

## Clinical trial results:

### A Phase 2, Multicenter, Open-Label Study to Evaluate the Efficacy and Safety of Sofosbuvir/Velpatasvir for 12 Weeks in Subjects With Chronic HCV Infection Who Are on Dialysis for End Stage Renal Disease

#### Summary

EudraCT number	2016-003625-42
Trial protocol	GB ES
Global end of trial date	07 November 2018

#### Results information

Result version number	v1 (current)
This version publication date	27 November 2019
First version publication date	27 November 2019

#### Trial information

##### Trial identification

Sponsor protocol code	GS-US-342-4062
-----------------------	----------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03036852
WHO universal trial number (UTN)	-

Notes:

##### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	07 November 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	13 August 2018
Global end of trial reached?	Yes
Global end of trial date	07 November 2018
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

The primary objectives of this study were to evaluate safety, efficacy, and tolerability of treatment with sofosbuvir/velpatasvir (SOF/VEL) fixed-dose combination (FDC) for 12 weeks in adults on dialysis for end stage renal disease (ESRD) with chronic hepatitis C virus (HCV) infection of any genotype.

Protection of trial subjects:

The protocol and consent/assent forms were submitted by each investigator to a duly constituted Independent Ethics Committee (IEC) or Institutional Review Board (IRB) for review and approval before study initiation. All revisions to the consent/assent forms (if applicable) after initial IEC/IRB approval were submitted by the investigator to the IEC/IRB for review and approval before implementation in accordance with regulatory requirements.

This study was conducted in accordance with recognized international scientific and ethical standards, including but not limited to the International Conference on Harmonization guideline for Good Clinical Practice (ICH GCP) and the original principles embodied in the Declaration of Helsinki.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	22 March 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Spain: 6
Country: Number of subjects enrolled	United Kingdom: 16
Country: Number of subjects enrolled	Canada: 25
Country: Number of subjects enrolled	Israel: 6
Country: Number of subjects enrolled	New Zealand: 4
Country: Number of subjects enrolled	Australia: 2
Worldwide total number of subjects	59
EEA total number of subjects	22

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	39
From 65 to 84 years	18
85 years and over	2

## Subject disposition

### Recruitment

Recruitment details:

Participants were enrolled at study sites in Canada, the United Kingdom, Spain, Israel, New Zealand, and Australia. The first participant was screened on 22 March 2017. The last study visit occurred on 07 November 2018.

### Pre-assignment

Screening details:

78 participants were screened.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

### Arms

<b>Arm title</b>	SOF/VEL
------------------	---------

Arm description:

SOF/VEL (400/100 mg) FDC tablet orally once daily for 12 weeks

Arm type	Experimental
Investigational medicinal product name	Sofosbuvir/Velpatasvir
Investigational medicinal product code	
Other name	SOF/VEL; Eplusa®; GS-7977/GS-5816
Pharmaceutical forms	Film-coated tablet
Routes of administration	Oral use

Dosage and administration details:

400/100 mg administered orally once daily

Number of subjects in period 1	SOF/VEL
Started	59
Completed	53
Not completed	6
Adverse event, non-fatal	1
Death	2
Lost to follow-up	1
Lack of efficacy	2

## Baseline characteristics

## Secondary: Number of Participants Who Develop Viral Resistance (as Assessed by Presence of HCV NS5A and NS5B Genes) to SOF and VEL During Treatment and After Discontinuation of Treatment

End point title	Number of Participants Who Develop Viral Resistance (as Assessed by Presence of HCV NS5A and NS5B Genes) to SOF and VEL During Treatment and After Discontinuation of Treatment
-----------------	---

End point description:

Baseline deep sequencing of the HCV NS5A and NS5B genes was performed for all participants. For all participants with virologic failure, deep sequencing was performed at the first time point after virologic failure if the plasma or serum sample was available and HCV RNA was > 1000 IU/mL. Participants in the Resistance Analysis Population Set included all participants in the Safety Analysis Set with a virologic outcome and at least 1 gene sequenced. All data are reported at a 15% assay cutoff.

End point type	Secondary

## Secondary: Pharmacokinetic (PK) Parameter: AUCtau of SOF

End point title	Pharmacokinetic (PK) Parameter: AUCtau of SOF
-----------------	---

End point description:

AUCtau is defined as the population PK derived area under the concentration versus time curve of the

drug over the dosing interval. Participants in the PK Analysis Set (all participants who took at least 1 dose of study drug and had at least 1 nonmissing postdose concentration value for the corresponding analyte in plasma) with available data were analyzed. Population PK analyses of all sparse and intensive PK data were utilized to estimate steady-state AUCtau of SOF.

End point type	Secondary
End point timeframe:	
Sparse PK samples at Weeks 6, 8, and 12 (all participants). Intensive PK samples at predose, 0.25, 0.5, 1, 2, 4, 6, 8, 10, and 12 hours postdose once at Week 6, 8, or 12 (participants who enrolled in the optional PK substudy (N=1))

## Secondary: PK Parameter: AUCtau of GS-331007 (Metabolite of SOF)

End point title	PK Parameter: AUCtau of GS-331007 (Metabolite of SOF)
End point description:	
AUCtau is defined as the population PK derived area under the concentration versus time curve of the drug over the dosing interval. Participants in the PK Analysis Set were analyzed. Population PK analyses of all sparse and intensive PK data were utilized to estimate steady-state AUCtau of GS-331007 .	
End point type	Secondary
End point timeframe:	
Sparse PK samples at Weeks 6, 8, and 12 (all participants). Intensive PK samples at predose, 0.25, 0.5, 1, 2, 4, 6, 8, 10, and 12 hours postdose once at Week 6, 8, or 12 (participants who enrolled in the optional PK substudy (N=1))

## Secondary: PK Parameter: Ctau of VEL

End point title	PK Parameter: Ctau of VEL
End point description:	
Ctau is defined as the population PK derived concentration of the drug at the end of a 24 hour dosing interval. The 24 hour Ctau is estimated based on the combination of sparse PK samples collected at random times across the dosing interval as well as intensive PK samples collected for up to 12 hours post-dose. Participants in the PK Analysis Set were analyzed. Population PK analyses of all sparse and intensive PK data were utilized to estimate steady-state Ctau of VEL.	
End point type	Secondary
End point timeframe:	
Sparse PK samples at Weeks 6, 8, and 12 (all participants). Intensive PK samples at predose, 0.25, 0.5, 1, 2, 4, 6, 8, 10, and 12 hours postdose once at Week 6, 8, or 12 (participants who enrolled in the optional PK substudy (N=1))

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

First dose date up to Week 12 plus 30 days; All-Cause Mortality: First dose date up to Posttreatment Week 24

Adverse event reporting additional description:

The Safety Analysis Set included all participants who received at least 1 dose of study drug.

Assessment type	Systematic

### Reporting groups

Reporting group title	SOF/VEL
-----------------------	---------

Reporting group description:

SOF/VEL (400/100 mg) FDC tablet orally once daily for 12 weeks

Serious adverse events	SOF/VEL		
Total subjects affected by serious adverse events			
subjects affected / exposed	11 / 59 (18.64%)		
number of deaths (all causes)	2		
number of deaths resulting from adverse events			
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Neurilemmoma benign			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Injury, poisoning and procedural complications			
Post procedural haemorrhage			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Post procedural swelling			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Pubis fracture			

subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Cardiac disorders			
Atrial fibrillation			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Cardiac failure congestive			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Psychiatric disorders			
Anxiety			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Depression			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Infections and infestations			
Cellulitis			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Device related infection			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Lower respiratory tract infection viral			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Pneumonia			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		
Streptococcal bacteraemia			
subjects affected / exposed	1 / 59 (1.69%)		
occurrences causally related to treatment / all	0 / 1		
deaths causally related to treatment / all	0 / 0		

Frequency threshold for reporting non-serious adverse events: 5 %

<b>Non-serious adverse events</b>	SOF/VEL		
Total subjects affected by non-serious adverse events			
subjects affected / exposed	33 / 59 (55.93%)		
Nervous system disorders			
Headache			
subjects affected / exposed	10 / 59 (16.95%)		
occurrences (all)	11		
Dizziness			
subjects affected / exposed	5 / 59 (8.47%)		
occurrences (all)	5		
General disorders and administration site conditions			
Fatigue			
subjects affected / exposed	8 / 59 (13.56%)		
occurrences (all)	10		
Gastrointestinal disorders			
Nausea			
subjects affected / exposed	8 / 59 (13.56%)		
occurrences (all)	9		
Vomiting			
subjects affected / exposed	8 / 59 (13.56%)		
occurrences (all)	10		
Constipation			
subjects affected / exposed	4 / 59 (6.78%)		
occurrences (all)	4		
Diarrhoea			

subjects affected / exposed occurrences (all)	3 / 59 (5.08%) 3		
Dyspepsia subjects affected / exposed occurrences (all)	3 / 59 (5.08%) 3		
Gastrooesophageal reflux disease subjects affected / exposed occurrences (all)	3 / 59 (5.08%) 3		
Respiratory, thoracic and mediastinal disorders Cough subjects affected / exposed occurrences (all)	5 / 59 (8.47%) 5		
Psychiatric disorders Insomnia subjects affected / exposed occurrences (all)	6 / 59 (10.17%) 6		
Musculoskeletal and connective tissue disorders Arthralgia subjects affected / exposed occurrences (all)	4 / 59 (6.78%) 4		
Muscle spasms subjects affected / exposed occurrences (all)	3 / 59 (5.08%) 3		
Metabolism and nutrition disorders Decreased appetite subjects affected / exposed occurrences (all)	3 / 59 (5.08%) 3		

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
29 November 2016	<ul style="list-style-type: none"><li>• The hemodialysis PK substudy design was updated to remove dialysate collection.</li><li>• An inclusion criterion that the most recent HCV treatment must have been completed at least 8 weeks prior to screening was added.</li></ul>
30 January 2017	<ul style="list-style-type: none"><li>• Infection with hepatitis B virus (HBV) was removed from the exclusion criteria</li><li>• Hepatitis B core antibody (HBcAb) and hepatitis B surface antigen (HBsAg) testing was added at screening. In addition, for subjects who were HBcAb+ at screening, HBV DNA testing was performed at baseline/Day 1, every 4 weeks on-treatment and at posttreatment Weeks 4, 12, and 24.</li><li>• During the conduct of the study, the number of subjects the Data Monitoring Committee (DMC) would evaluate was updated from the first 25 subjects to the first 12 subjects having completed 12 weeks of treatment or early termination, and every 3 months thereafter. The subsequent safety reviews alternated between a review by the DMC chair of all serious adverse events (SAEs) and deaths, and a review of safety data by the DMC meeting as specified by the DMC charter.</li></ul>
02 March 2017	Nonclinical toxicology information was added to communicate to investigators the potential for hematologic toxicity (decreased red blood cell [RBC] counts) associated with higher GS-331007 exposure.

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
