

Clinical trial results:

The effect of curcumin and piperine on the pharmacokinetics of tamoxifen in patients with estrogen receptor positive breast cancer 'the ELDORADO study'

Summary

EudraCT number	2016-004008-71
Trial protocol	NL
Global end of trial date	01 May 2018

Results information

Result version number	v1 (current)
This version publication date	01 December 2021
First version publication date	01 December 2021
Summary attachment (see zip file)	Cancers publication (cancers-11-00403.pdf)

Trial information

Trial identification

Sponsor protocol code	ELDORADO
-----------------------	----------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Erasmus MC
Sponsor organisation address	Doctor Molewaterplein 40, Rotterdam, Netherlands,
Public contact	Ron Mathijssen, Erasmus MC, a.mathijssen@erasmusmc.nl
Scientific contact	Ron Mathijssen, Erasmus MC, a.mathijssen@erasmusmc.nl

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	01 May 2018
Is this the analysis of the primary completion data?	Yes
Primary completion date	01 May 2018
Global end of trial reached?	Yes
Global end of trial date	01 May 2018
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To determine the influence of curcumin with or without piperine, in patients with estrogen receptor positive breast cancer, on tamoxifen/endoxifen plasma pharmacokinetics (AUC).

Protection of trial subjects:

Patients were seen by a doctor on regular visits to the outpatient clinic and also during hospital admissions

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 January 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 17
Worldwide total number of subjects	17
EEA total number of subjects	17

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	17
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

Patients were included from january 2017 until may 2018

Pre-assignment

Screening details:

Seventeen patients were screened and included in the study. One patient was excluded because of voluntary withdrawal, resulting in 16 evaluable patients.

Period 1

Period 1 title	overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	arm ABC

Arm description:

Patients started with tamoxifen monotherapy followed by tamoxifen + curcumin and followed by tamoxifen+curcumin+piperin

Arm type	Experimental
Investigational medicinal product name	curcumin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

1200 mg three times daily

Investigational medicinal product name	Piperin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

10 mg three times daily

Arm title	Randomisation CBA
------------------	-------------------

Arm description:

Reversed order so patients started with curcumin+piperin+tamoxifen followed by tamoxifen+curcumin and ultimately followed by tamoxifen monotherapy

Arm type	Experimental
Investigational medicinal product name	curcumin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

1200 mg three times daily

Investigational medicinal product name	Piperin
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

10 mg three times daily

Number of subjects in period 1^[1]	arm ABC	Randomisation CBA
Started	9	7
Completed	9	7

Notes:

[1] - The number of subjects reported to be in the baseline period are not the same as the worldwide number enrolled in the trial. It is expected that these numbers will be the same.

Justification: There were 17 patients enrolled but there were 16 patients analyzed.

Reporting groups

Reporting group title	ABC group
-----------------------	-----------

Reporting group description:

Patients started with tamoxifen monotherapy followed by tamoxifen + curcumin and followed by tamoxifen+curcumin+piperin

Reporting group title	CBA group
-----------------------	-----------

Reporting group description:

Reversed order so patients started with curcumin+piperin+tamoxifen followed by tamoxifen+curcumin and ultimately followed by tamoxifen monotherapy

Notes:

[1] - There are no non-serious adverse events recorded for these results. It is expected that there will be at least one non-serious adverse event reported.

Justification: We had some adverse events in our group as posted in the article, but there were no serious or unexpected adverse events. Therefore we mentioned zero non-serious adverse events in these results, since they were expected regular clinical side-effects

Serious adverse events	ABC group	CBA group	
Total subjects affected by serious adverse events			
subjects affected / exposed	1 / 8 (12.50%)	0 / 8 (0.00%)	
number of deaths (all causes)	0	0	
number of deaths resulting from adverse events	0	0	
Cardiac disorders			
collaps	Additional description: Patient experienced a collapse during study, probably not related to the study treatment		
subjects affected / exposed	1 / 8 (12.50%)	0 / 8 (0.00%)	
occurrences causally related to treatment / all	0 / 1	0 / 0	
deaths causally related to treatment / all	0 / 0	0 / 0	

Frequency threshold for reporting non-serious adverse events: 3 %

Non-serious adverse events	ABC group	CBA group	
Total subjects affected by non-serious adverse events			
subjects affected / exposed	0 / 8 (0.00%)	0 / 8 (0.00%)	

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
