

## Clinical trial results:

**A multicenter, randomized, double-blind, phase III trial to evaluate the safety, immunogenicity, and efficacy of MSB11022 compared with Humira® in patients with moderately to severely active rheumatoid arthritis**

### Summary

EudraCT number	2016-002852-26
Trial protocol	CZ GB HU DE LT BG
Global end of trial date	27 August 2018

### Results information

Result version number	v2 (current)
This version publication date	26 January 2020
First version publication date	13 July 2019
Version creation reason	• New data added to full data set Sponsor scientific responsible changed

### Trial information

#### Trial identification

Sponsor protocol code	MS200588-0004
-----------------------	---------------

#### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03052322
WHO universal trial number (UTN)	-

Notes:

### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 August 2018
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	27 August 2018
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The main objective of this study is to evaluate the safety profile of MSB11022- modified buffer and stabilizer compared to Humira® in subjects with moderately to severely active Rheumatoid Arthritis (RA).

Protection of trial subjects:

Subject protection was ensured by following high medical and ethical standards in accordance with the principles laid down in the Declaration of Helsinki, and that are consistent with Good Clinical Practice and applicable regulations.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	31 January 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 61
Country: Number of subjects enrolled	Czech Republic: 52
Country: Number of subjects enrolled	Germany: 15
Country: Number of subjects enrolled	Hungary: 23
Country: Number of subjects enrolled	Poland: 135
Country: Number of subjects enrolled	United Kingdom: 2
Worldwide total number of subjects	288
EEA total number of subjects	288

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0

Adolescents (12-17 years)	0
Adults (18-64 years)	241
From 65 to 84 years	47
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details: -

### Pre-assignment

Screening details:

Subjects were randomized in 1:1 ratio to receive either MSB11022 or EU-Humira for 48 weeks.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

<b>Arm title</b>	MSB11022
------------------	----------

Arm description:

Subjects received MSB11022 subcutaneously at dose of 40 milligram (mg) every other week from Day 1 up to Week 48.

Arm type	Experimental
Investigational medicinal product name	MSB11022
Investigational medicinal product code	MSB11022
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received MSB11022 subcutaneously at dose of 40 milligram (mg) every other week from Day 1 up to Week 48.

<b>Arm title</b>	EU-Humira
------------------	-----------

Arm description:

Subjects received EU-Humira subcutaneously at dose of 40 mg every other week from Day 1 up to Week 48.

Arm type	Active comparator
Investigational medicinal product name	EU-Humira
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Subjects received EU-Humira subcutaneously at dose of 40 mg every other week from Day 1 up to Week 48.

<b>Number of subjects in period 1</b>	MSB11022	EU-Humira
Started	143	145
Completed	122	113
Not completed	21	32
Consent withdrawn by subject	10	9
Adverse events	6	13
Other un-specified	1	2
Death	-	2
Lost to follow-up	2	4
Lack of efficacy	1	2
Protocol deviation	1	-

## Baseline characteristics

### Reporting groups

Reporting group title	MSB11022
-----------------------	----------

Reporting group description:

Subjects received MSB11022 subcutaneously at dose of 40 milligram (mg) every other week from Day 1 up to Week 48.

Reporting group title	EU-Humira
-----------------------	-----------

Reporting group description:

Subjects received EU-Humira subcutaneously at dose of 40 mg every other week from Day 1 up to Week 48.

Reporting group values	MSB11022	EU-Humira	Total

## End points

### End points reporting groups

Reporting group title	MSB11022
Reporting group description: Subjects received MSB11022 subcutaneously at dose of 40 milligram (mg) every other week from Day 1 up to Week 48.	
Reporting group title	EU-Humira
Reporting group description: Subjects received EU-Humira subcutaneously at dose of 40 mg every other week from Day 1 up to Week 48.	

### Primary: Percentage of Subjects with Treatment-emergent Adverse Events of Special Interest (AESI)

End point title	Percentage of Subjects with Treatment-emergent Adverse Events of Special Interest (AESI) <sup>[1]</sup>
End point description: Adverse event (AE) was defined as any untoward medical occurrence in subjects, which does not necessarily have causal relationship with treatment. Term TEAE is defined as AEs starting/worsening after first intake of the study drug. Hypersensitivity was the pre-defined TEAE of special Interest for this study. The percentage of subjects with treatment emergent AESIs (hypersensitivity) were reported. The Safety Analysis Set included all randomized subjects who received at least one dose of study treatment.	
End point type	Primary
End point timeframe: Up to Week 52	

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only descriptive data was planned to be reported for this endpoint.

End point values	MSB11022	EU-Humira		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	143	145		
Units: Percentage of subjects				
number (confidence interval 95%)	4.2 (1.6 to 8.9)	5.5 (2.4 to 10.6)		

### Statistical analyses

No statistical analyses for this end point

### Secondary: Percentage of Subjects Who Achieved American College of Rheumatology 20 Response (ACR20) at Week 12

End point title	Percentage of Subjects Who Achieved American College of Rheumatology 20 Response (ACR20) at Week 12
End point description: ACR 20 Response: $\geq 20$ percent improvement in swollen joint count (66 joints) & tender joint count (68 joints) & $\geq 20$ percent improvement in 3 of following 5 assessments: patient's assessment of pain using Visual Analog Scale (VAS) ; 0-10 millimeter [mm], 0=no pain & 10=worst possible pain), patient's global assessment of disease activity by using VAS (scale ranges from 0 to 100 mm, [0 mm=no pain &	

100 mm=worst possible pain]), physician's global assessment of disease activity using VAS, subjects's assessment of physical function measured by Health Assessment Questionnaire-Disability Index (HAQ-DI, defined as a 20-question instrument assessing 8 functional areas). Derived HAQ-DI ranges from 0= no difficulty & 3= inability to perform task) & acute-phase marker. Intent-To-Treat Analysis Set included all subjects randomly allocated to treatment, based on intent to treat "as randomized" principle. Here "Number of subjects analyzed" signifies those who were evaluable for this endpoint.

## Statistical analyses

### Secondary: Change from Baseline in Disease Activity Score Based on a 28 Joint Count- Erythrocyte Sedimentation Rate (DAS28-ESR) Score at Week 2, 4, 8, 12, 24 and 52

End point title	Change from Baseline in Disease Activity Score Based on a 28 Joint Count- Erythrocyte Sedimentation Rate (DAS28-ESR) Score at Week 2, 4, 8, 12, 24 and 52
-----------------	---

#### End point description:

DAS calculated on 28 joints is composite score derived from 4 measures: number of swollen joints, number of tender joints, ESR, Patient's Global Assessment of Disease Activity on VAS. Overall DAS28 was derived using following formulas from DAS28:  $DAS28 = 0.56 \times \sqrt{TJC28} + 0.28 \times \sqrt{SJC28} + 0.014 \times GH + 0.70 \times \ln(ESR)$ . Where: TJC28 = 28 joint count for tenderness, SJC28 = 28 joint count for swelling,  $\ln(ESR)$  = natural log of ESR, GH = general health component of DAS (ie, Patient's Global Assessment of Disease Activity, assessed using scale of 1-100 where 100 is maximal activity; For analyses, GH divided by 10 & converted to a 0.5 scale, i.e., 0, 0.5, 1, 1.5. DAS28-ESR of >5.1 implies active disease, <3.2 low disease activity, & <2.6 remission. Change of 1.2 (twice measurement error) = significant change of disease activity state. Overall score ranges from 0-10 where higher score means more severe disease. ITT Analysis Set used. Here "n" = subjects evaluable for this endpoint at specified time points.

## Secondary: Change from Baseline in Simplified Disease Activity Index (SDAI) Total Score at Week 2, 4, 8, 12, 24, and 52

End point title	Change from Baseline in Simplified Disease Activity Index (SDAI) Total Score at Week 2, 4, 8, 12, 24, and 52
-----------------	--

End point description:

SDAI is numerical sum of 5 parameters: tender & swollen joint count, Patient's & Physician's Global Assessment of Disease Activity (VAS) & level of C-reactive protein (CRP) (mg/dL), normal <1 mg/dL. SDAI was calculated based on following formula:  $SDAI = 28 \text{ joint count for swelling (SJC28)} + 28 \text{ joint for tenderness (TJC28)} + GH + PGA + CRP$  Where: GH = general health component of DAS (i.e. Patient's

Global Assessment of Disease Activity, assessed using scale of 1 to 100, here 100 is maximal activity. GH was divided by 10 & converted to 0.5 scale (0, 0.5, 1, 1.5). -PGA = Physician's Global Assessment of Disease Activity assessed using scale of 1 to 100 where 100 is maximal activity. For analyses, PGA was divided by 10 & converted to 0.5 scale (0, 0.5, 1, 1.5). where [0-0.25]=0, [0.25-0.75]=0.5, [0.76-1.25]=1. Total score range was 0-86 & lower score indicates less disease activity. ITT Analysis Set used. Here "n" signifies subjects who were evaluable for this endpoint at specified time points.

Change:Week 8:15 min post-injection (n= 140, 139)	-0.3 (± 2.3)	-0.7 (± 4.1)		
Change:Week 8: 1 hour post-injection (n= 140, 139)	-0.1 (± 0.6)	-0.7 (± 5.4)		

## Statistical analyses

---

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Up to Week 69

Assessment type	Non-systematic
-----------------	----------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	21.0
--------------------	------

### Reporting groups

Reporting group title	MSB11022
-----------------------	----------

Reporting group description:

Participants received MSB11022 subcutaneously at dose of 40 milligram (mg) every other week from Day 1 up to Week 48.

Reporting group title	EU-Humira
-----------------------	-----------

Reporting group description:

Participants received EU-Humira subcutaneously at dose of 40 mg every other week from Day 1 up to Week 48.

Serious adverse events	MSB11022	EU-Humira	
Total subjects affected by serious adverse events			
subjects affected / exposed	8 / 143 (5.59%)	15 / 145 (10.34%)	
number of deaths (all causes)	0	2	
number of deaths resulting from adverse events			
Investigations			
Mycobacterium tuberculosis complex test positive			
subjects affected / exposed	1 / 143 (0.70%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 1	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cardiac disorders			
Arteriosclerosis coronary artery			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 1	
Myocardial infarction			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Myocardial ischaemia			

subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 1	
Nervous system disorders			
Transient global amnesia			
subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
General disorders and administration site conditions			
Death			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 1	
Immune system disorders			
Anaphylactic reaction			
subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	1 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Hepatobiliary disorders			
Cholelithiasis			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory, thoracic and mediastinal disorders			
Rheumatoid lung			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Skin and subcutaneous tissue disorders			
Dermatitis			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Musculoskeletal and connective tissue disorders			

Osteoarthritis			
subjects affected / exposed	1 / 143 (0.70%)	2 / 145 (1.38%)	
occurrences causally related to treatment / all	0 / 1	0 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Rheumatoid arthritis			
subjects affected / exposed	1 / 143 (0.70%)	2 / 145 (1.38%)	
occurrences causally related to treatment / all	0 / 1	1 / 2	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cervical spinal stenosis			
subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Synovial cyst			
subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Infections and infestations			
Lower respiratory tract infection			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory tract infection			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	1 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Respiratory tract infection viral			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Tracheobronchitis			
subjects affected / exposed	0 / 143 (0.00%)	1 / 145 (0.69%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Arthritis bacterial			

subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Product issues			
Device dislocation			
subjects affected / exposed	1 / 143 (0.70%)	0 / 145 (0.00%)	
occurrences causally related to treatment / all	0 / 2	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

<b>Non-serious adverse events</b>	MSB11022	EU-Humira	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	15 / 143 (10.49%)	34 / 145 (23.45%)	
General disorders and administration site conditions			
Injection site erythema			
subjects affected / exposed	4 / 143 (2.80%)	12 / 145 (8.28%)	
occurrences (all)	4	93	
Injection site pain			
subjects affected / exposed	2 / 143 (1.40%)	10 / 145 (6.90%)	
occurrences (all)	2	25	
Injection site pruritus			
subjects affected / exposed	1 / 143 (0.70%)	8 / 145 (5.52%)	
occurrences (all)	1	55	
Skin and subcutaneous tissue disorders			
Erythema			
subjects affected / exposed	2 / 143 (1.40%)	8 / 145 (5.52%)	
occurrences (all)	20	38	
Infections and infestations			
Nasopharyngitis			
subjects affected / exposed	6 / 143 (4.20%)	13 / 145 (8.97%)	
occurrences (all)	6	14	

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 July 2017	- Administrative and editorial changes were undertaken to correct typographical errors that do not impact the design or execution of the study

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
