Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 November 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 September 2017
Global end of trial reached?	Yes
Global end of trial date	30 November 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the progression-free survival (PFS) of patients with advanced or metastatic non-small cell lung cancer NSCLC, when treated with TAS-114/S-1 combination versus S-1 in patients with advanced solid tumor for which no standard therapy exists

Protection of trial subjects:

All considerations regarding the protection of human subjects were carried out in accordance with the protocol, GCP, ICH Guidelines, the ethical principles that have their origin in the Declaration of Helsinki, and all applicable regulatory requirements.

The investigator (according to applicable regulatory requirements) or a person designated by the investigator and under the investigator's responsibility fully informed patients of all pertinent aspects of the clinical trial. All participants were informed to the fullest extent possible about the study in a language and in terms they are able to understand. Before participation in the trial, the written ICF were signed and personally dated by the patient or by the patient's legal representative and by the person who conducted the ICF discussion.

The study was approved by an appropriately constituted Institutional Review Board/Independent Ethics Committee (IRB/IEC), as required in Chapter 3 of the ICH E6 Guidelines, applicable local regulations, and, for studies conducted under an Investigational New Drug (IND) application, the United States (US) Code of Federal Regulations Title 21 part 56.

Randomization took place once the consented patient completed all the necessary baseline procedures and was deemed eligible for study entry. Treatment assignment was done centrally using a dynamic allocation method (biased coin) via an interactive voice/web response system (IXRS) stratified by: 1) geographical region (Region 1: Asian; Region 2: Western); and 2) histological subtypes (non-squamous cell carcinoma [including mixed] and squamous cell carcinoma).

Patients continued to receive study therapy until documentation of progressive disease (PD), intolerable toxicity, withdrawal of consent, or other discontinuation criteria were met.

Background therapy: -

Evidence for comparator:

Chemotherapy regimens containing 5-fluorouracil (5-FU) drugs as the backbone are mainstays for the treatment of many cancers including breast, colorectal, and gastric cancer. Many combination chemotherapies employing 5-FU with chemical modulators such as leucovorin and other anti-malignant tumor agents have been investigated and have demonstrated efficacy against a variety of carcinomas to date. Oral fluoropyrimidines such as S-1, a fixed dose combination of tegafur, a prodrug of 5-FU, gimeracil, a dihydropyrimidine dehydrogenase (DPD) inhibitor that prevents degradation of 5-FU by the body and maintains 5-FU exposure, and oteracil potassium, an orotate phosphoribosyltransferase (OPRT) inhibitor that decreases the activity of 5-FU in normal gastrointestinal (GI) mucosa have been developed

Actual start date of recruitment	15 August 2016
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 25
Country: Number of subjects enrolled	France: 24
Country: Number of subjects enrolled	Italy: 11
Country: Number of subjects enrolled	United States: 8
Country: Number of subjects enrolled	Japan: 60
Worldwide total number of subjects	128
EEA total number of subjects	60

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	61
From 65 to 84 years	67
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study was planned to enroll approximately 124 patients with advanced or metastatic NSCLC. A total of 128 patients were randomized (64 to each study arm) at 26 study sites located in 5 countries and made up the intent-to-treat (ITT) population.

Pre-assignment

Screening details:

All patients completed the following study procedures prior to a confirmation of eligibility: Medical History, ECOG performance status, 12-lead electrocardiogram (ECG), Blood and urine sample assessment, Physical Examination, Baseline Signs and Symptoms, Height, Vital Signs, Weight, Pregnancy testing, CT scan and bone scan and so on...

Pre-assignment period milestones

Number of subjects started	165 ^[1]
Number of subjects completed	128

Pre-assignment subject non-completion reasons

Reason: Number of subjects	Screen Failure: 37
----------------------------	--------------------

Notes:

[1] - The number of subjects reported to have started the pre-assignment period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 165 patients started screening and out of 165 patients, 37 patients screened failed and therefore 128 patients were randomized

Period 1

Period 1 title	Baseline Period
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Arm title	Baseline
-----------	----------

Arm description:

Baseline period; screening for participation in the study

Arm type	Screening
Investigational medicinal product name	TAS-114
Investigational medicinal product code	TAS-114
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

TAS-114, supplied as 100 mg tablets packaged in kits containing 20 tablets for Europe and the US and 120 tablets for Japan.

TAS-114 (400 mg per dose) was administered to patients in the TAS-114/S-1 arm orally BID, with a glass of water within 1 hour after completion of morning and evening meals, for 14 days, followed by a 7-day rest period.

Investigational medicinal product name	S-1
Investigational medicinal product code	L01BC53
Other name	Tegafur/gimeracil/oteracil
Pharmaceutical forms	Capsule, hard
Routes of administration	Oral use

Dosage and administration details:

S-1 is an immediate release dosage form contained in hard gelatin capsules in which tegafur (FT), gimeracil (CDHP), and oteracil as monopotassium salt (Oxo) are combined at a molar ratio of 1:0.4:1. Study drug was packaged in kits containing 28 capsules (15-mg or 20-mg capsules) for all regions. Patients in both arms received S-1 at a dose of 30 mg/m² BID, with a glass of water within 1 hour after completion of morning and evening meals, for 14 days, followed by a 7-day rest period.

Primary: Progression-Free Survival

End point title	Progression-Free Survival
End point description: Progression-Free Survival (PFS) was the primary endpoint of this study and was defined as the time from the day of randomization to the start of disease progression or death (any cause), whichever occurs first, based on the blinded radiological review assessment of response. PFS was compared between the 2 treatment groups using the stratified log-rank test with significance level of 1-sided 5%. The estimate of the hazard ratio and corresponding 90% and 95% confidence interval (CI) were provided using a Cox proportional hazards (CPH) model including treatment and the 2 stratification factors in the model; survival curves were estimated using the Kaplan-Meier method.	
End point type	Primary
End point timeframe: Time from the day of randomization to the start of disease progression or death (any cause), whichever occurs first, based on the blinded radiological review assessment of response.	

End point values	TAS-114/S-1	S-1 control		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	64	64		
Units: months				
median (confidence interval 95%)	3.65 (2.69 to 5.16)	4.17 (2.60 to 6.60)		

Statistical analyses

Statistical analysis title	Progression-Free Survival
Statistical analysis description:	
Progression-Free Survival (PFS) per central independent review in the Intent to Treat (ITT) population. PFS was compared between the 2 treatment groups using the stratified log-rank test with significance level of 1-sided 5%. The estimate of the hazard ratio and corresponding 90% and 95% confidence interval (CI) were provided using a Cox proportional hazards (CPH) model including treatment and the 2 stratification factors in the model.	
Comparison groups	S-1 control v TAS-114/S-1
Number of subjects included in analysis	128
Analysis specification	Pre-specified

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events (AEs) were recorded from the time a patient started receiving study treatment until 30 days after the last dose of study drug or until the start of new antitumor therapy, whichever was earlier.

Adverse event reporting additional description:

Events were graded using the National Cancer Institute (NCI) Common Terminology Criteria for Adverse Events (CTCAE), Version 4.03. Safety assessments also included evaluation of laboratory test results, vital signs measurements, physical examination findings, and changes in ECOG performance status (ECOG PS).

Assessment type	Systematic

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
27 September 2016	Addition of the following exclusion criterion: Patients with rare hereditary problems of galactose intolerance, Lapp lactase deficiency, or glucose/galactose malabsorption.
08 September 2017	Updated Appendix D - Supplemental Requirements for Japan Only

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
