

Clinical trial results:

An open-label, randomized, single dose, two period, crossover study to determine the bioequivalence between valsartan 160 mg pediatric final market image (FMI) formulation (solution) and clinical service form (CSF) of valsartan 160 mg extemporaneous suspension in healthy adult volunteers.

Summary

EudraCT number	2016-004323-23
Trial protocol	Outside EU/EEA
Global end of trial date	14 August 2008

Results information

Result version number	v1 (current)
This version publication date	28 March 2018
First version publication date	28 March 2018

Trial information

Trial identification

Sponsor protocol code	CVAL489K2101
-----------------------	--------------

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	Yes
EMA paediatric investigation plan number(s)	EMA-000005-PIP01-07
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	14 August 2008
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	14 August 2008
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To compare the rate and extent of absorption of valsartan between the valsartan pediatric FMI formulation and a valsartan CSF extemporaneous suspension.

Protection of trial subjects:

The study was in compliance with the ethical principles derived from the Declaration of Helsinki and the International Conference on Harmonization (ICH) Good Clinical Practice (GCP) Guidelines. All the local regulatory requirements pertinent to safety of trial subjects were also followed during the conduct of the trial.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	02 August 2008
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects**Subjects enrolled per country**

Country: Number of subjects enrolled	India: 86
Worldwide total number of subjects	86
EEA total number of subjects	0

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	86
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

Each subject participated in a 21-day screening period, two baseline periods and two treatment periods and an end-of-study evaluation. The washout period between the two treatments was at least 7 days.

Period 1

Period 1 title	Overall Period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Not blinded

Arms

Arm title	All Subjects
-----------	--------------

Arm description:

Treatment sequence: Valsartan pediatric FMI formulation(3mg/mL)/Valsartan CSF extemporaneous suspension(16mg/mL) followed by Valsartan CSF extemporaneous suspension (16mg/mL)/ Valsartan pediatric FMI formulation (3mg/mL).

Arm type	Experimental
Investigational medicinal product name	Valsartan
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

A suspension was prepared by using marketed valsartan tablets 160 mg, commercially available suspending and sweetening agent. 53.3 ml of this solution will be administered, so that the final dose will be equivalent to 160 mg Valsartan.

Investigational medicinal product name	Ora-Plus®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for oral suspension
Routes of administration	Oral use

Dosage and administration details:

A commercial suspending vehicle.

Investigational medicinal product name	Ora-Sweet®
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Suspension for oral suspension
Routes of administration	Oral use

Dosage and administration details:

A commercial sweetening vehicle.

Investigational medicinal product name	Valsartan Extemporaneous Suspension
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

A suspension was prepared by using marketed valsartan tablets 160 mg, commercially available

suspending and sweetening agent. 10 ml of this suspension was administered orally to give 160 mg Valsartan.

Number of subjects in period 1	All Subjects
Started	86
Completed	81
Not completed	5
Consent withdrawn by subject	2
Adverse event, non-fatal	2
Protocol deviation	1
