Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	04 September 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	06 August 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Evaluate the clinical efficacy of UCB7665 as a chronic-intermittent treatment in subjects with generalized myasthenia gravis (MG) who are classified as moderate to severe.

Protection of trial subjects:

During the conduct of the study all subjects were closely monitored. If required, subjects received rescue therapy and were withdrawn from treatment. Subjects were then monitored during the 8 weeks observation period until lab levels returned to normal.

Background therapy:

Background therapy as permitted in the protocol.

Evidence for comparator:

Not Applicable

Actual start date of recruitment	15 May 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Belgium: 10
Country: Number of subjects enrolled	Canada: 11
Country: Number of subjects enrolled	Czechia: 2
Country: Number of subjects enrolled	Denmark: 7
Country: Number of subjects enrolled	Germany: 3
Country: Number of subjects enrolled	Spain: 1
Country: Number of subjects enrolled	United States: 9
Worldwide total number of subjects	43
EEA total number of subjects	23

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0

Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	32
From 65 to 84 years	11
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study started to enroll patients in May 2017 and concluded in August 2018.

Pre-assignment

Screening details:

The Participant Flow refers to the Randomized Set (RS) which consisted of all participants randomized into the study at the first randomization visit.

Period 1

Period 1 title	Dosing Period 1
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Blinding implementation details:

For reporting of this study, due to limitations of the drop-down list for blinding, the wording Double Blind was utilized instead of Investigator- and Subject-Blind.

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants received 3 doses of placebo in Dosing Period 1 and then were re-randomized into Dosing Period 2 to receive 3 doses of UCB7665 (7 mg/kg or 4 mg/kg).

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

Placebo was administered in Dosing Period 1.

Arm title	UCB7665 (7 mg/kg)
------------------	-------------------

Arm description:

Participants received 3 doses of UCB7665 (7 mg/kg) in Dosing Period 1 and then were re-randomized into Dosing Period 2 to receive 3 doses of UCB7665 (7 mg/kg or 4 mg/kg).

Arm type	Experimental
Investigational medicinal product name	Rozanolixizumab
Investigational medicinal product code	UCB7665
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

UCB7665 was administered in 2 different dosages (7 mg/kg and 4 mg/kg) in Dosing Period 1 and 2.

Number of subjects in period 1	Placebo	UCB7665 (7 mg/kg)
Started	22	21
Completed Period 1	22	21
Completed Period 1 and started Period 2	22	20
Completed	22	20
Not completed	0	1
Adverse event, non-fatal	-	1

Period 2

Period 2 title	Dosing Period 2
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Blinding implementation details:

For reporting of this study, due to limitations of the drop-down list for blinding, the wording Double Blind was utilized instead of Investigator- and Subject-Blind.

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo - UCB7665 (7 mg/kg)

Arm description:

Participants randomized to receive 3 doses of placebo at weekly intervals in Dosing Period 1 were then re-randomized to receive 3 doses of UCB7665 (7 mg/kg) at weekly intervals in Dosing Period 2.

Arm type	Experimental
Investigational medicinal product name	Rozanolixizumab
Investigational medicinal product code	UCB7665
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

UCB7665 was administered in 2 different dosages (7 mg/kg and 4 mg/kg) in Dosing Period 1 and 2.

Arm title	Placebo - UCB7665 (4 mg/kg)
------------------	-----------------------------

Arm description:

Participants randomized to receive 3 doses of placebo at weekly intervals in Dosing Period 1 were then re-randomized to receive 3 doses of UCB7665 (4 mg/kg) at weekly intervals in Dosing Period 2.

Arm type	Experimental
Investigational medicinal product name	Rozanolixizumab
Investigational medicinal product code	UCB7665
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

UCB7665 was administered in 2 different dosages (7 mg/kg and 4 mg/kg) in Dosing Period 1 and 2.

Arm title	UCB7665 (7 mg/kg) - UCB7665 (7 mg/kg)
------------------	---------------------------------------

Arm description:

Participants randomized to receive 3 doses of UCB7665 (7 mg/kg) at weekly intervals in Dosing Period 1 were then re-randomized to receive 3 doses of UCB7665 (7 mg/kg) at weekly intervals in Dosing Period 2.

Arm type	Experimental
Investigational medicinal product name	Rozanolixizumab
Investigational medicinal product code	UCB7665
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Subcutaneous use

Dosage and administration details:

UCB7665 was administered in 2 different dosages (7 mg/kg and 4 mg/kg) in Dosing Period 1 and 2.

Arm title	UCB7665 (7 mg/kg) - UCB7665 (4 mg/kg)

Primary: Change from Baseline in Quantitative Myasthenia Gravis (QMG) score to Visit 9

End point title	Change from Baseline in Quantitative Myasthenia Gravis (QMG) score to Visit 9
-----------------	---

End point description:

The total QMG score was obtained by summing the responses to each individual item (13 items;

Responses: None=0, Mild=1, Moderate=2, Severe=3). The score ranges from 0 to 39, with lower scores indicating lower disease activity. The change from Baseline is calculated, a negative value indicating improvement and a positive value worsening.

End point type	Primary
End point timeframe:	
From Baseline to Visit 9 (up to Day 29)	

End point values	Placebo (FAS)	UCB7665 (7 mg/kg) (FAS)		
Subject group type	Subject analysis set	Subject analysis set		
Number of subjects analysed	22	21		
Units: scores on a scale				
least squares mean (standard error)	-1.2 (± 0.6)	-1.8 (± 0.6)		

Statistical analyses

Statistical analysis title	Statistical analysis 1
----------------------------	------------------------

Statistical analysis description:

Mixed Model Repeated Measures (MMRM) Analysis of Covariance (ANCOVA) model included fixed terms for treatment group, visit, interaction between treatment group and visit, covariate of Baseline QMG score, and random effect for participant.

The differences presented was 'UCB7665 (7 mg/kg) minus Placebo'.

Comparison groups	Placebo (FAS) v UCB7665 (7 mg/kg) (FAS)
Number of subjects included in analysis	43
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.221 ^[1]
Method	MMRM
Parameter estimate	LS Mean Difference vs Placebo
Point estimate	-0.7
Confidence interval	
level	95 %
sides	1-sided
upper limit	0.8

Notes:

[1] - One-sided p-value was presented for difference.

Secondary: Change from Baseline in Myasthenia Gravis-Composite score to Visit 9

End point title	Change from Baseline in Myasthenia Gravis-Composite score to Visit 9
-----------------	--

End point description:

The total Myasthenia Gravis (MG)-composite score was obtained by summing the responses to each individual item (10 items; Grade: 0-9 depending on item). The score ranges from 0 to 50, with lower scores indicating lower disease activity. The change from Baseline is calculated, a negative value indicating improvement and a positive value worsening.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
07 February 2017	Protocol Amendment 1 (dated 07 Feb 2017) was implemented to incorporate the feedback from the US Food and Drug administration (FDA) received on 09 December 2016 and the new company standard in tuberculosis (TB) management. Secondary efficacy variables and other efficacy variables were updated. In addition, minor administrative changes were made.
15 September 2017	Protocol Amendment 2 (dated 15 Sep 2017) was implemented to include an additional patient-reported outcome (PRO) assessment, intended as a measure of disease severity. This patient-centered index was developed for an outpatient setting and is sensitive to detect clinical change after interventions, and most importantly detect patient-meaningful change. Two additional other efficacy variables were added to capture changes for mean consecutive difference (MCD) and normal fiber pairs in jitter (single-fiber electromyogram [SFEMG]) studies to show the clinical trend from predose to postdose treatment. Furthermore, permitted concomitant medications were revised to include: modified and unmodified dose formulations for cyclosporin and increased dose strength for tacrolimus. With no specific dosing for tacrolimus, dosing is variable in patients with myasthenia gravis (MG), but for transplant related immunosuppression, higher doses are cited in literature; therefore, a slightly higher fixed dose was allowed. In addition, minor administrative and stylistic changes were made.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
