

Clinical trial results:

To evaluate if 24 weeks treatment with Lixisenatide, reduces arterial stiffness as measured by aortic pulse wave velocity (Ao-PWV) in T2DM patients with diabetic nephropathy (DN)

Summary

EudraCT number	2016-001758-17
Trial protocol	GB
Global end of trial date	15 September 2023

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 September 2023
Is this the analysis of the primary completion data?	Yes
Primary completion date	31 May 2023
Global end of trial reached?	Yes
Global end of trial date	15 September 2023
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To evaluate if treatment with Lixisenatide for 24 weeks reduces Ao-PWV in T2DM with DN.

Protection of trial subjects:

Participants have the right to withdraw from the study at any time for any reason. The investigator also has the right to withdraw patients from the study drug in the event of inter- current illness, AEs, SAE's, SUSAR's, protocol violations, administrative reasons or other reasons.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	30 January 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 101
Worldwide total number of subjects	101
EEA total number of subjects	101

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	77
From 65 to 84 years	24

85 years and over	0
-------------------	---

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details: -

Pre-assignment period milestones

Number of subjects started	143 ^[1]
----------------------------	--------------------

Number of subjects completed	101
------------------------------	-----

Pre-assignment subject non-completion reasons

Reason: Number of subjects	N/A: 42
----------------------------	---------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: We do not count screening participants as enrolled

Period 1

Period 1 title	Overall Trial (overall period)
----------------	--------------------------------

Is this the baseline period?	Yes
------------------------------	-----

Allocation method	Randomised - controlled
-------------------	-------------------------

Blinding used	Double blind
---------------	--------------

Roles blinded	Subject, Investigator, Monitor, Data analyst, Carer, Assessor
---------------	---

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Active
-----------	--------
