

Clinical trial results:

A phase II, randomised, double blind, placebo controlled, three way crossover study to assess the bronchodilator effect of RPL554 administered in addition to open label tiotropium in patients with COPD.

Summary

EudraCT number	2016-004450-15
Trial protocol	GB
Global end of trial date	24 July 2017

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	25 September 2017
Is this the analysis of the primary completion data?	Yes
Primary completion date	24 July 2017
Global end of trial reached?	Yes
Global end of trial date	24 July 2017
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

To investigate the bronchodilator effect on peak FEV1 measured in first 4 hours after dosing and average FEV1 over 12 hours of nebulised RPL554, dosed twice daily for 3 days (five total doses), as compared to placebo when administered in addition to once daily tiotropium.

Protection of trial subjects:

Standard procedures for emergency care were followed for any individual adverse events if clinically needed. Short acting bronchodilators could be used as rescue medication.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 January 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United Kingdom: 30
Worldwide total number of subjects	30
EEA total number of subjects	30

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	15
From 65 to 84 years	15
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

The first patient was consented on 27 January 2017. Overall, 74 patients were screened for the study and 30 were treated. Patients received study treatment between 14 February 2017 and 07 July 2017. A total of 26 patients completed the study and 4 were withdrawn.

Pre-assignment

Screening details:

74 were screened. The main reasons for screen failure were reversibility test criteria not met (21 patients), withdrew consent (5 patients) and unsuitable COPD history (4 patients). Patients had to discontinue long acting bronchodilators on the day prior to screening and short acting bronchodilators for 8 hours before all spirometry assessments

Period 1

Period 1 title	Overall trial (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst, Assessor

Arms

Are arms mutually exclusive?	No
Arm title	Tiotropium+1.5 mg RPL554

Arm description:

18 mcg tiotropium once daily and 1.5 mg RPL554 twice daily

Arm type	Experimental
Investigational medicinal product name	Tiotropium
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder, hard capsule
Routes of administration	Inhalation use

Dosage and administration details:

18 mcg tiotropium administered by dry powder inhaler

Investigational medicinal product name	1.5 mg RPL554
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nebuliser suspension
Routes of administration	Inhalation use

Dosage and administration details:

1.5 mg RPL554 administered using a nebuliser

Arm title	Tiotropium+6 mg RPL554
------------------	------------------------

Arm description:

18 mcg tiotropium once daily and 6 mg RPL554 twice daily

Arm type	Experimental
Investigational medicinal product name	Tiotropium
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Inhalation powder, hard capsule
Routes of administration	Inhalation use

Dosage and administration details:

18 mcg tiotropium administered by dry powder inhaler

Investigational medicinal product name	6 mg RPL554
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Nebuliser suspension
Routes of administration	Inhalation use
Dosage and administration details:	
6 mg RPL554 administered using a nebuliser	
Arm title	Tiotropium+placebo
