

## Clinical trial results:

### A Randomised, Phase 2, Double-blind, Placebo-controlled Study to Assess the Safety and Efficacy of Filgotinib, GS-9876 and GS-4059 in Adult Subjects with Active Sjogren's Syndrome

#### Summary

EudraCT number	2016-003558-34
Trial protocol	GB ES PL
Global end of trial date	02 October 2019

#### Results information

Result version number	v2 (current)
This version publication date	17 October 2020
First version publication date	04 January 2020
Version creation reason	<ul style="list-style-type: none"><li>New data added to full data set</li></ul> Updated the record to post final results.

#### Trial information

##### Trial identification

Sponsor protocol code	GS-US-445-4189
-----------------------	----------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03100942
WHO universal trial number (UTN)	-

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	02 October 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	10 January 2019
Global end of trial reached?	Yes
Global end of trial date	02 October 2019
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objective of this study was to assess the efficacy of filgotinib, lanraplenib, and tirabrutinib in adults with active Sjogren's Syndrome (SjS).

Protection of trial subjects:

The protocol and consent forms were submitted for each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent forms (if applicable) after initial IEC/IRB approval were submitted on behalf of the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	01 May 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 15
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	United States: 106
Country: Number of subjects enrolled	Poland: 22
Worldwide total number of subjects	152
EEA total number of subjects	46

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23	0

months)	
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	130
From 65 to 84 years	22
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled at study sites in the United States and Europe. The first participant was screened on 01 May 2017. The last study visit occurred on 02 October 2019.

### Pre-assignment

Screening details:

348 participants were screened.

### Period 1

Period 1 title	Randomized Treatment Period
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

### Arms

Are arms mutually exclusive?	Yes
<b>Arm title</b>	Lanraplenib

Arm description:

Lanraplenib (1 x 30 mg tablet) + filgotinib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet) orally once daily for up to 49.4 weeks

Arm type	Experimental
Investigational medicinal product name	Lanraplenib
Investigational medicinal product code	
Other name	GS-9876
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 30 mg tablet administered orally once daily

Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

Investigational medicinal product name	Tirabrutinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

<b>Arm title</b>	Filgotinib
------------------	------------

Arm description:

Filgotinib (1 x 200 mg tablet) + lanraplenib placebo (1 x tablet) + tirabrutinib placebo (1 x tablet) orally once daily for up to 50.4 weeks.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	Filgotinib
Investigational medicinal product code	
Other name	GS-6034
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 200 mg tablet administered orally once daily

Investigational medicinal product name	Lanraplenib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

Investigational medicinal product name	Tirabrutinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

<b>Arm title</b>	Tirabrutinib
------------------	--------------

Arm description:

Tirabrutinib (1 × 40 mg tablet) + filgotinib placebo (1 × tablet) + lanraplenib placebo (1 × tablet) orally once daily for up to 50.3 weeks.

Arm type	Experimental
Investigational medicinal product name	Tirabrutinib
Investigational medicinal product code	
Other name	GS-4059
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 x 40 mg tablet administered orally once daily

Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

Investigational medicinal product name	Lanraplenib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Participants received filgotinib placebo + lanraplenib placebo + tirabrutinib placebo tablets orally once daily for 24 weeks.

At Week 24 visit, participants were re-randomized 1:1:1, in a blinded fashion and receive either of the

following study drugs through Week 48:

- filgotinib + lanraplenib placebo + tirabrutinib placebo
- lanraplenib + filgotinib placebo + tirabrutinib placebo
- tirabrutinib + filgotinib placebo + lanraplenib placebo

Arm type	Placebo
Investigational medicinal product name	Filgotinib placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

1 tablet administered orally once daily

Investigational medicinal product name	Lanraplenib placebo

Lost to follow-up	-
Investigator`s Discretion	-

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: Two participants who were randomized but did not receive the study drug are not included in the subject disposition table.

## Period 2

Period 2 title	Placebo Arm Re-Randomized
Is this the baseline period?	No
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

## Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo to Lanraplenib

Arm description:

Participants who received placebo for 24 weeks were re-randomized at the Week 24 visit and received lanraplenib (1 × 30 mg tablet) + filgotinib placebo (1 × tablet) + tirabrutinib placebo (1 × tablet) orally once daily for up to 25.1 weeks.

Arm type	Experimental
Investigational medicinal product name	Lanraplenib

## **Secondary: Change From Baseline in European League Against Rheumatism (EULAR) Sjogren's Syndrome Disease Activity Index (ESSDAI) at Week 12**

End point title	Change From Baseline in European League Against Rheumatism (EULAR) Sjogren's Syndrome Disease Activity Index (ESSDAI) at Week 12
-----------------	--

End point description:

The ESSDAI is a physician-administered tool designed to measure disease activity. It consists of 12 organ-specific 'domains' contributing to disease activity associated with the participant's Sjogren's Syndrome only (constitutional, lymphadenopathy, articular, muscular, cutaneous, glandular, pulmonary, renal, peripheral nervous system, central nervous system, hematological, biological). Each domain is assessed for activity level (i.e., no, low, moderate, high) and assigned a numerical score based on pre-determined weighting of each individual domain. Overall score (ranges from 0 (no activity) to 123 (worst activity)) is calculated as sum of all individual weighted domain scores. A negative change from baseline value indicates improvement. Participants in the Full Analysis Set were analyzed.

## Statistical analyses

<b>Statistical analysis title</b>	Lanraplenib vs Placebo
Statistical analysis description: LS Means, 95% CI, and P-values were obtained from MMRM with the terms for baseline value, treatment, stratification factors, visit, and treatment-by-visit interaction.	
Comparison groups	Lanraplenib v Placebo
Number of subjects included in analysis	73
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.9446
Method	MMRM
Parameter estimate	LS Mean Difference
Point estimate	0
Confidence interval	
level	95 %
sides	2-sided
lower limit	-0.9
upper limit	1
Variability estimate	Standard error of the mean
Dispersion value	0.47

<b>Statistical analysis title</b>	Filgotinib vs Placebo
Statistical analysis description: LS Means, 95% CI, and P-values were obtained from MMRM with the terms for baseline value, treatment, stratification factors, visit, and treatment-by-visit interaction.	
Comparison groups	Filgotinib v Placebo
Number of subjects included in analysis	74
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.3977
Method	MMRM
Parameter estimate	LS Mean Difference
Point estimate	-0.4
Confidence interval	
level	95 %
sides	2-sided
lower limit	-1.3
upper limit	0.5
Variability estimate	Standard error of the mean
Dispersion value	0.47

<b>Statistical analysis title</b>	Tirabrutinib vs Placebo
Statistical analysis description: LS Means, 95% CI, and P-values were obtained from MMRM with the terms for baseline value, treatment, stratification factors, visit, and treatment-by-visit interaction.	
Comparison groups	Tirabrutinib v Placebo
Number of subjects included in analysis	75
Analysis specification	Pre-specified
Analysis type	superiority
P-value	= 0.4966
Method	MMRM
Parameter estimate	LS Mean Difference
Point estimate	-0.3
Confidence interval	
level	95 %
sides	2-sided
lower limit	-1.2
upper limit	0.6
Variability estimate	Standard error of the mean
Dispersion value	0.47

## Secondary: Change From Baseline in ESSDAI at Week 24

End point title	Change From Baseline in ESSDAI at Week 24
End point description: The ESSDAI is a physician-administered tool designed to measure disease activity. It consists of 12 organ-specific 'domains' contributing to disease activity associated with the participant's Sjogren's Syndrome only (constitutional, lymphadenopathy, articular, muscular, cutaneous, glandular, pulmonary, renal, peripheral nervous system, central nervous system, hematological, biological). Each domain is assessed for activity level (i.e., no, low, moderate, high) and assigned a numerical score based on pre-determined weighting of each individual domain. Overall score (ranges from 0 (no activity) to 123 (worst activity)) is calculated as sum of all individual weighted domain scores. A negative change from baseline value indicates improvement. Participants in the Full Analysis Set were analyzed.	
End point type	Secondary
End point timeframe: Baseline; Week 24	

End point values	Lanraplenib	Filgotinib	Tirabrutinib	Placebo
Subject group type	Reporting group	Reporting group	Reporting group	Reporting group
Number of subjects analysed	37	38	39	36
Units: Score on a scale				
least squares mean (standard error)	-4.3 (± 0.81)	-5.4 (± 0.75)	-4.0 (± 0.75)	-4.2 (± 0.78)

### Secondary: Change From Baseline in ESSPRI at Week 24

End point title	Change From Baseline in ESSPRI at Week 24
End point description:	
The ESSPRI is a participant-reported questionnaire to assess subjective participant symptoms and includes 3 domains (dryness, pain, and fatigue). Each domain is scored on scale of 0-10 (0 = no symptom at all and 10 = worst symptom imaginable), and an overall score is calculated as the mean of the three individual domains where all domains carry the same weight. Minimum score can be 0 and maximum score can be 10. A negative change from baseline value indicates improvement. Participants in the Full Analysis Set were analyzed.	
End point type	Secondary

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

First dose date up to last dose date (Maximum: 50.4 weeks) plus 30 days

Adverse event reporting additional description:

The Safety Analysis Set included participants who received at least one dose of study drug.

Assessment type	Systematic
-----------------	------------

### Dictionary used

Dictionary name	MedDRA
-----------------	--------

Dictionary version	22.0
--------------------	------

### Reporting groups

Reporting group title	Lanraplenib
-----------------------	-------------

Reporting group description:

Lanraplenib (1 × 30 mg tablet) + filgotinib placebo (1 × tablet) + tirabrutinib placebo (1 × tablet) orally once daily for up to 49.4 weeks.

Reporting group title	Filgotinib
-----------------------	------------

Reporting group description:

Filgotinib (1 × 200 mg tablet) + lanraplenib placebo (1 × tablet) + tirabrutinib placebo (1 × tablet) orally once daily for up to 50.4 weeks.

Reporting group title	Tirabrutinib
-----------------------	--------------

Reporting group description:

Tirabrutinib (1 × 40 mg tablet) + filgotinib placebo (1 × tablet) + lanraplenib placebo (1 × tablet) orally once daily for up to 50.3 weeks.

Reporting group title	Placebo to Lanraplenib
-----------------------	------------------------

Reporting group description:

Participants who received placebo for 24 weeks were re-randomized at the Week 24 visit and received lanraplenib (1 × 30 mg tablet) + filgotinib placebo (1 × tablet) + tirabrutinib placebo (1 × tablet) orally once daily for up to 25.1 weeks.

Reporting group title	Placebo to Filgotinib
-----------------------	-----------------------

Reporting group description:

Participants who received placebo for 24 weeks were re-randomized at the Week 24 visit and received filgotinib (1 × 200 mg tablet) + lanraplenib placebo (1 × tablet) + tirabrutinib placebo (1 × tablet) orally once daily for up to 24.4 weeks.

Reporting group title	Placebo to Tirabrutinib
-----------------------	-------------------------

Reporting group description:

Participants who received placebo for 24 weeks were rerandomized at the Week 24 visit and received tirabrutinib (1 × 40 mg tablet) + filgotinib placebo (1 × tablet) + lanraplenib placebo (1 × tablet) orally once daily for up to 24.9 weeks.

Reporting group title	Placebo on Placebo Controlled Period
-----------------------	--------------------------------------

Reporting group description:

Participants received filgotinib placebo + lanraplenib placebo + tirabrutinib placebo tablets orally once daily for 24 weeks in placebo controlled period.

At Week 24 visit, participants were re-randomized 1:1:1, in a blinded fashion and receive either of the following study drugs through Week 48:

- filgotinib + lanraplenib placebo + tirabrutinib placebo
- lanraplenib + filgotinib placebo + tirabrutinib placebo
- tirabrutinib + filgotinib placebo + lanraplenib placebo

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 July 2018	- Protocol Amendment included: 1) Addition of biomarker sample collection at Day 1 and Week 18 visits. 2) Addition of a primary and secondary analysis to be conducted after all participants either complete Week 24 visit or prematurely discontinued from the study. 3) Assembly of an internal unblinded team independent of the blinded study team to closely monitor study progress and drug safety.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

An unplanned review of unblinded clinical trial data was performed in this study that was not prospectively specified in the protocol. There was no impact on the overall integrity or conclusions of the study.

Notes:
