain: 8
Country: Number of subjects enrolled	Sweden: 6
Country: Number of subjects enrolled	United Kingdom: 40
Country: Number of subjects enrolled	Croatia: 6
Country: Number of subjects enrolled	Austria: 7
Country: Number of subjects enrolled	Belgium: 36
Country: Number of subjects enrolled	Bulgaria: 5
Country: Number of subjects enrolled	Czechia: 17
Country: Number of subjects enrolled	France: 80
Country: Number of subjects enrolled	Germany: 70
Country: Number of subjects enrolled	Greece: 5

Country: Number of subjects enrolled	Hungary: 28
Country: Number of subjects enrolled	Ireland: 2
Country: Number of subjects enrolled	United States: 181
Country: Number of subjects enrolled	India: 145
Country: Number of subjects enrolled	Japan: 109
Country: Number of subjects enrolled	Ukraine: 106
Country: Number of subjects enrolled	Russian Federation: 59
Country: Number of subjects enrolled	Italy: 57
Country: Number of subjects enrolled	Korea, Republic of: 33
Country: Number of subjects enrolled	Australia: 31
Country: Number of subjects enrolled	Romania: 19
Country: Number of subjects enrolled	Switzerland: 19
Country: Number of subjects enrolled	Canada: 17
Country: Number of subjects enrolled	Taiwan: 12
Country: Number of subjects enrolled	Israel: 11
Country: Number of subjects enrolled	New Zealand: 10
Country: Number of subjects enrolled	South Africa: 8
Country: Number of subjects enrolled	Georgia: 4
Country: Number of subjects enrolled	Hong Kong: 4
Country: Number of subjects enrolled	Serbia: 4
Country: Number of subjects enrolled	Argentina: 3
Country: Number of subjects enrolled	Malaysia: 3
Country: Number of subjects enrolled	Mexico: 1
Country: Number of subjects enrolled	Singapore: 1
Worldwide total number of subjects	1351
EEA total number of subjects	550

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1262
From 65 to 84 years	89
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled at study sites in Australia, New Zealand, North America, South America, Asia and Europe. The first participant was screened on 14 November 2016. The last study visit occurred on 31 March 2020.

### Pre-assignment

Screening details:

2040 participants were screened.

### Period 1

Period 1 title	Induction Study: Up to Week 11
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	Induction Study (Cohort A): Filgotinib 200 mg
------------------	---

Arm description:

Participants in Cohort A (biologic-naïve) received filgotinib 200 milligrams (mg) and placebo-to-match (PTM) filgotinib 100 mg orally once daily for 10 weeks.

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg administered once daily for 10 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily for 10 weeks

<b>Arm title</b>	Induction Study (Cohort A): Filgotinib 100 mg
------------------	---

Arm description:

Participants in Cohort A (biologic-naïve) received filgotinib 100 mg and PTM filgotinib 200 mg orally once daily for 10 weeks.

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

100 mg administered once daily for 10 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily for 10 weeks

<b>Arm title</b>	Induction Study (Cohort A): Placebo
------------------	-------------------------------------

Arm description:

Participants in Cohort A (biologic-naive) received PTM filgotinib 200 mg and PTM filgotinib 100 mg orally once daily for 10 weeks.

Arm type	Placebo
Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily for 10 weeks

<b>Arm title</b>	Induction Study (Cohort B): Filgotinib 200 mg
------------------	---

Arm description:

Participants in Cohort B (biologic-experienced) received filgotinib 200 mg and PTM filgotinib 100 mg orally once daily for 10 weeks.

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg administered once daily for 10 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily for 10 weeks

<b>Arm title</b>	Induction Study (Cohort B): Filgotinib 100 mg
------------------	---

Arm description:

Participants in Cohort B (biologic-experienced) received filgotinib 100 mg and PTM filgotinib 200 mg orally once daily for 10 weeks.

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

100 mg administered once daily for 10 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use
Dosage and administration details:	
Placebo administered once daily for 10 weeks	
<b>Arm title</b>	Induction Study (Cohort B): Placebo

Arm description:

Participants in Cohort B (biologic-experienced) received PTM filgotinib 200 mg and PTM filgotinib 100 mg orally once daily for 10 weeks

Arm type	Placebo
Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily for 10 weeks

---------------------------	---	---	---

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 3 participants who were randomized but not treated were not included in the Safety Analysis Set.

**Period 2**

Period 2 title	Maintenance Study: Week 11 to Week 58
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

**Arms**

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Maintenance Study: FIL 200 mg From Induction FIL 200 mg

Arm description:

Participants in the Filgotinib 200 mg arm who completed the Induction Study and achieved either Endoscopy/Bleeding/Stool Frequency (EBS) remission or Mayo Clinic Score (MCS) response at Week 10 were re-randomized at Week 11 into the Maintenance Study to receive filgotinib 200 mg and PTM filgotinib 100 mg orally once daily for an additional 47 weeks (up to Week 58).

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

200 mg administered once daily up to 47 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Placebo administered once daily up to 47 weeks

<b>Arm title</b>	Maintenance Study: Placebo From Induction Filgotinib 200 mg
------------------	---

Arm description:

Participants in the Filgotinib 200 mg arm who completed the Induction Study and achieved either EBS remission or MCS response at Week 10 were re-randomized at Week 11 into the Maintenance Study to receive PTM filgotinib orally once daily for an additional 47 weeks (up to Week 58).

Arm type	Placebo
Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

**Dosage and administration details:**

Placebo administered once daily up to 47 weeks

<b>Arm title</b>	Maintenance Study: FIL 100 mg From Induction FIL 100 mg
------------------	---

**Arm description:**

Participants in the Filgotinib 100 mg arm who completed the Induction Study and achieved either EBS remission or MCS response at Week 10 were re-randomized at Week 11 into the Maintenance Study to receive filgotinib 100 mg and PTM filgotinib 200 mg orally once daily for an additional 47 weeks (up to Week 58).

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034, formerly GLPG0634
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

**Dosage and administration details:**

100 mg administered once daily up to 47 weeks

Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

**Dosage and administration details:**

Placebo administered once daily up to 47 weeks

<b>Arm title</b>	Maintenance Study: Placebo From Induction Filgotinib 100 mg
------------------	---

**Arm description:**

Participants in the Filgotinib 100 mg arm who completed the Induction Study and achieved either EBS remission or MCS response at Week 10 were rerandomized at Week 11 into the Maintenance Study to receive PTM filgotinib orally once daily for an additional 47 weeks (up to Week 58).

Arm type	Placebo
Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

**Dosage and administration details:**

Placebo administered once daily up to 47 weeks

<b>Arm title</b>	Maintenance Study: Placebo From Induction Placebo
------------------	---

**Arm description:**

Participants in the Placebo arm who completed the Induction Study and achieved either EBS remission or MCS response at Week 10 were re-randomized at Week 11 into the Maintenance Study to receive PTM filgotinib orally once daily for an additional 47 weeks (up to Week 58).

Arm type	Placebo
Investigational medicinal product name	PTM filgotinib
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

**Dosage and administration details:**

Placebo administered once daily up to 47 weeks

<b>Number of subjects in period 2<sup>[2]</sup></b>	Maintenance Study: FIL 200 mg From Induction FIL 200 mg	Maintenance Study: Placebo From Induction Filgotinib 200 mg	Maintenance Study: FIL 100 mg From Induction FIL 100 mg
Started	202	99	179
Completed	150	41	104

### **Primary: Induction Study: Percentage of Participants Who Achieved EBS Remission at Week 10**

End point title	Induction Study: Percentage of Participants Who Achieved EBS Remission at Week 10
End point description: EBS remission was defined as an endoscopic subscore of 0 or 1; rectal bleeding subscore of 0; and at least a 1-point decrease in stool frequency from baseline to achieve a subscore of 0 or 1. Endoscopic subscore range: 0 to 3, where 0 = normal or inactive disease and 3 = severe disease (spontaneous bleeding, ulceration); rectal bleeding subscore range: 0 to 3, where 0 = no blood seen and 3 = blood alone passes; stool frequency subscore range: 0 to 3, where 0 = normal number of stools and 3 = at least 5 stools more than normal. Total score for EBS ranged from 0 to 9 (sum of all subscores), with higher scores indicating more severe disease. Full Analysis Set (FAS) for the Induction study (Cohorts A and B) included all randomised participants who took at least 1 dose of study drug in the corresponding Induction study.	
End point type	Primary
End point timeframe: Week 10

## Primary: Maintenance Study: Percentage of Participants Who Achieved EBS Remission at Week 58

End point title	Maintenance Study: Percentage of Participants Who Achieved EBS Remission at Week 58
-----------------	---

### End point description:

EBS remission was defined as an endoscopic subscore of 0 or 1; rectal bleeding subscore of 0; and at least a 1-point decrease in stool frequency from baseline to achieve a subscore of 0 or 1. Endoscopic subscore range: 0 to 3, where 0 = normal or inactive disease and 3 = severe disease (spontaneous bleeding, ulceration); rectal bleeding subscore range: 0 to 3, where 0 = no blood seen and 3 = blood alone passes; stool frequency subscore range: 0 to 3, where 0 = normal number of stools and 3 = at least 5 stools more than normal. Total score for EBS ranged from 0 to 9 (sum of all subscores), with higher scores indicating more severe disease. Full Analysis Set for the Maintenance Study included all participants randomised to either the filgotinib 200 mg or filgotinib 100 mg treatment groups in the Induction Study (Cohorts A and B) who achieved EBS remission or MCS response at Week 10, were rerandomised, and took at least 1 dose of study drug in the Maintenance Study.

### **Secondary: Induction Study: Percentage of Participants Who Achieved MCS Remission at Week 10**

End point title	Induction Study: Percentage of Participants Who Achieved MCS Remission at Week 10
-----------------	---

End point description:

MCS remission was defined as having a MCS of 2 or less and no single subscore higher than 1. The MCS was composed of subscores from endoscopy (range: 0 to 3, where 0 = normal or inactive disease and 3 = severe disease [spontaneous bleeding, ulceration]), rectal bleeding (range: 0 to 3, where 0 = no blood seen and 3 = blood alone passes), stool frequency (range: 0 to 3, where 0 = normal number of stools and 3 = at least 5 stools more than normal), and physician's global assessment (PGA). The PGA acknowledged the participant's daily recollection of abdominal discomfort and general sense of wellbeing, and other observations, such as physical findings and the participant's performance status. The PGA score ranged from 0 to 3 with higher score indicating severe disease. Total score for MCS ranged from 0 to 12 (sum of all subscores), with higher scores indicating more severe disease. Participants in the Full Analysis Set for the Induction Study (Cohorts A and B) were analysed.

## Secondary: Maintenance Study: Percentage of Participants Who Achieved MCS Remission at Week 58

End point title	Maintenance Study: Percentage of Participants Who Achieved MCS Remission at Week 58
End point description: MCS remission was defined as having a MCS of 2 or less and no single subscore higher than 1. The MCS was composed of subscores from endoscopy (range: 0 to 3, where 0 = normal or inactive disease and 3 = severe disease [spontaneous bleeding, ulceration]), rectal bleeding (range: 0 to 3, where 0 = no blood seen and 3 = blood alone passes), stool frequency (range: 0 to 3, where 0 = normal number of stools and 3 = at least 5 stools more than normal), and PGA. The PGA acknowledged the participant's daily recollection of abdominal discomfort and general sense of wellbeing, and other observations, such as physical findings and the participant's performance status. The PGA score ranged from 0 to 3 with higher score indicating the severe disease. Total score for MCS ranged from 0 to 12 (sum of all	

subscores), with higher scores indicating more severe disease. Participants in the Full Analysis Set for the Maintenance Study were analysed.

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 September 2016	<p>Amendment 1:</p> <ul style="list-style-type: none"><li>• Updates were made in the text in response to US Food and Drug Administration (FDA) requests.</li><li>• Updated Study Procedures Table and footnotes to reflect changes made to study visits assessments/procedures in the protocol.</li><li>• Protocol GS-US-418-3899 title changed from open-label extension to long-term extension (LTE) study.</li><li>• Sections were updated with emerging relevant nonclinical and clinical data.</li><li>• A novel histologic endpoint was added to account for the evolution of understanding and thinking surrounding histologic healing.</li><li>• Criteria for discontinuation for febrile neutropenia, anemia, and international normalized ratio (INR) value when considering hepatic laboratory changes were added to ensure subject safety. Additional text surrounding departure from the study clarified that pregnant subjects were to discontinue the study and that early termination (ET) and posttreatment visits were requested for subjects withdrawing.</li><li>• An exclusion criterion of severe hepatic impairment defined by Child-Pugh Class C was added.</li></ul>
27 October 2016	<p>Amendment 2:</p> <ul style="list-style-type: none"><li>• Updates were made in the text in response to the Voluntary Harmonization Procedure (VHP) request to include MCS remission (alternative definition) as a secondary endpoint at Week 10 and Week 58.</li><li>• Text was updated to clarify that lymphocyte-depleting therapies and natalizumab were prohibited concomitant medications for the duration of the study.</li><li>• A rationale for the exclusion of potent P-glycoprotein (P-gp) inducers was added upon VHP request.</li><li>• Additional Week 26 and Week 58 electrocardiogram (ECG) procedures were added upon VHP request.</li><li>• Text was added to clarify that coagulation parameters should be tested in cases where either aspartate or alanine aminotransferase (AST/ALT) was &gt; 3 * upper limit of normal (ULN), to enable compliance with subject discontinuation parameters based on AST/ALT and INR.</li></ul>

15 June 2017	<p>Amendment 3:</p> <ul style="list-style-type: none"> <li>• Updates were made in the text in response to the South Korean Ministry of Food and Drug Safety request that the use of filgotinib 200 mg in males in Korea be limited to subjects who had failed 2 classes of biologic therapies (any TNF-<math>\alpha</math> antagonist and vedolizumab).</li> <li>• Guidance from investigators regarding rate of steroid tapering was added to text and clarity was added regarding handling of subjects who exceed baseline steroid doses.</li> <li>• Sections were updated with emerging relevant clinical and pipeline data.</li> <li>• Text was updated to reflect that subjects were up to date on colorectal cancer surveillance processes prior to entering the screening period.</li> <li>• Text was added to clarify the type of colectomies that were excluded</li> <li>• Clarity around tuberculosis (TB) eligibility was added.</li> <li>• Instructions for recording the Normal Stool Count and ensuring eligibility prior to endoscopy were added.</li> </ul>
05 March 2018	<p>Amendment 4:</p> <ul style="list-style-type: none"> <li>• The number of sites was increased to ensure that a target number of subjects were enrolled in the study considering the accumulated enrollment rate.</li> <li>• Provided additional clarity on inclusion/exclusion criteria including those for hepatitis.</li> <li>• Provided additional flexibility for enhanced safety monitoring (with increased flexibility for data monitoring committee [DMC] meeting scheduling and suggested infectious workups for disease worsening).</li> </ul>
02 April 2019	<p>Amendment 5:</p> <ul style="list-style-type: none"> <li>• Removed plans for interim unblinded analysis for a prespecified sponsor's executive team review.</li> </ul>

Notes:

## Interruptions (globally)

Were there any global interruptions to the trial? No

## Limitations and caveats

None reported
