

Clinical trial results:

A Multicenter, Randomized, Double-blind, Parallel Group, Placebo-controlled, Phase 3b Study to Evaluate the Onset of Effect and Time Course of Change in Lung Function with Benralizumab in Severe, Uncontrolled Asthma Patients with Eosinophilic Inflammation

Summary

EudraCT number	2016-002094-36
Trial protocol	HU DE
Global end of trial date	30 August 2018

Results information

Result version number	v1 (current)
This version publication date	26 July 2019
First version publication date	26 July 2019

Trial information

Trial identification

Sponsor protocol code	D3250C00038

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 August 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	30 August 2018
Global end of trial reached?	Yes
Global end of trial date	30 August 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objective of the study is to determine the effect of Benralizumab on the time course of change (onset and maintenance of effect) on lung function

Protection of trial subjects:

The study is performed in accordance with ethical principles that have their origin in the Declaration of Helsinki and are consistent with International Conference on Harmonisation (ICH)/Good Clinical Practice, applicable regulatory requirements and the AstraZeneca policy on Bioethics and Human Biological samples. Each PI is responsible for providing the ECs/institutional review boards (IRBs) with reports of any serious and unexpected adverse drug reactions from any other study conducted with the investigational product. AstraZeneca provides this information to the PI so that he/she can meet these reporting requirements. During the study, AstraZeneca representative have regular contacts with the study site, ie, monitoring the study.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	09 November 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Chile: 38
Country: Number of subjects enrolled	Germany: 36
Country: Number of subjects enrolled	Hungary: 41
Country: Number of subjects enrolled	Philippines: 37
Country: Number of subjects enrolled	Korea, Democratic People's Republic of: 40
Country: Number of subjects enrolled	United States: 41
Worldwide total number of subjects	233
EEA total number of subjects	77

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	195
From 65 to 84 years	38
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

721 patients enrolled into D3250C00038 (Solana). 233 participants were randomized to receive treatment with benralizumab 30 mg or placebo. Of the 233 patients randomised, all (100.0%) received treatment with study drug. 118 (50.6%) patients received benralizumab 30 mg and 115 (49.4%) patients received placebo.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Benra 30 mg

Arm description:

12-week treatment period and receive Benra 30 mg at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).

Arm type	Experimental
Investigational medicinal product name	Benralizumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

30 mg

Arm title	Placebo
------------------	---------

Arm description:

12-week treatment period and receive Placebo at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

30 mg

Number of subjects in period 1	Benra 30 mg	Placebo
Started	118	115
Completed	115	113
Not completed	3	2
Consent withdrawn by subject	1	2
Adverse event, non-fatal	1	-
Lost to follow-up	1	-

Baseline characteristics

Reporting groups

Reporting group title	Benra 30 mg
Reporting group description: 12-week treatment period and receive Benra 30 mg at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).	
Reporting group title	Placebo
Reporting group description: 12-week treatment period and receive Placebo at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).	

Reporting group values	Benra 30 mg	Placebo	Total
Number of subjects	118	115	233
Age categorical Units: Subjects			
Adults (18-64 years)	97	98	195
From 65-84 years	21	17	38
Age Continuous Units: years arithmetic mean standard deviation	51.9 ± 13.62	50.9 ± 12.34	-
Sex: Female, Male Units: Subjects			
Female	74	83	157
Male	44	32	76
Race/Ethnicity, Customized Units: Subjects			
White	69	67	136
Black or African American	3	4	7
Asian	39	40	79
Other	7	4	11

End points

End points reporting groups

Reporting group title	Benra 30 mg
Reporting group description: 12-week treatment period and receive Benra 30 mg at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).	
Reporting group title	Placebo
Reporting group description: 12-week treatment period and receive Placebo at Day 0, Day 28 (± 3 days), and Day 56 (± 3 days).	

Primary: Change from baseline (visit 4) to Day 28 (Visit 8), Day 56 (Visit 9), and Day 84 (Visit 10) in pre-BD FEV1

End point title	Change from baseline (visit 4) to Day 28 (Visit 8), Day 56 (Visit 9), and Day 84 (Visit 10) in pre-BD FEV1
End point description: The average over the mean differences between benralizumab and placebo for change from baseline in pre-BD FEV1 is used to determine if the study is positive and to determine maintenance of effect. The first post baseline time point where the p-value for the mean difference between benralizumab and placebo is less than or equal to 0.05 is used to determine time to onset of effect.	
End point type	Primary
End point timeframe: From first IP dose to Day 84	

End point values	Benra 30 mg	Placebo		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	118	115		
Units: Liter

[27] - For average of Day 28, 56, 84

Secondary: Change from baseline in St. George's Respiratory Questionnaire (SGRQ)

End point title	Change from baseline in St. George's Respiratory Questionnaire (SGRQ)
End point description:	The SGRQ is designed to measure health impairment in patients with asthma and COPD. It contains two parts: Part 1 (Questions 1 to 8) covers the patients' recollection of their symptoms over a preceding 4 weeks; Part 2, 42 items, relates to the daily activity and psychosocial impacts of the individual's respiratory condition. Total score is presented as a percentage of overall impairment, in which 100 represents the worst possible health status, while 0 indicates the best.
End point type	Secondary
End point timeframe:	
From first IP dose to Day 84
