

## Clinical trial results:

### A Phase 2b, Multicentre, Multinational, Double-blind, Dose-finding Study, incorporating an open label substudy, in Adult Patients with Type I, III or IV Osteogenesis Imperfecta Treated with setrusumab (BPS804)

#### Summary

EudraCT number	2016-005096-27
Trial protocol	DK GB FR
Global end of trial date	12 November 2020

#### Results information

Result version number	v1 (current)
This version publication date	01 March 2022
First version publication date	01 March 2022

#### Trial information

##### Trial identification

Sponsor protocol code	MBPS205
-----------------------	---------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03118570
WHO universal trial number (UTN)	-
Other trial identifiers	IND Number: 113385

Notes:

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

---

**Results analysis stage**

---

Analysis stage	Final
Date of interim/final analysis	12 November 2020
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	12 November 2020
Was the trial ended prematurely?	No

Notes:

---

**General information about the trial**

---

Main objective of the trial:

To demonstrate that setrusumab increases radial trabecular volumetric bone mineral density (Tr. vBMD) on high resolution peripheral quantitative computed tomography (HRpQCT) and bone strength on finite element analysis (FEA) in patients with OI Type I, III or IV

Protection of trial subjects:

The investigator or his/her representative explained the nature of the study to the participant or his/her legally authorised representative and answered all questions regarding the study. Participants was informed that their participation was voluntary. Participants or their legally authorised representative were required to sign a statement of informed consent that meets the requirements of 21 CFR 50, local regulations, ICH guidelines, Health Insurance Portability and Accountability Act (HIPAA) requirements, where applicable, and the IRB/IEC or study centre.

Background therapy:

For the duration of the study participants receive a daily dose of 500 mg calcium and/or 800 I.U. vitamin D as background treatment.

Following the end of setrusumab therapy all participants had the option to receive a dose of zoledronic acid at 12 and 18 months, prescribed at the discretion of the treating physician and in line with local guidelines.

Evidence for comparator: -

Actual start date of recruitment	11 September 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

---

**Population of trial subjects**

---

**Subjects enrolled per country**

Country: Number of subjects enrolled	United Kingdom: 17
Country: Number of subjects enrolled	Denmark: 9
Country: Number of subjects enrolled	France: 17
Country: Number of subjects enrolled	United States: 61
Country: Number of subjects enrolled	Canada: 8
Worldwide total number of subjects	112
EEA total number of subjects	26

Notes:

<b>Subjects enrolled per age group</b>	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	105
From 65 to 84 years	7
85 years and over	0

## Subject disposition

### Recruitment

Recruitment details:

Participants were randomized 1:1:1:1 to 3 doses of setrusumab (20 mg/kg, 8 mg/kg and 2 mg/kg) and placebo for a 12-month Treatment Period.

### Pre-assignment

Screening details:

Per Protocol Amendment 4, participants originally randomized to the placebo group were reassigned to receive 20 mg/kg open-label setrusumab (1 discontinued study prior to the transition). Two participants in the setrusumab 20 mg/kg open-label group were randomized into this group after Amendment 4 and did not receive placebo.

### Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator

Blinding implementation details:

With the exception of the open-label treatment arm, investigators and participants remained blinded to each participant's assigned study treatment throughout the course of the study.

### Arms

Are arms mutually exclusive?	No
------------------------------	----

<b>Arm title</b>	Setrusumab 20 mg/kg (Blinded)
------------------	-------------------------------

Arm description:

Setrusumab 20 mg/kg intravenous (IV) infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.

Arm type	Experimental
Investigational medicinal product name	setrusumab
Investigational medicinal product code	BPS804
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

60-minute infusion

Investigational medicinal product name	zoledronic acid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

15-minute infusion

(Following the end of setrusumab therapy all participants had the option to receive a dose of zoledronic acid at 12 and 18 months, prescribed at the discretion of the treating physician and in line with local guidelines.)

<b>Arm title</b>	Setrusumab 8 mg/kg (Blinded)
------------------	------------------------------

Arm description:

Setrusumab 8 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.

Arm type	Experimental
----------	--------------

Investigational medicinal product name	setrusumab
Investigational medicinal product code	BPS804
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

60-minute infusion

Investigational medicinal product name	zoledronic acid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

15-minute infusion

(Following the end of setrusumab therapy all participants had the option to receive a dose of zoledronic acid at 12 and 18 months, prescribed at the discretion of the treating physician and in line with local guidelines.)

<b>Arm title</b>	Setrusumab 2 mg/kg (Blinded)
------------------	------------------------------

Arm description:

Setrusumab 2 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.

Arm type	Experimental
Investigational medicinal product name	setrusumab
Investigational medicinal product code	BPS804
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

60-minute infusion

Investigational medicinal product name	zoledronic acid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

15-minute infusion

(Following the end of setrusumab therapy all participants had the option to receive a dose of zoledronic acid at 12 and 18 months, prescribed at the discretion of the treating physician and in line with local guidelines.)

<b>Arm title</b>	Setrusumab 20 mg/kg (Open-Label)
------------------	----------------------------------

Arm description:

Setrusumab 20 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Participants were randomized to this group after amendment 4.

Arm type	Experimental
Investigational medicinal product name	setrusumab
Investigational medicinal product code	BPS804
Other name	
Pharmaceutical forms	Powder for solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

60-minute infusion

Investigational medicinal product name	zoledronic acid
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

15-minute infusion

(Following the end of setrusumab therapy all participants had the option to receive a dose of zoledronic acid at 12 and 18 months, prescribed at the discretion of the treating physician and in line with local guidelines.)

<b>Arm title</b>	Placebo
------------------	---------

Arm description:

Placebo IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Due to a protocol amendment, placebo was actually received for an average of 5 months. Participants originally randomized to the placebo group were reassigned to receive 20 mg/kg open-label setrusumab after amendment 4.

Arm type	Experimental
Investigational medicinal product name	placebo
Investigational medicinal product code	
Other name	
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

60-minute infusion

<b>Number of subjects in period 1</b>	Setrusumab 20 mg/kg (Blinded)	Setrusumab 8 mg/kg (Blinded)	Setrusumab 2 mg/kg (Blinded)

## Baseline characteristics

### Reporting groups<sup>[1]</sup>

Reporting group title	Setrusumab 20 mg/kg (Blinded)
Reporting group description: Setrusumab 20 mg/kg intravenous (IV) infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 8 mg/kg (Blinded)
Reporting group description: Setrusumab 8 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 2 mg/kg (Blinded)
Reporting group description: Setrusumab 2 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 20 mg/kg (Open-Label)
Reporting group description: Setrusumab 20 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Participants were randomized to this group after amendment 4.	
Reporting group title	Placebo
Reporting group description: Placebo IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Due to a protocol amendment, placebo was actually received for an average of 5 months. Participants originally randomized to the placebo group were reassigned to receive 20 mg/kg open-label setrusumab after amendment 4.	

Notes:

[1] - The number of subjects reported to be in the baseline period is not equal to the worldwide number of subjects enrolled in the trial. It is expected that these numbers will be the same.

Justification: The 19 participants who transitioned from the Placebo arm to the Setrusumab 20 mg/kg Open-Label arm are "double-counted" for this analysis. (The total column represents the baseline values only for the n=112 enrolled participants.)

Reporting group values	Setrusumab 20 mg/kg (Blinded)	Setrusumab 8 mg/kg (Blinded)	Setrusumab 2 mg/kg (Blinded)
Number of subjects	31	29	30

## End points

### End points reporting groups

Reporting group title	Setrusumab 20 mg/kg (Blinded)
Reporting group description: Setrusumab 20 mg/kg intravenous (IV) infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 8 mg/kg (Blinded)
Reporting group description: Setrusumab 8 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 2 mg/kg (Blinded)
Reporting group description: Setrusumab 2 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules.	
Reporting group title	Setrusumab 20 mg/kg (Open-Label)
Reporting group description: Setrusumab 20 mg/kg IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Participants were randomized to this group after amendment 4.	
Reporting group title	Placebo
Reporting group description: Placebo IV infusion once a month for 12 months plus 500 mg calcium oral tablets and 800 IU vitamin D capsules. Due to a protocol amendment, placebo was actually received for an average of 5 months. Participants originally randomized to the placebo group were reassigned to receive 20 mg/kg open-label setrusumab after amendment 4.	

### Primary: Change From Baseline in Radial Trabecular Volumetric Bone Mineral Density (Tr vBMD) at Month 12

End point title	Change From Baseline in Radial Trabecular Volumetric Bone Mineral Density (Tr vBMD) at Month 12 <sup>[1]</sup> [2]
End point description: Assessed by high resolution peripheral quantitative computed tomography (HRpQCT). HRpQCT scans were performed on the participant's distal non-dominant arm. In cases of an arm that had been supported with rods or had significant deformity, the dominant limb was selected. Data presents the ratio of the means between the visit and Baseline from analysis of covariance (ANCOVA).  Full Analysis Set: all participants who are randomized to one of the blinded treatment arms and took at least 1 dose of study treatment (per protocol almost all efficacy endpoints were to be analyzed only in the blinded treatment arms). Participants with an assessment at given time point.	
End point type	Primary
End point timeframe: Full Analysis Set: all participants who are randomized to one of the blinded treatment arms and took at least 1 dose of study treatment. Participants with an assessment at given time point.	

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Statistical analyses are attached in a word document due to system limitations.

[2] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period. Justification: Per protocol almost all efficacy endpoints were to be analyzed only in the blinded treatment arms.

## Secondary: Change From Baseline in Lean and Fat Body Mass From Whole Body at Months 6 and 12

End point title	Change From Baseline in Lean and Fat Body Mass From Whole Body at Months 6 and 12 <sup>[21]</sup>
-----------------	---

End point description:

Lean and fat body mass was evaluated using whole body DXA (including the head).

Full Analysis Set: all participants who are randomized to one of the blinded treatment arms and took at least 1 dose of study treatment. n=participants with an assessment at given timepoint.

End point type	Secondary
----------------	-----------

End point timeframe:

Baseline, Months 6, 12 (EOT)

Notes:

[21] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Per protocol almost all efficacy endpoints were to be analyzed only in the blinded treatment arms.

End point title	Change From Baseline in Index (Utility) Score on EuroQol 5-Dimension 5-Level Descriptive System (EQ-5D-5L) Score at Months 6 and 12 <sup>[26]</sup>
-----------------	---

End point description:

The EQ-5D-5L is a standardised measure of health status comprised of a descriptive system of 5 health-related quality of life states (i.e., mobility, self-care, usual activities, pain/discomfort, and anxiety/depression) and a Visual Analogue Scale (VAS) of overall health. Each dimension is rated on a 5-point response scale indicating severity of problems, where 1 is "no problems" and 5 is "extreme problems". The 5 questions are scored and together contribute to the EQ-5D index (utility) score between 0 and 1 (1 being perfect health).

Full Analysis Set: all participants who are randomized to one of the blinded treatment arms and took at least 1 dose of study treatment. n=participants with an assessment at given timepoint.

### Secondary: Percentage of Participants With Adverse Events (AEs), Treatment-Emergent AEs (TEAEs), Serious TEAEs, and TEAEs Leading to Discontinuation or Death

End point title	Percentage of Participants With Adverse Events (AEs), Treatment-Emergent AEs (TEAEs), Serious TEAEs, and TEAEs Leading to Discontinuation or Death
-----------------	--

End point description:

An AE is any untoward medical occurrence, which does not necessarily have a causal relationship with treatment. A SAE is defined as any untoward medical occurrence that, at any dose: results in death; is life-threatening; requires inpatient hospitalization or prolongation of existing hospitalization; results in persistent disability/incapacity; is a congenital anomaly/birth defect; is another important medical event. The intensity for each AE was graded as mild, moderate or severe, according to the investigator's judgement. An event was considered related to study drug if there were a "reasonable possibility" of a relationship, according to the investigator's clinical judgment. A TEAE was defined as an event occurring or worsening on or after the first dose of study medication.

Safety Population: all participants who received at least 1 dose of study drug. The 19 participants who transitioned from the Placebo arm to the Setrusumab 20 mg/kg Open-Label arm are reflected in both arms

End point type	Secondary
End point timeframe:	
Non-serious AEs: up to Month 14; Serious AEs: up to Month 24. (Average duration of exposure to placebo was 5 months and for setrusumab was 11 month plus follow-up to 24 months.)
