Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Interim
Date of interim/final analysis	10 January 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	10 January 2019
Global end of trial reached?	Yes
Global end of trial date	02 October 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective of this study was to assess the efficacy of filgotinib, lanraplenib, and tirabrutinib in adults with active Sjogren's Syndrome (SjS).

Protection of trial subjects:

The protocol and consent forms were submitted for each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent forms (if applicable) after initial IEC/IRB approval were submitted on behalf of the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 May 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 106
Country: Number of subjects enrolled	Poland: 22
Country: Number of subjects enrolled	Spain: 15
Country: Number of subjects enrolled	United Kingdom: 9
Worldwide total number of subjects	152
EEA total number of subjects	46

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	130
From 65 to 84 years	22
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Participants were enrolled at study sites in the United States and Europe. The first participant was screened on 01 May 2017. The last study visit occurred on 02 Oct 2019.

Pre-assignment

Screening details:

347 participants were screened. Data submitted represent interim analysis performed on data collected by the participants through Week 24. Complete data will be submitted in October 2020.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Arms

Are arms mutually exclusive?	Yes
Arm title	Filgotinib

Arm description:

Filgotinib (1 x 200 mg) + lanraplenib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet) orally once daily for 48 weeks

Arm type	Experimental
Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 200 mg tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Lanraplenib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Tirabrutinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 48 weeks

Arm title	Lanraplenib
------------------	-------------

Arm description:

Lanraplenib (1 x 30 mg) + filgotinib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet) orally once daily for 48 weeks

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Lanraplenib
Investigational medicinal product code	
Other name	GS-9876
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 30 mg tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Tirabrutinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 48 weeks

Arm title	Tirabrutinib
------------------	--------------

Arm description:

Tirabrutinib (1 x 40 mg tablet) + filgotinib placebo (1 x tablet) + lanraplenib placebo (1 x tablet) orally once daily for 48 weeks

Arm type	Experimental
Investigational medicinal product name	Tirabrutinib
Investigational medicinal product code	
Other name	GS-4059
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 40 mg tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1x tablet administered orally once daily for 48 weeks

Investigational medicinal product name	Lanraplenib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 48 weeks

Arm title	Placebo
------------------	---------

Arm description:

Participants received filgotinib placebo + lanraplenib placebo + tirabrutinib placebo tablets orally once daily for 24 weeks. At Week 24 Visit, participants were rerandomised 1:1:1, in a blinded fashion and received either of the three experimental study drugs orally once daily through Week 48:

- filgotinib (1 x 200 mg tablet) + lanraplenib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)
- lanraplenib (1 x 30 mg tablet) + filgotinib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)
- tirabrutinib (1 x 40 mg tablet) + filgotinib placebo (1 x tablet) + lanraplenib placebo (1 x tablet)

Arm type	Placebo
Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 24 weeks. At Week 24 visit, 1 x tablet administered orally once daily through Week 48 in either of the following experimental arms:

- lanraplenib (1 x 30 mg tablet) + filgotinib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)
- tirabrutinib (1 x 40 mg tablet) + filgotinib placebo (1 x tablet) + lanraplenib placebo (1 x tablet)

Investigational medicinal product name	Lanraplenib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 24 weeks. At Week 24 visit, 1 x tablet administered orally once daily through Week 48 in either of the following experimental arms:

- filgotinib (1 x 200 mg tablet) + lanraplenib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)
- tirabrutinib (1 x 40 mg tablet) + filgotinib placebo (1 x tablet) + lanraplenib placebo (1 x tablet)

Investigational medicinal product name	Tirabrutinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x tablet administered orally once daily for 24 weeks. At Week 24 visit, 1 x tablet administered orally once daily through Week 48 in either of the following experimental arms:

- filgotinib (1 x 200 mg tablet) + lanraplenib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)
- lanraplenib (1 x 30 mg tablet) + filgotinib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet)

Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 200 mg tablet administered once daily from Week 24 through Week 48

Investigational medicinal product name	Lanraplenib
Investigational medicinal product code	
Other name	GS-9876
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1x 30 mg tablet administered orally once daily from Week 24 through Week 48

Investigational medicinal product name	Tirabrutinib
Investigational medicinal product code	
Other name	GS-4059
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 40 mg tablet administered orally once daily from Week 24 through Week 48

Number of subjects in period 1^[1]	Filgotinib	Lanraplenib	Tirabrutinib
Started	38	37	39
Completed up to Week 24	35	30	37
Completed	9	11	13
Not completed	29	26	26
Withdrew Consent	4	4	2
Adverse Event	1	6	1
Investigator's Discretion	1	1	-
Still on the Study	22	15	23
Protocol Violation	1	-	-

Number of subjects in period 1^[1]	Placebo
Started	36
Completed up to Week 24	32
Completed	14
Not completed	22
Withdrew Consent	4
Adverse Event	-
Investigator's Discretion	-
Still on the Study	17
Protocol Violation	1

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: 2 participants (Lanraplenib arm: N = 1; Placebo arm: N= 1) were randomised but did not receive a single dose of study drug and therefore are not included in the subject disposition or any further analysis.

Comment regarding the number in the placebo arm for 'Completed up to week 24': 32 participants in the placebo group were rerandomized at Week 24.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 July 2018	<p>- Protocol Amendment included:</p> <ol style="list-style-type: none">1) Addition of biomarker sample collection at Day 1 and Week 18 visits.2) Addition of a primary and secondary analysis to be conducted after all subjects either complete Week 24 visit or prematurely discontinue from the study.3) Assembly of an internal unblinded team independent of the blinded study team to closely monitor study progress and drug safety. <p>- "Pharmacogenomic" was changed to "Genomic" for consistency with the Patient Information Sheet/Informed Consent Form.</p>

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

An unplanned review of unblinded clinical trial data was performed in this study that was not prospectively specified in the protocol. There was no impact on the overall integrity or conclusions of the study.

Notes:
