Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	17 October 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	17 October 2018
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The main objectives of this study were to characterize the pharmacokinetics (PK) and to confirm the population PK (popPK) model derived from healthy volunteers in hospitalized adults infected with respiratory syncytial virus (RSV) (Part 1) and to determine in hospitalized adults infected with RSV the dose response relationship of multiple regimens of lumicitabine on antiviral activity based on nasal RSV shedding using quantitative reverse transcriptase-polymerase chain reaction (qRT-PCR) assay (Part 2).

Protection of trial subjects:

This study was conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki and that are consistent with Good Clinical Practices and applicable regulatory requirements. Safety was evaluated throughout the study and included monitoring of adverse events (AEs), clinical laboratory tests, vital signs/peripheral capillary oxygen saturation (SpO2) measurements, physical examinations, and electrocardiograms (ECGs).

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	08 November 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Argentina: 2
Country: Number of subjects enrolled	Australia: 7
Country: Number of subjects enrolled	Spain: 3
Country: Number of subjects enrolled	France: 7
Country: Number of subjects enrolled	United Kingdom: 1
Country: Number of subjects enrolled	Japan: 9
Country: Number of subjects enrolled	Korea, Republic of: 4
Country: Number of subjects enrolled	Malaysia: 2
Country: Number of subjects enrolled	Poland: 2
Country: Number of subjects enrolled	Sweden: 7
Country: Number of subjects enrolled	Taiwan: 3
Country: Number of subjects enrolled	United States: 2
Worldwide total number of subjects	49
EEA total number of subjects	20

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	20
From 65 to 84 years	22
85 years and over	7

Subject disposition

Recruitment

Recruitment details:

Sponsor halted screening and enrollment in study on 22 June 2018 due to emerging lumicitabine nonclinical data. On 17 October 2018, study was stopped prematurely by Sponsor as a precautionary measure, to allow further evaluation of new nonclinical pharmacokinetic (PK) and safety findings and determine their relevance to human studies.

Pre-assignment

Screening details:

A total of 49 subjects were randomized and treated (2 subjects in Part 0, 36 subjects in Part 1 and 11 subjects in Part 2). Analyses were conducted on pooled groups across the 3 study parts.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Subjects received a single loading dose (LD) (Dose 1) of matching placebo tablet orally on Day 1 followed by nine maintenance doses (MD) (Doses 2 to 10) of matching placebo tablets orally twice daily (bid) from Day 1/2 to Day 5/6 (depending on the timing of the LD administration).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received a single LD followed by nine MDs (Doses 2 to 10) of matched placebo bid.

Arm title	750 mg LD / 250 mg MD Lumicitabine
------------------	------------------------------------

Arm description:

Subjects received a single 750 milligram (mg) LD (Dose 1) of lumicitabine tablet orally followed by nine MD (Doses 2 to 10) of 250 mg lumicitabine tablets orally bid from Day 1/2 to Day 5/6 (depending on the timing of the LD administration).

Arm type	Experimental
Investigational medicinal product name	Lumicitabine 250 mg
Investigational medicinal product code	
Other name	JNJ-64041575, ALS-008176
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received nine 250 mg MDs (Doses 2 to 10) of lumicitabine bid.

Investigational medicinal product name	Lumicitabine 750 mg
Investigational medicinal product code	
Other name	JNJ-64041575, ALS-008176
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received a single 750 mg LD of lumicitabine.

Arm title	1000 mg LD / 500 mg MD Lumicitabine
------------------	-------------------------------------

Arm description:

Subjects received a single 1000 mg LD (Dose 1) of lumicitabine tablet orally followed by nine MD (Doses 2 to 10) of 500 mg lumicitabine tablets orally bid from Day 1/2 to Day 5/6 (depending on the timing of the LD administration).

Arm type	Experimental
Investigational medicinal product name	Lumicitabine 1000 mg
Investigational medicinal product code	
Other name	JNJ-64041575, ALS-008176
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received a single 1000 mg LD of lumicitabine.

Investigational medicinal product name	Lumicitabine 500 mg
Investigational medicinal product code	
Other name	JNJ-64041575, ALS-008176
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Subjects received nine 500 mg MDs (Doses 2 to 10) of lumicitabine bid.

Number of subjects in period 1	Placebo	750 mg LD / 250 mg MD Lumicitabine	1000 mg LD / 500 mg MD Lumicitabine
Started	16	27	6
Completed	15	24	6
Not completed	1	3	0

Secondary: Time to Return to Pre-RSV Functional Status as Assessed by KATZ Activities of Daily Living (ADL) Score

End point title	Time to Return to Pre-RSV Functional Status as Assessed by KATZ Activities of Daily Living (ADL) Score
-----------------	--

End point description:

It is the time from first dose of study drug until the time to return to pre-RSV functional status. Functional status is total points on KATZ index of independence in activities of daily living (KATZ ADL score). Katz activities of daily living assessed questions related to bathing, dressing, toileting, transferring, continence and feeding components. Total score was calculated by adding scores for all 6 activities which ranges from 0 high (subject independent) to 6 low (subject very dependent). Return to pre-RSV functional status occurs at timepoint where for first time KATZ ADL score is equal or higher than pre-RSV KATZ ADL score and after which no scores lower than pre-RSV KATZ ADL score occur anymore. ITT-i set included all randomly assigned subjects who received at least 1 dose of study drug and who had an RSV infection confirmed by a PCR-based assay at the central laboratory at baseline, analyzed as randomized. More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
19 July 2016	The overall reason for the amendment 1 was to add an inclusion criteria for female subjects to assure that woman agree not to donate eggs, and to add a section on rash management.
13 January 2017	The overall reason for the amendment 2 was to create a new Part 1 of the study protocol to characterize the pharmacokinetics (PK), to confirm the population pharmacokinetic (popPK) model derived from healthy volunteers in hospitalized adults with respiratory syncytial virus (RSV) infection, and to more clearly define the study eligibility criteria to ensure subject safety. Furthermore, changes requested by health authorities were made: women of childbearing potential were allowed to participate in the study, the age limit for subjects was lowered, the endpoints of the study were updated, subjects on extracorporeal membrane oxygenation were excluded, the guidelines concerning corticosteroid use were adjusted, clarifications regarding the use of the electronic clinical outcome assessment (eCOA) device were added single electrocardiogram (ECG) measurements were changed to triplicate ECGs and the dose dispensing instructions were deleted.
05 September 2017	The overall reason for the amendment 3 was to remove furosemide, ibuprofen, and trimethoprim/sulfamethoxazole from the list of prohibited moderate/strong inhibitors of organic anion transporter (OAT) 3.
20 March 2018	The overall reason for the amendment 4 was for Part 2 of the study (1) to include additional safety samples for biochemistry, (2) to lift the requirement for triplicate electrocardiograms (ECGs) and reduce the ECG timepoints, (3) to prohibit the use of P-glycoprotein (P-gp) inhibitors and inducers, and (4) to optimize the PK sampling scheme.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

As the study was stopped prematurely the planned final analyses were adapted. Due to small number of subjects in Part 2, it was decided to pool the data from the 3 parts of the study to perform an evaluation of selected planned analyses only.

Notes:
