

Clinical trial results:

A Double-Blind, Randomized, Two Arm Phase 2 Study of Nivolumab in Combination with Ipilimumab versus Nivolumab in Combination with Ipilimumab Placebo In Recurrent or Metastatic Squamous Cell Carcinoma of the Head and Neck (SCCHN) (CheckMate 714: CHECKpoint pathway and nivoluMAb clinical Trial Evaluation 714)

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	22 April 2022
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	11 March 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the ORR and assess the DOR of the treatment of nivolumab in combination with ipilimumab vs nivolumab in combination with ipilimumab placebo, as determined by a blinded independent central review (BICR) using Response Evaluation Criteria In Solid Tumors (RECIST 1.1) criteria, for first-line treatment of recurrent or metastatic SCCHN in the platinum refractory setting.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and in compliance with all International Conference on Harmonization Good Clinical Practice Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were followed.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 September 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 1
Country: Number of subjects enrolled	Belgium: 12
Country: Number of subjects enrolled	Brazil: 45
Country: Number of subjects enrolled	Canada: 46
Country: Number of subjects enrolled	Chile: 1
Country: Number of subjects enrolled	Finland: 2
Country: Number of subjects enrolled	France: 79
Country: Number of subjects enrolled	Ireland: 10
Country: Number of subjects enrolled	Italy: 1
Country: Number of subjects enrolled	Mexico: 13
Country: Number of subjects enrolled	Netherlands: 13
Country: Number of subjects enrolled	Norway: 20
Country: Number of subjects enrolled	Romania: 37
Country: Number of subjects enrolled	Russian Federation: 10
Country: Number of subjects enrolled	South Africa: 1
Country: Number of subjects enrolled	Spain: 22
Country: Number of subjects enrolled	Sweden: 1
Country: Number of subjects enrolled	Turkey: 3
Country: Number of subjects enrolled	United Kingdom: 19

Country: Number of subjects enrolled	United States: 69
Country: Number of subjects enrolled	Czechia: 20
Worldwide total number of subjects	425
EEA total number of subjects	217

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	301
From 65 to 84 years	122
85 years and over	2

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

425 randomized and 423 participants treated.

Period 1

Period 1 title	Randomization
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Treatment A - Platinum Refractory Subgroup
------------------	--

Arm description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) that has recurred during or less than 6 months after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab 1 mg/kg Q6W

Arm type	Experimental
Investigational medicinal product name	nivolumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

100mg (10mg/mL)

Investigational medicinal product name	ipilimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

200mg (5mg/mL)

Arm title	Treatment B - Platinum Refractory Subgroup
------------------	--

Arm description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) that has recurred during or less than 6 months after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab-Placebo Q6W

Arm type	Experimental
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

(0.9% sodium chloride injection or 5% dextrose injection)

Investigational medicinal product name	nivolumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use
Dosage and administration details: 100mg (10mg/mL)	
Arm title	Treatment A - Platinum Eligible Subgroup

Arm description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) who are platinum naive or have recurred 6 months or more after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab 1 mg/kg Q6W

Arm type	Experimental
Investigational medicinal product name	ipilimumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Intravenous use

Dosage and administration details:

200mg (5mg/mL)

Primary: Objective Response Rate (ORR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup

End point title	Objective Response Rate (ORR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup ^[1]
-----------------	--

End point description:

ORR is defined as best overall response (BOR) of a complete response (CR) or partial response (PR) divided by the number of randomized participants for each treatment group.

Complete Response (CR): Disappearance of all target lesions. Any pathological lymph nodes(whether target or non-target) must have reduction in short axis to < 10 mm.

Partial Response (PR): At least a 30% decrease in the sum of diameters of target lesions, taking as reference the baseline sum diameters.

End point type	Primary
----------------	---------

End point timeframe:

Approximately up to 30 months (from FPFV to Data base lock)

Notes:

[1] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoints are specific for subgroups not baseline period

End point values	Treatment A - Platinum Refractory Subgroup	Treatment B - Platinum Refractory Subgroup

Secondary: Progression Free Survival (PFS) - Platinum Eligible subgroup based on HPV p-16 Status

End point title	Progression Free Survival (PFS) - Platinum Eligible subgroup based on HPV p-16 Status ^[25]
-----------------	---

End point description:

the time from randomization to the date of first documented disease progression, or death due to any cause, whichever occurs first.

Progressive Disease (PD): At least a 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum on study (this includes the baseline sum if that is the smallest on study). In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm. (Note: the appearance of one or more new lesions is also considered progression).

End point type	Secondary
----------------	-----------

End point timeframe:

From randomization to disease progression or death. Approximately 63 Months

Notes:

[25] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoints are specific for subgroups not baseline period

End point values	Treatment A - Platinum Eligible Subgroup	Treatment B - Platinum Eligible Subgroup		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	123	61		
Units: Months				
median (confidence interval 95%)				

Positive	2.92 (1.41 to 6.60)	6.83 (1.38 to 49.84)		
Negative	2.66 (1.51 to 4.14)	2.83 (1.51 to 4.24)

[36] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoints are specific for subgroups not baseline period

End point values	Treatment A - Platinum Refractory Subgroup	Treatment B - Platinum Refractory Subgroup		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	159	82		
Units: percentage of participants				
number (confidence interval 95%)	14.5 (9.4 to 20.9)	20.7 (12.6 to 31.1)		

Statistical analyses

Statistical analysis title	Statistical Analysis
Statistical analysis description: Treatment A over Treatment B	
Comparison groups	Treatment A - Platinum Refractory Subgroup v Treatment B - Platinum Refractory Subgroup
Number of subjects included in analysis	241
Analysis specification	Post-hoc
Analysis type	
Method	Mantel-Haenszel
Parameter estimate	Odds ratio (OR)
Point estimate	0.64
Confidence interval	
level	95 %
sides	2-sided
lower limit	0.32
upper limit	1.29

Post-hoc: Duration of Response (DOR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup - Post Hoc Analysis

End point title	Duration of Response (DOR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup - Post Hoc Analysis ^[37]
-----------------	--

End point description:

The time between the date of first confirmed response to the date of the first documented tumor progression, or death due to any cause, whichever occurs first.

Progressive Disease (PD): At least a 20% increase in the sum of diameters of target lesions, taking as reference the smallest sum on study (this includes the baseline sum if that is the smallest on study). In addition to the relative increase of 20%, the sum must also demonstrate an absolute increase of at least 5 mm. (Note: the appearance of one or more new lesions is also considered progression).

Here "99999" signifies NA

End point type	Post-hoc
----------------	----------

End point timeframe:

From randomization to disease progression or death. Approximately 63 Months

Notes:

[37] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoints are specific for subgroups not baseline period

End point values	Treatment A - Platinum Refractory Subgroup	Treatment B - Platinum Refractory Subgroup		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	17		
Units: Months				
median (confidence interval 95%)	39.43 (26.71 to 99999)	11.07 (4.17 to 38.51)		

Statistical analyses

No statistical analyses for this end point

Post-hoc: Time to Response (TTR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup - Post Hoc Analysis

End point title	Time to Response (TTR) as determined by Blinded Independent Central Review (BIRC) - Platinum refractory subgroup - Post Hoc Analysis ^[38]
-----------------	--

End point description:

Time to Response (TTR) for participants demonstrating a response (either CR or PR) was defined as the time from the date of randomization to the date of the first confirmed response.

Complete Response (CR): Disappearance of all target lesions. Any pathological lymph nodes(whether target or non-target) must have reduction in short axis to < 10 mm.

Partial Response (PR): At least a 30% decrease in the sum of diameters of target lesions, taking as reference the baseline sum diameters.

End point type	Post-hoc
----------------	----------

End point timeframe:

From randomization to a confirmed response. Approximately 35 Months

Notes:

[38] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoints are specific for subgroups not baseline period

End point values	Treatment A - Platinum Refractory Subgroup	Treatment B - Platinum Refractory Subgroup		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	23	17		
Units: Months				
median (full range (min-max))	2.63 (1.1 to 34.3)	1.71 (1.2 to 7.7)		

Statistical analyses

No statistical analyses for this end point

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse Events and Serious Adverse Events: Approximately 32 months

All-Cause mortality: Approximately 65 months

Adverse event reporting additional description:

Adverse Event and Serious Adverse Events are measured from first dose to last dose + 100 days.

All-Cause mortality will be measured from the time of randomization to the end of study.

Assessment type	Systematic

Reporting groups

Reporting group title	Treatment A - Platinum Refractory Subgroup
-----------------------	--

Reporting group description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) that has recurred during or less than 6 months after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab 1 mg/kg Q6W

Reporting group title	Treatment B - Platinum Eligible Subgroup
-----------------------	--

Reporting group description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) who are platinum naive or have recurred 6 months or more after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab-Placebo Q6W

Reporting group title	Treatment A - Platinum Eligible Subgroup
-----------------------	--

Reporting group description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) who are platinum naive or have recurred 6 months or more after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab 1 mg/kg Q6W

Reporting group title	Treatment B - Platinum Refractory Subgroup
-----------------------	--

Reporting group description:

Participants with histologically confirmed Squamous Cell Carcinoma of the Head and Neck (SCCHN) that has recurred during or less than 6 months after completion of previous platinum-based chemotherapy. Treated with Nivolumab 3 mg/kg Q2W + Ipilimumab-Placebo Q6W

Notes:

[183] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Number exposed is reflecting all randomized participants

[184] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: Number exposed is reflecting all randomized participants

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 July 2016	PK and IMG Follow up visit samples no longer required to be collected; Updated Biomarker sample collection schedule; Updated Contraceptive language; Updated Algorithms for Renal, Hepatic, Pulmonary and Skin to match with updated Nivolumab IB v15 (includes Nivo IB 15 erratum update). Other minor edits, clarifications, corrections
27 June 2017	<ol style="list-style-type: none">1. Increase in the size of the platinum eligible population in order to provide greater statistical precision2. Alignment of protocol with responses to regulatory authorities3. Minor changes to eligibility criteria and study processes4. Clarification of outstanding issues and correction of typographical errors
14 November 2017	<p>To clarify additional detail about existing endpoints</p> <p>To provide clarity on the planned interim descriptive analyses for the platinum eligible cohort.</p> <p>Necessary window shortened in light of evolving data on radiotherapy plus immuno-oncology agents. Clarification of applicability to palliative and curative settings.</p> <p>To provide clarity, eliminate redundancy, and to align with the nivolumab program standards.</p>

25 May 2018	<p>Tumor mutational burden has been shown to be a predictive biomarker of efficacy for checkpoint inhibitors in several tumors. Therefore, it is important to elevate this endpoint</p> <p>To establish the methods which will be used to analyze the primary and secondary objective of the study.</p> <p>Provide clarification to sites regarding time permitted for treatment beyond progression, to align with recent evidence (CA209153) indicating limited activity of retreatment.</p> <p>Myocarditis is a potential serious adverse event for immunooncology agents. This guidance was included to reduce the risk of serious outcomes for subjects.</p> <p>To provide clarity that the sponsor will remain blinded to both cohorts until the time of the interim analysis.</p>
