

Clinical trial results:

A phase 4 trial comparing the efficacy of subcutaneous injections of brodalumab to oral administrations of fumaric acid esters in adults with moderate to severe plaque psoriasis

Summary

EudraCT number	2016-003867-21
Trial protocol	DE
Global end of trial date	21 March 2019

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	19 August 2019
Is this the analysis of the primary completion data?	Yes
Primary completion date	24 January 2019
Global end of trial reached?	Yes
Global end of trial date	21 March 2019
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the efficacy of subcutaneous injections of brodalumab to oral administration of fumaric acid esters in subjects with moderate to severe plaque psoriasis who are naive to systemic treatment.

Protection of trial subjects:

This clinical trial was conducted to conform to the principles of the Declaration of Helsinki as adopted by the 18th World Medical Association General Assembly, 1964, and subsequent amendments.

All subjects or their legally acceptable representative received written and verbal information concerning the clinical trial.

Subjects or their legally acceptable representative were asked to consent that their personal data were recorded, collected, processed and could be transferred to EU and non-EU countries in accordance with any national legislation regulating privacy and data protection.

Background therapy: -

Evidence for comparator:

An oral preparation containing fumaric acid esters (dimethyl fumarate and monoethyl fumarate salts; Fumaderm®) was selected as comparator, because it is a well-established and widely used systemic treatment in Germany for patients with moderate to severe plaque psoriasis in whom topical therapy is not effective (Nast et al. J Dtsch Dermatol Ges. 2018;165]:645-669). Fumaric acid esters were recommended in 2017 as appropriate comparator for this patient population by the Federal Joint Committee (G-BA), a German decision-making body (Scientific Advice [2016-B-165] of the Gemeinsamer Bundesausschuss (G-BA) according to § 8 Abs.1 AM-NutzenV. 2017).

Actual start date of recruitment	01 October 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Germany: 210
Worldwide total number of subjects	210
EEA total number of subjects	210

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0

Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	193
From 65 to 84 years	17
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Number of subjects screened: 325

Screening failures: 101

Withdrawn before randomisation: 14

Period 1

Period 1 title	Open-label treatment (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

The risk of bias related to open-label treatment was mitigated by blinded investigator assessments and detailed precautions were taken to avoid unblinding assessors. Due to potential dose adjustments needed for subjects randomised to fumaric acid esters, the investigator and subject needed to know the treatment allocated. The sponsor was also blinded.

Arms

Are arms mutually exclusive?	Yes
------------------------------	-----

Arm title	Brodalumab
------------------	------------

Arm description:

Brodalumab 210 mg s.c. injection Q2W

Arm type	Experimental
Investigational medicinal product name	Brodalumab
Investigational medicinal product code	
Other name	Kyntheum (R)
Pharmaceutical forms	Solution for injection
Routes of administration	Subcutaneous use

Dosage and administration details:

Dosage: 210 mg in 1.5 mL solution for subcutaneous injection (140 mg/mL). Weekly administration for the first 3 weeks (Weeks 0, 1, and 2) followed by administration every 2 weeks (Q2W) up to Week 24.

Arm title	Fumaric acid esters
------------------	---------------------

Arm description:

Oral fumaric acid esters up to 240 mg 3 times daily (TID)

Arm type	Active comparator
Investigational medicinal product name	fumaric acid esters
Investigational medicinal product code	
Other name	Fumaderm (R), Fumaderm (R) initial
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

Administration by participant 3 times daily in doses ranging from 30 to 240 mg dimethyl fumarate per oral administration.

Number of subjects in period 1	Brodalumab	Fumaric acid esters
Started	105	105
Completed	91	58
Not completed	14	47
Consent withdrawn by subject	1	8
Adverse event, non-fatal	7	28
Other reason	5	5
Lost to follow-up	-	2
Lack of efficacy	1	4

Reporting group description: -

Serious adverse events	Fumaric Acid Ester	Brodalumab 210 mg Q2W	
Total subjects affected by serious adverse events			
subjects affected / exposed	1 / 102 (0.98%)	3 / 104 (2.88%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Neoplasms benign, malignant and unspecified (incl cysts and polyps)			
Pancreatic carcinoma metastatic			
alternative assessment type: Non-systematic			
subjects affected / exposed	0 / 102 (0.00%)	1 / 104 (0.96%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Gastrointestinal disorders			
Crohn's disease			
alternative assessment type: Non-systematic			
subjects affected / exposed	1 / 102 (0.98%)	0 / 104 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	
Reactive gastropathy			
alternative assessment type: Non-systematic			

subjects affected / exposed	0 / 102 (0.00%)	1 / 104 (0.96%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	
Skin and subcutaneous tissue disorders			
Stasis dermatitis			
alternative assessment type: Non-systematic			
subjects affected / exposed	0 / 102 (0.00%)	1 / 104 (0.96%)	
occurrences causally related to treatment / all	0 / 0	0 / 1	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 5 %

Non-serious adverse events	Fumaric Acid Ester	Brodalumab 210 mg Q2W	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	96 / 102 (94.12%)	91 / 104 (87.50%)	
Injury, poisoning and procedural complications			
Overdose			
alternative assessment type: Non-systematic			
subjects affected / exposed	0 / 102 (0.00%)	8 / 104 (7.69%)	
occurrences (all)	0	8	
Vascular disorders			
Flushing			
alternative assessment type: Non-systematic			
subjects affected / exposed	29 / 102 (28.43%)	0 / 104 (0.00%)	
occurrences (all)	40	0	
Nervous system disorders			
Headache			
alternative assessment type: Non-systematic			
subjects affected / exposed	12 / 102 (11.76%)	13 / 104 (12.50%)	
occurrences (all)	19	27	
Blood and lymphatic system disorders			
Lymphopenia			
alternative assessment type: Non-systematic			
subjects affected / exposed	14 / 102 (13.73%)	2 / 104 (1.92%)	
occurrences (all)	14	3	

General disorders and administration site conditions Fatigue alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	6 / 102 (5.88%) 8	5 / 104 (4.81%) 6	
Gastrointestinal disorders Abdominal pain alternative assessment type: Non-systematic subjects affected / exposed occurrences (all) Abdominal pain upper alternative assessment type: Non-systematic subjects affected / exposed occurrences (all) Diarrhoea alternative assessment type: Non-systematic subjects affected / exposed occurrences (all) Nausea alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	11 / 102 (10.78%) 13 28 / 102 (27.45%) 43 59 / 102 (57.84%) 77 9 / 102 (8.82%) 13	2 / 104 (1.92%) 2 2 / 104 (1.92%) 2 4 / 104 (3.85%) 4 6 / 104 (5.77%) 7	
Respiratory, thoracic and mediastinal disorders Oropharyngeal pain alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	1 / 102 (0.98%) 1	6 / 104 (5.77%) 6	
Skin and subcutaneous tissue disorders Pruritus alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	2 / 102 (1.96%) 2	6 / 104 (5.77%) 6	
Psychiatric disorders Depressive symptom alternative assessment type: Non-systematic			

subjects affected / exposed occurrences (all)	7 / 102 (6.86%) 7	5 / 104 (4.81%) 5	
Musculoskeletal and connective tissue disorders Arthralgia alternative assessment type: Non-systematic subjects affected / exposed occurrences (all) Back pain alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	4 / 102 (3.92%) 4 1 / 102 (0.98%) 1	9 / 104 (8.65%) 10 6 / 104 (5.77%) 6	
Infections and infestations Viral upper respiratory tract infection alternative assessment type: Non-systematic subjects affected / exposed occurrences (all)	21 / 102 (20.59%) 24	35 / 104 (33.65%) 41	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
12 October 2017	The reason for the amendment is to implement requirements from the health authorities in Germany.
17 August 2018	The reason for Amendment 2 is to clarify that exclusion criteria related to the PROs eC-SSRS and PHQ-8 pertain to both the screening and the baseline visit. Also, the wording for the eC-SSRS criteria, and the described assessment hereof, has been updated to reflect the report from the eC-SSRS. The wording in version 3.0 of the protocol was based on the paper version of the C-SSRS.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
