

Clinical trial results:

Does Glucagon-like Peptide 1 (GLP-1) receptor stimulation reduce alcohol intake in patients with alcohol dependence?

Summary

EudraCT number	2016-003343-11
Trial protocol	DK
Global end of trial date	06 October 2020

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	10 February 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	06 October 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The objective of this study is to investigate the effects of the GLP-1 receptor agonist Bydureon® on total number of heavy drinking days from baseline to follow up after 26 weeks of treatment in patients with alcohol dependence in a 26-weeks double-blinded, randomized placebo-controlled clinical trial.). Furthermore, patients will be approached 26 weeks after end participation, in order to evaluate whether or not there is a long-term effect of the intervention on the TLFB questionnaire.

Protection of trial subjects:

The patients could call a phoneline 24/7, if needed due to side-effects or illness

Background therapy:

All patients included recieved standardized cognitive behavioral therapy while included

Evidence for comparator: -

Actual start date of recruitment	07 August 2017
Long term follow-up planned	Yes
Long term follow-up rationale	Efficacy, Scientific research
Long term follow-up duration	6 Months
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Denmark: 152
Worldwide total number of subjects	152
EEA total number of subjects	152

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	135

From 65 to 84 years	17
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Patients were recruited from 7th of August 2017 to 1st of October 2019. All patients were recruited from four outpatient alcohol treatment facilities in the suburbs of Copenhagen or through a project webpage. The 25 healthy controls were recruited via the project webpage.

Pre-assignment

Screening details:

In total 156 patients were screened for eligibility. 29 were excluded due to other substance disorder, paraclinic above upper limit, withdrawal symptoms, AUDIt score below 15, a medical record of alcohol-related withdrawal seizures/pancreatitis, less than 5 heavy drinking days or absent from first injection.

Period 1

Period 1 title	Intervention (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Blinding implementation details:

All patients were blindfolded when receiving the assigned treatment by an unblinded nurse. The unblinded nurses, were not involved in any other trial related activity.

Arms

Are arms mutually exclusive?	Yes
Arm title	Intervention

Arm description:

Bydureon once weekly, 2 mg sc

Arm type	Experimental
Investigational medicinal product name	Bydureon 2 mg powder and solvent for prolonged-release suspension for injection
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Powder and solvent for prolonged-release suspension for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

2 mg sc

Arm title	placebo
------------------	---------

Arm description:

saline 2 ml sc

Arm type	Placebo
Investigational medicinal product name	Saline
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for injection/infusion
Routes of administration	Cutaneous use

Dosage and administration details:

2 ml were given sc

Number of subjects in period 1^[1]	Intervention	placebo
Started	62	65
Completed	26	32
Not completed	36	33
Consent withdrawn by subject	5	11
Adverse event, non-fatal	14	2
Lost to follow-up	7	8
Lack of efficacy	10	12

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Of the people included, 25 individuals were healthy controls for the fMRI brain imaging. They are not included in the baseline data.

-----------------------------------	--

Statistical analysis description:

All continuous outcomes were analyzed with an ANOVA adjusted for baseline until the last observational endpoint, and missing data were imputed with the use of multiple imputations in the mice package in R software version 3.6.0, method = "pmm" (predictive mean matching), and the number of imputed datasets = 100. No adjustment for covariates was performed.

Comparison groups	Intervention v placebo
Number of subjects included in analysis	55
Analysis specification	Pre-specified
Analysis type	other ^[19]
P-value	= 0.18
Method	ANOVA

Notes:

[19] - No superiority, equivalence, or noninferiority hypothesis testing framework were performed

Adverse events

Adverse events information

Timeframe for reporting adverse events:

All adverse events were assessed at the week 4, week 12, week 20, and week 26 session. Patients were encouraged to make contact with the investigators at any time, and not wait for the assessments, if they experienced adverse events.

Adverse event reporting additional description:

Patients were asked if they had experienced any adverse events since the last meeting.

Assessment type	Systematic

Reporting groups

Reporting group title	Intervention
-----------------------	--------------

Reporting group description:

Bydureon

Reporting group title	Placebo
-----------------------	---------

Reporting group description: -

Serious adverse events	Intervention	Placebo	
Total subjects affected by serious adverse events			
subjects affected / exposed	11 / 62 (17.74%)	8 / 65 (12.31%)	
number of deaths (all causes)	1	1	
number of deaths resulting from adverse events	0	0	
Injury, poisoning and procedural complications			
Alcohol withdrawal syndrome	Additional description: Number of hospitalizations (4 patients in each group, some admitted twice)		
subjects affected / exposed	9 / 62 (14.52%)	6 / 65 (9.23%)	
occurrences causally related to treatment / all	0 / 9	0 / 6	
deaths causally related to treatment / all	0 / 0	0 / 0	
Cardiac disorders			
Death	Additional description: No known cause of the death		
alternative assessment type: Non-systematic			
subjects affected / exposed	0 / 62 (0.00%)	1 / 65 (1.54%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 1	
Gastrointestinal disorders			
Appendicitis			

subjects affected / exposed	1 / 62 (1.61%)	0 / 65 (0.00%)	
occurrences causally related to treatment / all	1 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Psychiatric disorders			
Suicide	Additional description: 7 weeks after the end of participation in the trial		
alternative assessment type: Non-systematic			
subjects affected / exposed	1 / 62 (1.61%)	0 / 65 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 1	0 / 0	
Suicidal behaviour			
subjects affected / exposed	0 / 62 (0.00%)	1 / 65 (1.54%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 1	

Frequency threshold for reporting non-serious adverse events: 1 %

Non-serious adverse events	Intervention	Placebo	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	60 / 62 (96.77%)	60 / 65 (92.31%)	
Nervous system disorders			
Dizziness			
subjects affected / exposed	3 / 62 (4.84%)	2 / 65 (3.08%)	
occurrences (all)	3	2	
Headache			
subjects affected / exposed	1 / 62 (1.61%)	4 / 65 (6.15%)	
occurrences (all)	1	4	
General disorders and administration site conditions			
Weight gain			
subjects affected / exposed	12 / 62 (19.35%)	31 / 65 (47.69%)	
occurrences (all)	12	31	
Weight loss overall

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

It is not possible to repport the findings from the fMRI brain imaging, and DAT SPECT scans, in this format.
