

Clinical trial results:

A Randomized Double-blind Phase 3 Study of Avelumab in Combination With Standard of Care Chemoradiotherapy (Cisplatin Plus Definitive Radiation Therapy) Versus Standard of Care Chemoradiotherapy in the Front-line Treatment of Patients With Locally Advanced Squamous cell Carcinoma of The Head and Neck.

Summary

EudraCT number	2016-001456-21

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 February 2021
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	25 August 2020
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

To demonstrate that treatment with avelumab in combination with Standard of Care Chemotherapy (SOC CRT) was superior to SOC CRT alone in prolonging Progression-free Survival (PFS) in front-line subjects with high risk, locally advanced squamous cell carcinoma of the head and neck (LA SCCHN) who were candidates for definitive CRT with cisplatin.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Council for Harmonisation (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	28 November 2016
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	28 Months
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Canada: 1
Country: Number of subjects enrolled	United States: 173
Country: Number of subjects enrolled	China: 45
Country: Number of subjects enrolled	Japan: 51

Worldwide total number of subjects	697
EEA total number of subjects	249

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	495
From 65 to 84 years	201
85 years and over	1

Subject disposition

Recruitment

Recruitment details:

Study had 3 sequential treatment phases: Lead-in, CRT and Maintenance. There were 3 treatments administered during CRT phase: Blinded therapy (Avelumab/placebo), Cisplatin and IMRT. Only blinded therapy (Avelumab/placebo) was administered during Lead-in and Maintenance phases. Reasons for discontinuation are summarized separately for each treatment.

Pre-assignment

Screening details:

If a subject discontinued all 3 treatments due to death, then death is included as reason for discontinuation in each treatment disposition summary. All deaths that are reported as reason for discontinuation at any phase are included in all-cause mortality summary.

Period 1

Period 1 title	Lead-In Phase (7 Days)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Subject

Arms

Are arms mutually exclusive?	Yes
Arm title	Avelumab + Standard of Care Chemotherapy (SOC CRT)

Arm description:

Subjects with locally advanced squamous cell carcinoma of the head and neck (LA SCCHN) were administered with avelumab 10 milligram per kilogram (mg/kg) intravenous (IV) injection on Day 1 of the Lead-in Phase (7 days) and on Days 8, 25 and 39 in CRT phase (63 days). In CRT phase subjects also received SOC CRT: cisplatin 100 milligram per square meter (mg/m²) on Days 1, 22, 43 and intensity-modulated radiation therapy (IMRT) 5 days a week. CRT phase was followed by maintenance phase (12 months) in which subjects received avelumab 10 mg/kg IV injection every 2 weeks. All subjects were followed for safety 30 days after the last study treatment administration or until the time of initiation of new systemic anticancer treatment. If any concern arose subjects were followed up on Day 90 via telephone call thereafter in long term (LT) follow up period every 16 weeks for survival and new systemic anticancer treatment.

Arm type	Experimental
Investigational medicinal product name	Avelumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects were administered with avelumab 10 mg/kg IV injection on Day 1 of the Lead-in Phase.

Arm title	Placebo + SOC CRT
------------------	-------------------

Arm description:

Subjects with LA SCCHN were administered with placebo IV injection matched to avelumab on Day 1 of the Lead-in Phase (7 days) and on Days 8, 25 and 39 in CRT phase (63 days). In CRT phase subjects also received SOC CRT: cisplatin mg/m² on Days 1, 22 and 43 + IMRT 5 days a week. CRT phase was followed by maintenance phase (12 months) in which subjects received placebo IV injection every 2 weeks. All subjects were followed for safety 30 days after the last study treatment administration or until the time of initiation of new systemic anticancer treatment. If any concern arose subjects were followed up on Day 90 via telephone call thereafter in long term follow up period every 16 weeks for survival and new systemic anticancer treatment.

Arm type	Placebo
----------	---------

Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Injection
Routes of administration	Intravenous use

Dosage and administration details:

Subjects were administered with placebo IV injection matched to avelumab on Day 1 of the Lead-in Phase (7 days).

Number of subjects in period 1	Avelumab + Standard of Care Chemotherapy (SOC CRT)	Placebo + SOC CRT
Started	350	347
Safety Analysis Set	348	344
Completed	345	343
Not completed	5	4

Reporting group description:

Subjects with locally advanced squamous cell carcinoma of the head and neck (LA SCCHN) were administered with avelumab 10 milligram per kilogram (mg/kg) intravenous (IV) injection on Day 1 of the Lead-in Phase (7 days) and on Days 8, 25 and 39 in CRT phase (63 days). In CRT phase subjects also received SOC CRT: cisplatin 100 milligram per square meter (mg/m²) on Days 1, 22, 43 and intensity-modulated radiation therapy (IMRT) 5 days a week. CRT phase was followed by maintenance phase (12 months) in which subjects received avelumab 10 mg/kg IV injection every 2 weeks. All subjects were followed for safety 30 days after the last study treatment administration or until the time of initiation of new systemic anticancer treatment. If any concern arose subjects were followed up on Day 90 via telephone call thereafter in long term (LT) follow up period every 16 weeks for survival and new systemic anticancer treatment.

Primary: Progression-free Survival (PFS) per Modified Response Evaluation Criteria in Solid Tumors v1.1 (RECIST v1.1) as Assessed by Investigator

End point title	Progression-free Survival (PFS) per Modified Response Evaluation Criteria in Solid Tumors v1.1 (RECIST v1.1) as Assessed by Investigator
-----------------	--

End point description:

PFS= Time (in months) from date of randomization to first documented objective PD per modified RECIST v1.1 as assessed by Investigator or death (by any cause), whichever occurred first. Analysis was performed by Kaplan Meier method. PD=any of following: 1) Locoregional PD confirmed by pathology to verify radiographic changes represent true tumor progression and not radiation effects or non-malignant contrast enhancement. 2) Locoregional clinically detectable progression confirmed by pathology. 3) Salvage of primary tumor with tumor present on final pathology. 4) Salvage neck dissection >20 weeks after completion of CRT with tumor present on final pathology. 5) Metastatic PD. PFS data was censored on date of last adequate tumor assessment for subjects with no PFS event. FAS used. 99999=Median and upper limit of 95% CI were not reached at time of PCD. At time of pre-specified interim analysis for endpoint, futility boundaries for Avelumab +SOC CRT arm was crossed and study terminated.

End point type	Primary

Secondary: Objective Response Rate (ORR) per Modified RECIST v1.1 as Assessed by Investigator

End point title	Objective Response Rate (ORR) per Modified RECIST v1.1 as Assessed by Investigator
-----------------	--

End point description:

Objective response (OR) was defined as a complete response (CR) or partial response (PR) per RECIST v1.1 recorded from randomization until disease progression per modified RECIST v1.1 or death due to any cause. A subject was considered to have achieved an OR if the subject had a CR or PR which did not need to be confirmed at a subsequent assessment. CR for target disease: complete disappearance of all target lesions with the exception of nodal disease. All target nodes must decrease to normal size (short axis less than [$<$] 10 millimeter [mm]). CR for non-target disease: disappearance of all non-target lesions and normalization of tumor marker levels. All lymph nodes must be 'normal' in size (<10 mm short axis). PR: Greater than or equal to (\geq) 30% decrease under baseline of the sum of diameters of all target measurable lesions. The ORR was estimated by dividing the number of subjects with OR (CR or PR) by the number of subjects randomized. FAS included all randomized subjects.

Secondary: Change from Baseline in the European Quality of Life- 5 Dimension-5 Levels (EQ-5D-5L) Index Score at CRT Phase and Maintenance Phase

End point title	Change from Baseline in the European Quality of Life- 5 Dimension-5 Levels (EQ-5D-5L) Index Score at CRT Phase and Maintenance Phase
-----------------	--

End point description:

EQ-5D-5L is a standardized subject completed questionnaire that measures health status in terms of a single index value or utility score. EQ-5D-5L consisted of two components: a health state profile (descriptive system) and a visual analogue scale (VAS) in which subjects rate their overall health status from 0 (worst imaginable) to 100 (best imaginable), where higher scores indicated better health status. EQ-5D health state profile is comprised of 5 dimensions: mobility, self-care, usual activities, pain/discomfort and anxiety/depression. Each dimension has 5 response levels: 1=no problems, 2=slight problems, 3=moderate problems, 4=severe problems and 5=extreme problems. EQ-5D-5L health status index score range between 0 to 1. Higher score indicated better health status. FAS included all randomized subjects. Overall Number of Subjects Analysed=subjects evaluable for this endpoint and "n" signifies subjects evaluable for each specified category at each specified time point.

Reporting groups

Reporting group title	Avelumab + Standard of Care Chemotherapy (SOC CRT)
-----------------------	--

Reporting group description:

Participants with locally advanced squamous cell carcinoma of the head and neck (LA SCCHN) were administered with avelumab 10 milligram per kilogram (mg/kg) intravenous (IV) injection on Day 1 of the Lead-in Phase (7 days) and on Days 8, 25 and 39 in CRT phase (63 days). In CRT phase participants also received SOC CRT: cisplatin 100 milligram per square meter (mg/m²) on Days 1, 22, 43 and intensity-modulated radiation therapy (IMRT) 5 days a week. CRT phase was followed by maintenance phase (12 months) in which participants received avelumab 10 mg/kg IV injection every 2 weeks. All participants were followed for safety 30 days after the last study treatment administration or until the time of initiation of new systemic anticancer treatment. If any concern arose participants were followed up on Day 90 via telephone call thereafter in long term (LT) follow up period every 16 weeks for survival and new systemic anticancer treatment.

Reporting group title	Placebo + SOC CRT
-----------------------	-------------------

Reporting group description:

Participants with LA SCCHN were administered with placebo IV injection matched to avelumab on Day 1 of the Lead-in Phase (7 days) and on Days 8, 25 and 39 in CRT phase (63 days). In CRT phase participants also received SOC CRT: cisplatin mg/m² on Days 1, 22 and 43 + IMRT 5 days a week. CRT phase was followed by maintenance phase (12 months) in which participants received placebo IV injection every 2 weeks. All participants were followed for safety 30 days after the last study treatment administration or until the time of initiation of new systemic anticancer treatment. If any concern arose participants were followed up on Day 90 via telephone call thereafter in long term follow up period every 16 weeks for survival and new systemic anticancer treatment.

Oral pain			
subjects affected / exposed	39 / 348 (11.21%)	43 / 344 (12.50%)	
occurrences (all)	69	78	
Stomatitis			
subjects affected / exposed	92 / 348 (26.44%)	96 / 344 (27.91%)	
occurrences (all)	167	184	
Vomiting			
subjects affected / exposed	112 / 348 (32.18%)	121 / 344 (35.17%)	
occurrences (all)	195	210	
Skin and subcutaneous tissue disorders			
Alopecia			
subjects affected / exposed	22 / 348 (6.32%)	20 / 344 (5.81%)	
occurrences (all)	23	20	
Dermatitis			
subjects affected / exposed	52 / 348 (14.94%)	42 / 344 (12.21%)	
occurrences (all)	88	67	
Dry skin			
subjects affected / exposed	18 / 348 (5.17%)	24 / 344 (6.98%)	
occurrences (all)	19	28	

Erythema			
subjects affected / exposed	24 / 348 (6.90%)	27 / 344 (7.85%)	
occurrences (all)	30	30	
Pruritus			
subjects affected / exposed	38 / 348 (10.92%)	24 / 344 (6.98%)	
occurrences (all)	51	38	
Rash			
subjects affected / exposed	43 / 348 (12.36%)	36 / 344 (10.47%)	
occurrences (all)	67	51	
Renal and urinary disorders			
Acute kidney injury			
subjects affected / exposed	18 / 348 (5.17%)	22 / 344 (6.40%)	
occurrences (all)	42	37	
Endocrine disorders			
Hyperthyroidism			
subjects affected / exposed	24 / 348 (6.90%)	7 / 344 (2.03%)	
occurrences (all)	28	7	
Hypothyroidism			
subjects affected / exposed	51 / 348 (14.66%)	45 / 344 (13.08%)	
occurrences (all)	64	51	
Musculoskeletal and connective tissue disorders			
Arthralgia			
subjects affected / exposed	17 / 348 (4.89%)	20 / 344 (5.81%)	
occurrences (all)	18	25	
Neck pain			
subjects affected / exposed	30 / 348 (8.62%)	25 / 344 (7.27%)	
occurrences (all)	45	28	
Infections and infestations			
Oral candidiasis			
subjects affected / exposed	25 / 348 (7.18%)	31 / 344 (9.01%)	
occurrences (all)	36	40	
Pneumonia			
subjects affected / exposed	36 / 348 (10.34%)	25 / 344 (7.27%)	
occurrences (all)	43	31	
Upper respiratory tract infection			

subjects affected / exposed occurrences (all)	24 / 348 (6.90%) 28	21 / 344 (6.10%) 23	
Metabolism and nutrition disorders			
Decreased appetite			
subjects affected / exposed	128 / 348 (36.78%)	124 / 344 (36.05%)	
occurrences (all)	211	194	
Dehydration			
subjects affected / exposed	31 / 348 (8.91%)	29 / 344 (8.43%)	
occurrences (all)	38	33	
Hyperglycaemia			
subjects affected / exposed	31 / 348 (8.91%)	33 / 344 (9.59%)	
occurrences (all)	65	74	
Hyperkalaemia			
subjects affected / exposed	34 / 348 (9.77%)	32 / 344 (9.30%)	
occurrences (all)	49	66	
Hypoalbuminaemia			
subjects affected / exposed	42 / 348 (12.07%)	36 / 344 (10.47%)	
occurrences (all)	88	73	
Hypocalcaemia			
subjects affected / exposed	29 / 348 (8.33%)	23 / 344 (6.69%)	
occurrences (all)	42	37	
Hypokalaemia			
subjects affected / exposed	87 / 348 (25.00%)	71 / 344 (20.64%)	
occurrences (all)	179	130	
Hypomagnesaemia			
subjects affected / exposed	93 / 348 (26.72%)	84 / 344 (24.42%)	
occurrences (all)	178	173	
Hyponatraemia			
subjects affected / exposed	83 / 348 (23.85%)	68 / 344 (19.77%)	
occurrences (all)	183	164	
Hypophosphataemia			
subjects affected / exposed	23 / 348 (6.61%)	32 / 344 (9.30%)	
occurrences (all)	41	46	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

If a subject discontinued all 3 treatments of CRT phase due to death then death is included as discontinuation reason in each treatment disposition summary. Deaths reported as reason of discontinuation at any phase are included in all-cause mortality.

Notes:
