

## Clinical trial results:

### Immunotherapy by Nivolumab after prior Chemotherapy for HIV+ patients with Advanced non-small cell lung cancer (NSCLC): IFCT-CHIVA2 phase IIa trial

#### Summary

EudraCT number	2016-003796-22
Trial protocol	FR
Global end of trial date	18 February 2021

#### Results information

Result version number	v1 (current)
This version publication date	22 October 2022
First version publication date	22 October 2022

#### Trial information

##### Trial identification

Sponsor protocol code	IFCT-1602
-----------------------	-----------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03304093
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	IFCT
Sponsor organisation address	10 rue de la Grange-Batelière, Paris, France, 75009
Public contact	Contact, IFCT, 33 156811045, contact@ifct.fr
Scientific contact	Contact , IFCT, 33 156811045, contact@ifct.fr

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	30 June 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	18 February 2021
Was the trial ended prematurely?	Yes

Notes:

## General information about the trial

Main objective of the trial:

Efficacy of the anti-PD1 antibody (nivolumab) as measured by DCR.

Protection of trial subjects:

Algorithms for management of adverse events were provided in the protocol.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	12 December 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	France: 16
Worldwide total number of subjects	16
EEA total number of subjects	16

Notes:

### Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	13
From 65 to 84 years	3
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Sixteen patients were enrolled between December 2017 and July 2019 in 7 centers.

### Pre-assignment

Screening details:

Patients with combined (c)ART-controlled HIV-1 infection (VL <200 copies/mL), regardless of their CD4+ T-cell count, and histologically/cytologically proven NSCLC stage IIIB or IV at diagnosis or after relapse post-surgery were included. Patients had received at least one prior platinum-based doublet chemotherapy regimen

### Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

### Arms

Arm title	Nivolumab
-----------	-----------

Arm description:

Nivolumab was administered intravenously over 30 minutes at 3 mg/kg every 2 weeks, until disease progression or limiting toxicity.

Arm type	Experimental
Investigational medicinal product name	Nivolumab
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Concentrate for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Nivolumab was administered intravenously over 30 minutes at 3 mg/kg every 2 weeks, until disease progression or limiting toxicity.

Number of subjects in period 1	Nivolumab
Started	16
Completed	0
Not completed	16
Adverse event, serious fatal	4
Patient refusal	1
Adverse event, non-fatal	1
Lack of efficacy	10

## Baseline characteristics

### Reporting groups

Reporting group title	Overall trial (overall period)
Reporting group description: -	

Reporting group values	Overall trial (overall period)	Total	
Number of subjects	16	16	
Age categorical Units: Subjects			
Adults (18-64 years)	13	13	
From 65-84 years	3	3	
Age continuous Units: years			
median	58.4		
full range (min-max)	44.0 to 70.9	-	
Gender categorical Units: Subjects			
Female	2	2	
Male	14	14	
Smoking status Units: Subjects			
Yes	16	16	
No	0	0	
WHO performance status			
Measure Description: The WHO performance status (PS) classification categorizes patients as: 0: able to carry out all normal activity without restriction 1: restricted in strenuous activity but ambulatory and able to carry out light work 2 : ambulatory and capable of all self-care but unable to carry out any work activities; up and about more than 50% of waking hours 3: symptomatic and in a chair or in bed for greater than 50% of the day but not bedridden 4: completely disabled; cannot carry out any self-care; totally confined to bed or chair.			
Units: Subjects			
PS 0	5	5	
PS 1	7	7	
PS 2	4	4

## End points

### End points reporting groups

Reporting group title	Nivolumab
Reporting group description:	
Nivolumab was administered intravenously over 30 minutes at 3 mg/kg every 2 weeks, until disease progression or limiting toxicity.	

### Primary: Disease Control Rate

End point title	Disease Control Rate <sup>[1]</sup>
End point description:	
Patients who have achieved complete response (disappearance of all target lesions), partial response (at least a 30% decrease in the sum of diameters of target lesions since inclusion) and stable disease (between less than 30% decrease and less than 20% increase) as evaluated with Response Evaluation Criteria In Solid Tumors Criteria (RECIST v1.1).	
End point type	Primary
End point timeframe:	
8 weeks	
Notes:	
[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.	
Justification: Not applicable as the study was single arm	

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: % of participants				
number (confidence interval 95%)				
Disease control	62.5 (38.8 to 86.2)			
Progressive disease	31.3 (8.5 to 54.0)			
Not evaluable/Not done	6.3 (0.0 to 18.1)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Duration of Response

End point title	Duration of Response
End point description:	
Duration of response is defined as the time from the date of the first documented response (complete response (CR) or partial response (PR)) or disease stability (SD) to the earliest date of disease progression or death due to any cause. If a patient with a CR, PR or SD has neither progressed nor died at the time of the analysis cut-off, the patient will be censored at the date of last adequate tumour assessment.	
End point type	Secondary

End point timeframe:

Up to 1 year

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: months				
median (full range (min-max))	3.52 (0.7 to 28.6)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Responses Rate According to Tissue PD-L1 Expression

End point title	Responses Rate According to Tissue PD-L1 Expression
End point description:	
End point type	Secondary
End point timeframe:	
8 weeks	

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: % of participants				
number (confidence interval 95%)				
PD-L1 positive - partial response	20.0 (0.0 to 55.1)			
PD-L1 positive - stable disease	80.0 (44.9 to 100.0)			
PD-L1 positive - progressive disease	0 (0 to 0)			
PD-L1 negative - partial response	11.1 (0.0 to 31.6)			
PD-L1 negative - stable disease	33.3 (2.5 to 64.1)			
PD-L1 negative - progressive disease	44.4 (12.0 to 76.9)			
PD-L1 negative - Not evaluable/Not done/missing	11.1 (0.0 to 31.6)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Progression Free Survival

End point title	Progression Free Survival
-----------------	---------------------------

End point description:

Time between the date of inclusion and the first date of documented progression or death due to any cause, whichever occurs first. Subjects who die without a reported progression will be considered to have progressed on the date of their death.

Progression is defined using Response Evaluation Criteria In Solid Tumors Criteria(RECIST v1.1), as a 20% increase in the sum of the longest diameter of target lesions, taking as reference the smallest sum since inclusion or a unequivocal increase of a non-target lesion, or the appearance of new lesion(s).

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 1 year

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	14			
Units: months				
median (confidence interval 95%)	3.4 (1.8 to 5.5)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: Overall Survival

End point title	Overall Survival
-----------------	------------------

End point description:

Time elapsed between the date of inclusion and death. Subjects who did not die will be censored on the last date a subject was known to be alive.

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 1 year

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: month				
median (confidence interval 95%)	10.9 (2.17 to 9999)			

## Statistical analyses

No statistical analyses for this end point

### Secondary: Quality of Life Measured by LCSS Questionnaire

End point title	Quality of Life Measured by LCSS Questionnaire
-----------------	--

End point description:

Quality of life is assessed by Lung Cancer Symptom Scale (LCSS). Changes from baseline to the 9 items of the scale are classified into 3 categories: improvement (decrease of at least 1 point), deterioration (increase of at least 1 point) and stabilization.

End point type	Secondary
----------------	-----------

End point timeframe:

After 2 cycles

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	11			
Units: Participants				
Anorexia - improvement	2			
Anorexia - Stability	1			
Anorexia - Deterioration	8			
Fatigue - Improvement	0			
Fatigue - Stability	4			
Fatigue - Deterioration	7			
Cough - Improvement	4			
Cough - Stability	4			
Cough - Deterioration	3			
Dyspnea - Improvement	2			
Dyspnea - Stability	4			
Dyspnea - Deterioration	5			
Hemoptysis - Improvement	1			
Hemoptysis - Stability	10			
Hemoptysis - Deterioration	0			
Pain - Improvement	3			
Pain - Stability	4			
Pain - Deterioration	4			
Symptom distress - Improvement	5			
Symptom distress - Stability	2			
Symptom distress - Deterioration	4			
Activity level - Improvement	5			
Activity level - Stability	1			
Activity level - Deterioration	5			

## Statistical analyses

No statistical analyses for this end point

### Secondary: 6-month Overall Survival

End point title 6-month Overall Survival

End point description:

End point type Secondary

End point timeframe:

6 months

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: percent				
number (confidence interval 95%)	68.7 (40.5 to 85.6)			

### Statistical analyses

No statistical analyses for this end point

### Secondary: 12-month survival rate

End point title 12-month survival rate

End point description:

End point type Secondary

End point timeframe:

12 months

End point values	Nivolumab			
Subject group type	Reporting group			
Number of subjects analysed	16			
Units: percent				
number (confidence interval 95%)	48.1 (22.4 to 69.9)			

### Statistical analyses

No statistical analyses for this end point

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

Adverse events were collected for a patient from the date of signature of inform consent form, during treatment period and until 100 days after the last dose of study treatment. Deaths were collected until data analysis.

Adverse event reporting additional description:

The maximal grade of adverse events was collected by cycle of treatment.

Assessment type	Non-systematic
-----------------	----------------

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
11 February 2019	A substantial modification was done in order: - clarify which hospitalization were not to be reported as SAEs - increase inclusion duration

Notes:

---

### Interruptions (globally)

Were there any global interruptions to the trial? Yes

Date	Interruption	Restart date
31 January 2020	Due to difficulties in recruiting patients with the rare HIV-NSCLC combination, the study independent data monitoring committee recommended that patient inclusion be stopped in January 2020.	-

Notes:

### Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Our study is limited by the small sample size, which was due to difficulties in recruiting patients with the rare HIV-NSCLC combination.

Notes:

---
