

Clinical trial results:

A Phase 3, Multicenter, Double-Blind, Placebo-Controlled Study with an Initial Treatment Period

Followed by a Randomized-Withdrawal Period to Evaluate the Efficacy and Safety of Bimekizumab in Adult Subjects with Moderate to Severe Chronic Plaque Psoriasis

Summary

EudraCT number	2016-003426-16
Trial protocol	GB DE HU
Global end of trial date	07 January 2020

Results information

Result version number	v2 (current)
This version publication date	09 June 2022
First version publication date	09 January 2021
Version creation reason	<ul style="list-style-type: none">• Correction of full data set Alignment with final posting on ClinicalTrials.gov after NIH review.

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	05 March 2020
Is this the analysis of the primary completion data?	No

Global end of trial reached?	Yes
Global end of trial date	07 January 2020
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Compare the efficacy of bimekizumab versus placebo in the treatment of participants with moderate to severe plaque psoriasis (PSO)

Protection of trial subjects:

During the conduct of the study all participants were closely monitored.

Background therapy:

Not Applicable

Evidence for comparator:

Not Applicable

Actual start date of recruitment	05 February 2018
Long term follow-up planned	Yes
Long term follow-up rationale	Safety
Long term follow-up duration	3 Years
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Australia: 10
Country: Number of subjects enrolled	Canada: 89
Country: Number of subjects enrolled	Germany: 38
Country: Number of subjects enrolled	Hungary: 31
Country: Number of subjects enrolled	Poland: 150
Country: Number of subjects enrolled	Russian Federation: 19
Country: Number of subjects enrolled	Korea, Republic of: 7
Country: Number of subjects enrolled	United Kingdom: 6
Country: Number of subjects enrolled	United States: 85
Worldwide total number of subjects	435
EEA total number of subjects	219

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37	0

wk	
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	410
From 65 to 84 years	25
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The study started to enroll patients in February 2018 and concluded in January 2020.

Pre-assignment

Screening details:

Study has a 2-5 weeks Screening Period, a 16 weeks Initial Period, a 40 weeks Randomized-Withdrawal Period (RWP) and a SFU Period (20 weeks after final dose). Participants who did not achieve a PASI90 response at Wk16 or who relapsed at Wk20/later during the RWP, entered 12 weeks of escape treatment. Participant Flow refers to the Randomized Set.

Period 1

Period 1 title	Initial Treatment Period: up to Wk16
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants received placebo for 16 weeks. Participants who achieved a Psoriasis Area Severity Index (PASI) 90 response criteria proceeded with placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo, administered subcutaneously (sc) at pre-specified time points.

Arm title	Bimekizumab 320 mg Q4W
------------------	------------------------

Arm description:

Participants received bimekizumab 320 mg Q4W for 16 weeks. Participants who achieved a PASI90 response criteria were re-randomized to either receive bimekizumab 320 mg Q4W or bimekizumab 320 mg Q8W or placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Study participants received bimekizumab 320 mg administered sc at pre-specified time intervals.

Number of subjects in period 1	Placebo	Bimekizumab 320 mg Q4W
Started	86	349
Completed	82	340
Not completed	4	9
Consent withdrawn by subject	1	-
Adverse event, non-fatal	-	5
Lost to follow-up	1	3
Lack of efficacy	2	1

Period 2

Period 2 title	Week 16 assessment
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Participants received placebo for 16 weeks. Participants who achieved a Psoriasis Area Severity Index (PASI) 90 response criteria proceeded with placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo, administered subcutaneously (sc) at pre-specified time points.

Arm title	Bimekizumab 320 mg Q4W
------------------	------------------------

Arm description:

Participants received bimekizumab 320 mg Q4W for 16 weeks. Participants who achieved a PASI90 response criteria were re-randomized to either receive bimekizumab 320 mg Q4W or bimekizumab 320 mg Q8W or placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Study participants received bimekizumab 320 mg administered sc at pre-specified time intervals.

Number of subjects in period 2	Placebo	Bimekizumab 320 mg Q4W
Started	82	340
Received escape treatment	81	23 ^[1]
Completed	1	311
Not completed	81	29
PASI90 Non-Response at Week 16	81	23
Incorrect escapers	-	6

Notes:

[1] - The number of subjects at this milestone seems inconsistent with the number of subjects in the arm. It is expected that the number of subjects will be greater than, or equal to the number that completed, minus those who left.

Justification: Number of participants at the milestones reflects those who did not achieve a PASI90 response at Week 16 of the Initial Treatment Period and received open-label bimekizumab 320 mg Q4W for 12 weeks (ie, escape treatment).

Period 3

Period 3 title	Randomized-Withdrawal Period: up to Wk56
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Carer, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo/Placebo

Arm description:

Participants in this arm were randomized to placebo during the Initial Treatment Period, achieved a PASI90 response at Week 16 and continued to receive placebo during the Randomized-Withdrawal Period.

Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo, administered subcutaneously (sc) at pre-specified time points.

Arm title	Bimekizumab 320 mg Q4W/Placebo
------------------	--------------------------------

Arm description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive placebo during the Randomized-Withdrawal Period.

Arm type	Placebo
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Study participants received bimekizumab 320 mg administered sc at pre-specified time intervals.

Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo, administered subcutaneously (sc) at pre-specified time points.

Arm title	Bimekizumab 320 mg Q4W/Q8W
------------------	----------------------------

Arm description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive bimekizumab 320 mg Q8W during the Randomized-Withdrawal Period. Participants receiving 320 mg Q8W received placebo at pre-specified time points to maintain the blinding.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Study participants received bimekizumab 320 mg administered sc at pre-specified time intervals.

Investigational medicinal product name	Placebo
Investigational medicinal product code	PBO
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Participants received placebo, administered subcutaneously (sc) at pre-specified time points.

Arm title	Bimekizumab 320 mg Q4W/Q4W
------------------	----------------------------

Arm description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and continued to receive bimekizumab 320 mg Q4W during the Randomized-Withdrawal Period.

Arm type	Experimental
Investigational medicinal product name	Bimekizumab
Investigational medicinal product code	BKZ
Other name	UCB4940
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Study participants received bimekizumab 320 mg administered sc at pre-specified time intervals.

Number of subjects in period 3	Placebo/Placebo	Bimekizumab 320 mg Q4W/Placebo	Bimekizumab 320 mg Q4W/Q8W
Started	1	105	100

Adverse event, non-fatal	-	-

Notes:

[5] - The number of subjects starting the period is not consistent with the number completing the preceding period. It is expected the number of subjects starting the subsequent period will be the same as the number completing the preceding period.

Justification: The Escape Treatment is not a subsequent period to the Randomized-Withdrawal period, but rather a separate period. It gives an overview of the participants who did not achieve a PASI90 response at Week 16 of the Initial Treatment Period and all participants who relapsed at Week 20 or later during the Randomized-Withdrawal Period (up to Week 56).

Baseline characteristics

Reporting groups

Secondary: Percentage of participants with a Patient Symptom Diary response for pain at Week 16

End point title	Percentage of participants with a Patient Symptom Diary response for pain at Week 16
-----------------	--

End point description:

As PRO measure, the PSD (further published as P-SIM) was used to assess key symptoms relevant to patients with moderate to severe plaque psoriasis. Site staff trained participants on the use of the electronic device used to collect ePRO diary data at Screening, device was then dispensed to the participant for home use until Week 16 Visit. The ePRO diary was completed on daily basis from Screening to Week 16 Visit.

PSD pain item was assessed daily on a numeric rating scale (NRS) from 0 (no pain) to 10 (very severe pain). PSD score for pain at a given visit was an average of daily values over the week prior to the visit. The response was defined as an improvement (decrease) in pain score higher than the prespecified 1.98 response threshold at Week 16. The endpoint was characterized as percentage of participants with PSD pain response.

The RS consisted of all randomized participants. Number of participants analyzed reflect those with Baseline score at or above 1.98 response threshold.

Statistical analysis description:

Odds ratio: Bimekizumab/Placebo calculated using stratified Cochran-Mantel-Haenszel (CMH) test with region and prior biologic exposure as stratification variables. This statistical analysis is not controlled for multiplicity and is only nominal.

Comparison groups	Bimekizumab 320 mg Q4W/Placebo (WK16ResS) v Bimekizumab 320 mg Q4W/Q8W+Q4W/Q4W (WK16ResS)
Number of subjects included in analysis	311
Analysis specification	Pre-specified
Analysis type	superiority
P-value	< 0.001 ^[12]
Method	Cochran-Mantel-Haenszel
Parameter estimate	Odds ratio (OR)
Point estimate	47.406
Confidence interval	
level	95 %
sides	2-sided
lower limit	22.087
upper limit	101.75

Notes:

[12] - P-values for the comparison of treatment groups were based on the CMH test from the general association.

Secondary: Number of treatment-emergent adverse events (TEAEs) adjusted by duration of participant exposure to study treatment during the Initial Treatment Period

End point title	Number of treatment-emergent adverse events (TEAEs) adjusted by duration of participant exposure to study treatment during the Initial Treatment Period
-----------------	---

End point description:

The number of TEAEs adjusted by duration of exposure to study treatment was scaled such that it provides an incidence rate per 100 patient-years. If a participant had multiple events, the time of exposure was calculated to the first occurrence of the adverse event (AE) being considered. If a participant had no events, the total time at risk was used. The Safety Set (SS) consisted of all study participants who received at least 1 dose of the IMP.

End point type	Secondary

Adverse events

Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected from Baseline (Week 0) until Safety Follow-Up Visit (up to 80 weeks duration)

Adverse event reporting additional description:

Treatment-emergent AEs were defined as those AEs that had a start date on or following the first dose of study treatment through the final dose of study treatment + 140 days (covering the 20-week Safety Follow-Up Period).

Assessment type	Non-systematic

Reporting groups

Reporting group title	Placebo/Placebo (WK16ResS)
-----------------------	----------------------------

Reporting group description:

Participants in this arm were randomized to placebo during the Initial Treatment Period, achieved a PASI90 response at Week 16 and continued to receive placebo during the Randomized-Withdrawal Period. Participants formed the Week 16 Responder Set (WK16ResS).

Reporting group title	Bimekizumab 320 mg Q4W (SS)
-----------------------	-----------------------------

Reporting group description:

Participants received bimekizumab 320 mg Q4W for 16 weeks. Participants who achieved a PASI90 response criteria were re-randomized to either receive bimekizumab 320 mg Q4W or bimekizumab 320 mg Q8W or placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the SS.

Reporting group title	Placebo (SS)
-----------------------	--------------

Reporting group description:

Participants received placebo for 16 weeks. Participants who achieved a Psoriasis Area Severity Index (PASI) 90 response criteria proceeded with placebo until Week 56. Participants who did not achieve a PASI90 response criteria at Week 16 or who relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the Safety Set (SS).

Reporting group title	Bimekizumab 320 mg Q4W/Q8W (WK16ResS)
-----------------------	---------------------------------------

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive bimekizumab 320 mg Q8W during the Randomized-Withdrawal Period. Participants formed the WK16ResS. Participants receiving 320 mg Q8W received placebo at pre-specified time points to maintain the blinding.

Reporting group title	Bimekizumab 320 mg Q4W/Placebo (WK16ResS)
-----------------------	---

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive placebo during the Randomized-Withdrawal Period. Participants formed the WK16ResS.

Reporting group title	Bimekizumab 320 mg Q4W/Q4W (WK16ResS)
-----------------------	---------------------------------------

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and continued to receive bimekizumab 320 mg Q4W during the Randomized-Withdrawal Period. Participants formed the WK16ResS.

Reporting group title	Bimekizumab 320 mg Q4W/ Placebo Escape (ESS)
-----------------------	--

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive placebo during the Randomized-Withdrawal Period. Participants relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the ESS.

Reporting group title	Placebo Escape (ESS)
-----------------------	----------------------

Reporting group description:

Participants in this arm were randomized to placebo during the Initial Treatment Period, did not achieve a PASI90 response at Week 16, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the Escape Study Participant Set (ESS).

Reporting group title	Bimekizumab 320 mg Q4W Escape (ESS)
-----------------------	-------------------------------------

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, did not achieve a PASI90 response at Week 16, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the ESS.

Reporting group title	Bimekizumab 320 mg Q4W/Q8W Escape (ESS)
-----------------------	---

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and were re-randomized to receive bimekizumab 320 mg Q8W during the Randomized-Withdrawal Period. Participants relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the ESS. Participants receiving 320 mg Q8W received placebo at pre-specified time points to maintain the blinding.

Reporting group title	Bimekizumab 320 mg Q4W/Q4W Escape (ESS)
-----------------------	---

Reporting group description:

Participants in this arm were randomized to bimekizumab 320 mg Q4W during the Initial Treatment Period, achieved a PASI90 response at Week 16 and continued to receive bimekizumab 320 mg Q4W during the Randomized-Withdrawal Period. Participants relapsed at Week 20 or later, entered the escape arm and received open-label bimekizumab 320 mg Q4W for 12 weeks. Participants formed the ESS.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
06 April 2018	<p>Protocol Amendment 2 (dated 06 Apr 2018) was implemented to incorporate the following key changes:</p> <ul style="list-style-type: none">• Updated name and contact information for Clinical Project Manager (CPM)• Extended the duration of the Screening Period, and therefore the overall study duration, by 1 week• Updated list of current treatment for psoriasis (PSO) to reflect changes in labeling and approved countries• Updated list of completed and ongoing bimekizumab studies to reflect completion of UP0042• Clarified calculation of Psoriasis Area and Severity Index (PASI) response rates• Removed references to pharmacodynamic (PD) assessments as they were not conducted in this study• Updated Table 5-1 Schedule of study assessments to modify the visits at which the physical examination, tuberculosis (TB) questionnaire, body weight, electrocardiogram (ECG), and the Patient Symptom Diary (PSD) (daily) were assessed• Clarified that all visits from first dose through Week 24 would have a ± 3 day visit window, while all visits from Week 28 through end of study would have a ± 7 day window• Clarified the dosing window• Modified exclusion criterion to clarify exclusion of study participants who participated in other studies of bimekizumab, other medications (systemic or topical), or devices• Modified exclusion criteria pertaining to history of malignancy, systemic disease, and major depression• Added new withdrawal criteria for study participants with newly diagnosed inflammatory bowel disease (IBD)• Clarified withdrawal criteria for study participants with depression or suicidal ideation or behavior• Updated prohibited concomitant medications to include tildrakizumab and risankizumab• Corrected discrepancies between Section 8 Study procedures by visit and Table 5-1 Schedule of study assessments• Revised Psoriatic Arthritis Screening and Evaluation (PASE) questionnaire scoring• Clarified definition of abortion• Updated laboratory measurements to be performed
06 April 2018	<p>Continuation of Protocol Amendment 2:</p> <ul style="list-style-type: none">• Provided additional details for requirements for investigational medicinal product (IMP) rechallenge in the event of potential drug-induced liver injury (PDILI)• Updated the definition of the Full Analysis Set (FAS)• Clarified regions for analyses <p>In addition, minor spelling, editorial, and formatting changes were made, and the List of abbreviations was updated.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
