

Clinical trial results:

A phase II, multicenter, open-label, randomized two-year study to evaluate the efficacy and safety of deferasirox film-coated tablet versus phlebotomy in patients with Hereditary Hemochromatosis.

Summary

EudraCT number	2016-002529-12

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	17 April 2023
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	17 April 2023
Was the trial ended prematurely?	Yes

Notes:

General information about the trial

Main objective of the trial:

The primary objective of the trial was to assess the response rate in the deferasirox FCT and phlebotomy treatment arms where response is defined by achieving target serum ferritin (SF) ≤ 100 µg/L on or before 24 months.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	11 January 2018
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Romania: 1
Country: Number of subjects enrolled	Belgium: 5
Country: Number of subjects enrolled	Spain: 22
Country: Number of subjects enrolled	Switzerland: 2
Country: Number of subjects enrolled	Russian Federation: 8
Country: Number of subjects enrolled	Slovakia: 2
Country: Number of subjects enrolled	France: 5
Worldwide total number of subjects	45
EEA total number of subjects	35

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	43
From 65 to 84 years	2
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants took part in 11 investigative sites in 7 countries.

Pre-assignment

Screening details:

There was a screening period of 4 weeks to assess participants eligibility.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Deferasirox FCT 7mg/kg
------------------	------------------------

Arm description:

Deferasirox film-coated tablet 7mg/kg, oral dose daily (starting dose for the first 12 weeks)

Arm type	Experimental
Investigational medicinal product name	Deferasirox film-coated tablet
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

Deferasirox film-coated tablet 7mg/kg, oral dose daily (starting dose for the first 12 weeks)

Arm title	Phlebotomy
------------------	------------

Arm description:

Phlebotomy - standard of care

Arm type	No intervention
----------	-----------------

No investigational medicinal product assigned in this arm

Number of subjects in period 1	Deferasirox FCT 7mg/kg	Phlebotomy
Started	30	15
Completed	22	12
Not completed	8	3
Adverse event, serious fatal	1	-
Adverse events	3	-
Subject/guardian decision	4	3

Statistical analyses

No statistical analyses for this end point

Secondary: Categorical analysis of logMAR score changes from baseline to best/worst post-baseline changes in one eye with more extreme change

End point title	Categorical analysis of logMAR score changes from baseline to best/worst post-baseline changes in one eye with more extreme change
-----------------	--

End point description:

Visual acuity was measured using an Early Treatment Diabetic Retinopathy Study (ETDRS) chart. A letter score was calculated based on the number of letters that could correctly be identified from specified distances. For low luminance and standard acuity measures, visual acuity was described on a logMAR scale for all measures. For including acuity obtained with the ETDRS letter score, the values were converted to a logMAR scale, using the following formula: $\text{logMAR} = 1.7 - 0.02 \times \text{ETDRS score}$. With this conversion, a difference from baseline of 0.1 logMAR = 5-letter difference in visual acuity, 0.2 logMAR = 10-letter difference, 0.3 logMAR = 15-letter difference, 0.4 logMAR = 20-letter difference, 0.5 logMAR = 25-letter difference and 0.6 logMAR = 30-letter difference. Increase in logMAR score from baseline indicates worsening in visual acuity. Decrease in logMAR score category from baseline indicates improvement in visual acuity.

End point type	Secondary

Secondary: Time to response (TTR)

End point title	Time to response (TTR)
End point description: Time to response (TTR) is defined as the time from the date of randomization to the date of the first time the SF achieved a value ≤ 100 µg/L during the treatment phase. Participants who did not achieve SF ≤ 100 µg/L were censored as follows: at the last serum ferritin assessment date on or before month 24 (week 104), at the day of randomization if a subject does not have any post-baseline serum ferritin value or at the death date. TTR was analyzed using the Kaplan-Meier method. Due to EudraCT system limitations, data fields in the table cannot contain letters (eg. NA indicating 'not applicable'). Therefore, not applicable values are indicated as '999'.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
30 August 2018	The purpose of this amendment is to modify the inclusion and exclusion criteria, to correct inconsistencies, typos, add some clarifications and to update withdrawal of consent language. Additionally, the local French amendment text is formally integrated in this global amendment. However, the French specific requirements remain valid for France only.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
