

Clinical trial results:

A Phase 3 Randomized, Double-blind, Multi-dose, Placebo and Naproxen-Controlled Study to Evaluate the Efficacy and Safety of Fasinumab in Patients with Pain Due to Osteoarthritis of the Knee or Hip Summary

EudraCT number	2016-005020-29
Trial protocol	BG LT GB DK PL HU ES RO
Global end of trial date	27 August 2021

Results information

Result version number	v1 (current)
This version publication date	10 September 2022
First version publication date	10 September 2022

Trial information

Trial identification

Sponsor protocol code	R475-OA-1611

Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	-
WHO universal trial number (UTN)	-

Notes:

Sponsors

Sponsor organisation name	Regeneron Pharmaceuticals, Inc.
Sponsor organisation address	777 Old Saw Mill River Road, Tarrytown, NY, United States, 10591
Public contact	Clinical Trials Administrator, Regeneron Pharmaceuticals, Inc., 001 844-734-6643, clinicaltrials@regeneron.com
Scientific contact	Clinical Trials Administrator, Regeneron Pharmaceuticals, Inc., 001 844-734-6643, clinicaltrials@regeneron.com

Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	27 August 2021
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	27 August 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The primary objective was to evaluate the efficacy of fasinumab compared with placebo, when administered for up to 16 weeks in participants with pain due to osteoarthritis (OA) of the knee or hip.

Protection of trial subjects:

It is the responsibility of both the sponsor and the investigator(s) to ensure that this clinical study is conducted in accordance with the ethical principles that have their origin in the Declaration of Helsinki, and that are consistent with the ICH guidelines for GCP and applicable regulatory requirements.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	17 August 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Bulgaria: 27
Country: Number of subjects enrolled	Denmark: 34
Country: Number of subjects enrolled	Germany: 11
Country: Number of subjects enrolled	Hungary: 120
Country: Number of subjects enrolled	Lithuania: 16
Country: Number of subjects enrolled	Poland: 444
Country: Number of subjects enrolled	South Africa: 1307
Country: Number of subjects enrolled	Romania: 91
Country: Number of subjects enrolled	Russian Federation: 109
Country: Number of subjects enrolled	Spain: 145
Country: Number of subjects enrolled	Ukraine: 100
Country: Number of subjects enrolled	United Kingdom: 294
Country: Number of subjects enrolled	United States: 609
Worldwide total number of subjects	3307
EEA total number of subjects	888

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	1876
From 65 to 84 years	1409
85 years and over	22

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

9157 total participants were screened. 5850 were screen failures: 4681 did not meet criteria, 4 adverse events, 1 Death, 397 investigator/sponsor decision, 130 imaging, 18 lost to follow-up, 93 protocol noncompliance, 225 other, 301 withdrawal of consent. 3307 participants were randomized into the study and 28 were improperly randomized.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Investigator, Monitor, Subject, Carer, Data analyst, Assessor

Arms

Are arms mutually exclusive?	Yes
Arm title	Placebo

Arm description:

Fasimumab-matching placebo administered by subcutaneous (SC) injection, every 4 weeks (Q4W) and naproxen-matching placebo administered orally (PO), twice a day (BID)

Arm type	Placebo
Investigational medicinal product name	Fasimumab-matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use

Dosage and administration details:

Fasimumab-matching placebo administered subcutaneously

Investigational medicinal product name	Naproxen-matching placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

Naproxen-matching placebo administered orally

Arm title	Naproxen
------------------	----------

Arm description:

Fasimumab-matching placebo SC Q4W and naproxen 500 mg PO, BID

Arm type	Active comparator
Investigational medicinal product name	Naproxen
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Capsule
Routes of administration	Oral use

Dosage and administration details:

500 mg orally, given twice daily (BID)

Arm title	Fasimumab 1 mg SC Q8W
------------------	-----------------------

Arm description:	
Fasinumab 1 mg SC Q8W and naproxen-matching placebo, PO, BID	
Arm type	Experimental
Investigational medicinal product name	fasinumab
Investigational medicinal product code	REGN475
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use
Dosage and administration details:	
1 mg administered by subcutaneous injection every 8 weeks (Q8W)	
Arm title	Fasinumab 1 mg SC Q4W
Arm description:	
Fasinumab 1 mg SC Q4W and naproxen-matching placebo, PO, BID	
Arm type	Experimental
Investigational medicinal product name	fasinumab
Investigational medicinal product code	REGN475
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use
Dosage and administration details:	
1 mg administered by subcutaneous injection every 4 weeks (Q4W)	
Arm title	Fasinumab 3mg Q4W
Arm description:	
Fasinumab 3 mg SC Q4W and naproxen-matching placebo, PO, BID	
Arm type	Experimental
Investigational medicinal product name	fasinumab
Investigational medicinal product code	REGN475
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use
Dosage and administration details:	
3 mg administered by subcutaneous injection every 4 weeks (Q4W)	
Arm title	Fasinumab 6mg Q8W
Arm description:	
Fasinumab 6 mg SC Q8W and naproxen-matching placebo, PO, BID	
Arm type	Experimental
Investigational medicinal product name	fasinumab
Investigational medicinal product code	REGN475
Other name	
Pharmaceutical forms	Solution for injection in pre-filled syringe
Routes of administration	Subcutaneous use
Dosage and administration details:	
6 mg administered by subcutaneous injection every 8 weeks (Q8W)	

Number of subjects in period 1	Placebo	Naproxen	Fasimumab 1 mg SC Q8W

Primary: Change in the WOMAC Pain Subscale Scores from Baseline to Week 16 in Participants Treated with Fasinumab 1mg SC Q4W Compared with that of Participants Treated with Placebo

End point title	Change in the WOMAC Pain Subscale Scores from Baseline to Week 16 in Participants Treated with Fasinumab 1mg SC Q4W Compared with that of Participants Treated with Placebo ^[1]
-----------------	--

End point description:

The WOMAC index is comprised of 24 parameters grouped in 3 subscales (pain-5 questions, physical function -17 questions and stiffness - 2 questions), with 0-10 grading of each question. The scores for each subscale are summed up, divided by number of questions, and each subscale is reported using Numerical Rating Scale score of 0-10. In addition to subscales, a total score is provided as the sum of normalized subscale scores divided by three, and reported using a Numerical Rating Scale score of 0-10. Higher scores indicate worse pain, stiffness and functional limitations.

End point type	Primary
----------------	---------

End point timeframe:

Baseline to Week 16

Notes:

[1] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Endpoint applies to Placebo and Fasinumab 1 mg SC Q4W arms only.

Notes:

[8] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoint applies to Placebo and Fasinumab 1 mg SC Q4W arms only.

End point values	Placebo	Fasinumab 1 mg SC Q4W		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	214	639		
Units: Percentage of participants				
number (not applicable)	43.9	56.2		

Statistical analyses

No statistical analyses for this end point

Secondary: Percentage of Participants Treated with Fasinumab 1mg Q4W, Compared with that of Participants Treated with Naproxen, Who Had A Response At Week 16, with Response Defined As An Improvement By $\geq 30\%$ In The WOMAC Pain Subscale Scores

End point title	Percentage of Participants Treated with Fasinumab 1mg Q4W, Compared with that of Participants Treated with Naproxen, Who Had A Response At Week 16, with Response Defined As An Improvement By $\geq 30\%$ In The WOMAC Pain Subscale Scores ^[9]
-----------------	---

End point description:

The WOMAC index is comprised of 24 parameters grouped in 3 subscales (pain-5 questions, physical function -17 questions and stiffness - 2 questions), with 0-10 grading of each question. The scores for each subscale are summed up, divided by number of questions, and each subscale is reported using Numerical Rating Scale score of 0-10. In addition to subscales, a total score is provided as the sum of normalized subscale scores divided by three, and reported using a Numerical Rating Scale score of 0-10. Higher scores indicate worse pain, stiffness and functional limitations.

End point type	Secondary

Secondary: Change in WOMAC Physical Function Subscale Scores from Baseline to the Average Score Across Weeks 36, 40 and 44 in Participants Treated with Fasinumab 1mg Q8W Compared with that of Participants Treated with Placebo

End point title	Change in WOMAC Physical Function Subscale Scores from Baseline to the Average Score Across Weeks 36, 40 and 44 in Participants Treated with Fasinumab 1mg Q8W Compared with that of Participants Treated with Placebo ^[27]
-----------------	--

End point description:

The WOMAC index is comprised of 24 parameters grouped in 3 subscales (pain-5 questions, physical function -17 questions and stiffness - 2 questions), with 0-10 grading of each question. The scores for each subscale are summed up, divided by number of questions, and each subscale is reported using Numerical Rating Scale score of 0-10. In addition to subscales, a total score is provided as the sum of normalized subscale scores divided by three, and reported using a Numerical Rating Scale score of 0-10. Higher scores indicate worse pain, stiffness and functional limitations.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline to average score across weeks 36, 40 and 44

Notes:

[27] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Endpoint applies to Placebo and Fasinumab 1 mg SC Q8W arms only.

End point values	Placebo	Fasinumab 1 mg SC Q8W		
Subject group type	Reporting group	Reporting group		
Number of subjects analysed	69	210		
Units: Score on a scale

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 September 2017	Amendment 1: Incorporated health authority (HA) feedback, ensured consistency across the program, made minor corrections and provided clarifications.
07 October 2017	Amendment 1VHP: Incorporated HA feedback.
20 October 2017	Amendment 2VHP: Incorporated health authority (HA) feedback, ensured consistency across the program, made minor corrections and provided clarifications.
27 April 2018	Amendment 3 (obsolete): Updated exclusion criteria for participant safety, made updates to ensure consistency across the program, make minor corrections and provided clarifications. (Amendment not implemented)
24 May 2018	Amendment 4: Incorporated urgent safety measure, which required discontinuing the 3 mg every 4 weeks (Q4W) and 6 mg every 8 weeks (Q8W) dose regimens.
11 July 2018	Amendment 5: Updated exclusion criteria to improve participants safety and to include an additional fasinumab dose group of 1 mg every 8 weeks (Q8W). Additional changes made to ensure consistency across the program, made minor corrections and provided clarification.
05 March 2019	Amendment 6: Updated so that first and second 52-week periods noted as Year 1 and Year 2 respectively and made minor corrections.
23 April 2020	Amendment 7: Added statement to address impact of COVID-19; updated to note that Year 2 enrollment to be stopped; updated timeframe for secondary efficacy endpoints to week 44 from week 52; and added secondary and exploratory endpoints and associated objectives and analyses.
01 July 2020	Amendment 8: Modification made to the primary and secondary efficacy analysis set.
26 August 2020	Amendment 9: Updated to reflect permanently discontinued all participants in the Year 2 Treatment Period from study drug and to complete the End of Treatment study visit for impacted participants.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

None reported
