

## Clinical trial results:

### Open-Label Study to Evaluate the Efficacy and Safety of Ibrexafungerp in Patients with Fungal Diseases that are Refractory to, Resistant to or Intolerant of Standard Antifungal Treatment (FURI)

#### Summary

EudraCT number	2017-000381-29
Trial protocol	DE AT ES GB
Global end of trial date	25 August 2023

#### Results information

Result version number	v1 (current)
This version publication date	01 February 2025
First version publication date	01 February 2025

#### Trial information

##### Trial identification

Sponsor protocol code	SCY-078-301
-----------------------	-------------

##### Additional study identifiers

ISRCTN number	-
ClinicalTrials.gov id (NCT number)	NCT03059992
WHO universal trial number (UTN)	-

Notes:

#### Sponsors

Sponsor organisation name	SCYNEXIS, Inc.
Sponsor organisation address	1 Evertrust Plaza, 13th floor, Jersey City, United States, NJ 07302
Public contact	David Angulo, MD, SCYNEXIS, Inc., 001 2018845485, David.angulo@scynexis.com
Scientific contact	David Angulo, MD, SCYNEXIS, Inc., 001 2018845485, David.angulo@scynexis.com

Notes:

#### Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

## Results analysis stage

Analysis stage	Final
Date of interim/final analysis	24 July 2024
Is this the analysis of the primary completion data?	Yes
Primary completion date	17 August 2023
Global end of trial reached?	Yes
Global end of trial date	25 August 2023
Was the trial ended prematurely?	No

Notes:

## General information about the trial

Main objective of the trial:

- To evaluate the efficacy of ibrexafungerp in the treatment of severe fungal diseases by a Data Review Committee (DRC) at the primary timepoint for the fungal disease
- To evaluate safety of ibrexafungerp

Protection of trial subjects:

The study will be conducted in accordance with the protocol, the ethical principles established by the Declaration of Helsinki (as amended in Fortaleza, Brazil, October 2013), the International Conference on Harmonisation (ICH) Good Clinical Practice (GCP) Guidelines, the United States Code of Federal Regulations (CFR) sections that address clinical research studies, applicable European Union regulations and/or other national and local ethical and legal requirements, as applicable.

Background therapy: -

Evidence for comparator:

not applicable

Actual start date of recruitment	19 October 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

## Population of trial subjects

### Subjects enrolled per country

Country: Number of subjects enrolled	Netherlands: 4
Country: Number of subjects enrolled	Spain: 10
Country: Number of subjects enrolled	United Kingdom: 9
Country: Number of subjects enrolled	Austria: 9
Country: Number of subjects enrolled	Germany: 43
Country: Number of subjects enrolled	United States: 124
Country: Number of subjects enrolled	Pakistan: 11
Country: Number of subjects enrolled	South Africa: 18
Country: Number of subjects enrolled	Canada: 5
Worldwide total number of subjects	233
EEA total number of subjects	66

Notes:

### Subjects enrolled per age group

In utero	0
----------	---

Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	166
From 65 to 84 years	65
85 years and over	2

## Subject disposition

### Recruitment

Recruitment details:

Screening/recruitment was active from October 19, 2017 to December 16, 2022. Subjects were screened at hospitals and medical clinics at 46 sites globally.

### Pre-assignment

Screening details:

Subjects had to meet a set of criteria in order to enroll in the study; including being 18 years of age or older and being diagnosed with an eligible fungal disease.

### Period 1

Period 1 title	Overall Trial (overall period)
Is this the baseline period?	Yes
Allocation method	Non-randomised - controlled
Blinding used	Not blinded

Blinding implementation details:

NA

### Arms

Arm title	Ibrexafungerp (SCY-078)
-----------	-------------------------

Arm description:

Ibrexafungerp (SCY-078), orally administered QD for up to 180 days.

Arm type	Experimental
Investigational medicinal product name	Ibrexafungerp
Investigational medicinal product code	
Other name	SCY-078
Pharmaceutical forms	Tablet
Routes of administration	Oral use

Dosage and administration details:

For non-Vulvovaginal candidiasis cases: 750 mg BID on Day 1, Day2; 750 mg QD for the remainder of treatment

Vulvovaginal candidiasis cases: 750 mg QD on Day1, Day 3, Day 5

Number of subjects in period 1	Ibrexafungerp (SCY-078)
Started	233
Completed	177
Not completed	56
Disease Relapse	2
Consent withdrawn by subject	11
Lost to follow up	4
Adverse Event	10
Physician Decision	10
Death	11

Other	5
Progressive Disease	3

## Baseline characteristics

### Reporting groups

Reporting group title	Overall Trial
Reporting group description:	
Ibrexafungerp (SCY-078), orally administered QD for up to 180 days (ITT population)	

Reporting group values	Overall Trial	Total	
Number of subjects	233	233	
Age categorical			
Ibrexafungerp (SCY-078), orally administered QD for up to 180 days (ITT population)			
Units: Subjects			
In utero	0	0	
Preterm newborn infants (gestational age < 37 wks)	0	0	
Newborns (0-27 days)	0	0	
Infants and toddlers (28 days-23 months)	0	0	
Children (2-11 years)	0	0	
Adolescents (12-17 years)	0	0	
Adults (18-64 years)	166	166	
From 65-84 years	65	65	
85 years and over	2	2	
Gender categorical			
Units: Subjects			
Female	128	128	
Male	105	105	
Disease Category			
Units: Subjects			
Invasive Candidiasis including Candidemia	104	104	
Mucocutaneous Candidiasis	75	75	
Dimorphic Fungi	3	3	
Aspergillus Syndromes	40	40	
Other emerging fungi	11	11	

## End points

### End points reporting groups

Reporting group title	Ibrexafungerp (SCY-078)
Reporting group description: Ibrexafungerp (SCY-078), orally administered QD for up to 180 days.	

### Primary: Percentage of participants who achieve a Global Response as determined by the Data Review Committee (DRC) by Fungal Disease.

End point title	Percentage of participants who achieve a Global Response as determined by the Data Review Committee (DRC) by Fungal Disease. <sup>[1]</sup>
-----------------	---

#### End point description:

The percentage of participants who achieve Global Response (defined as complete or partial response) as determined by the DRC at disease specific timepoints by fungal disease. Global Response is measured by participant survival and overall effect of treatment on the disease. Complete response: Survival, all attributable signs/symptoms (including radiological) resolved and mycological eradication of disease; Partial response: Survival, improvement of attributable signs/symptoms (including radiological).

Disease specific timepoints: End of Treatment (EoT) for invasive candidiasis, EoT or Day 84 for Chronic Mucocutaneous Candidiasis, Test of Cure (TOC) for Vulvovaginal Candidiasis, EoT or Day 90 for Chronic Pulmonary Aspergillosis, EoT or Day 90 Allergic Bronchopulmonary Aspergillosis and EoT for all other diseases.

End point type	Primary
----------------	---------

#### End point timeframe:

Vulvovaginal Candidiasis: Day 17. Chronic Mucocutaneous Candidiasis: EOT up to Day 84. Chronic Pulmonary Aspergillus and Allergic Bronchopulmonary Aspergillosis: EOT up to Day 90. All other diseases: EOT up to Day 180. All Days measured from Baseline.

#### Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: The number and percentage of subjects with Successful Global Response as determined by the DRC will be presented for each disease, disease category, enrollment category, and pathogen along with a 95% confidence interval (CI) for a single binomial proportion in the ITT and PP populations. The Clopper Pearson method will be used for the confidence interval. CI is not estimated when the subjects in a particular group is less than 5.

## Secondary: Percentage of Participants With a Recurrence of Baseline Fungal Disease

End point title	Percentage of Participants With a Recurrence of Baseline Fungal Disease
-----------------	---

End point description:

The percentage of participants with a recurrence of their baseline fungal disease as assessed by the DRC at the 25-Day Follow Up (FU) for Vulvovaginal Candidiasis and at the 6-Week FU for all other diseases as assessed by the DRC. Recurrence is defined as having Global Response at end of treatment or test of cure, but re-emergence of the baseline fungal disease during the post treatment follow-up. Re-emergence is required to be with the same species and involving the same site identified at baseline.

End point type	Secondary
----------------	-----------

## Adverse events

### Adverse events information

Timeframe for reporting adverse events:

All AEs will be collected and evaluated from the time the informed consent is signed throughout the duration of the study and up to the last observation in the study.

Adverse event reporting additional description:

An AE is any untoward medical occurrence associated with the use of a drug in humans, whether or not considered drug related. An AE can therefore be any unfavorable and unintended sign (including an abnormal laboratory finding), symptom or disease temporally associated with the use of a study drug/study intervention, whether or not related to the s

## More information

### Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
13 August 2019	<p>Revised study objectives and endpoints to account for all eligible diseases/therapeutic area.</p> <p>Added disease-specific objectives and endpoints for selected fungal diseases.</p> <p>Added the following fungal diseases as eligible for inclusion in the study (as well as eligibility criteria):</p> <ul style="list-style-type: none"><li>• vulvovaginal candidiasis (VVC)</li><li>• disseminated/invasive dimorphic fungi (coccidioidomycosis, histoplasmosis, blastomycosis)</li><li>• chronic pulmonary aspergillosis (CPA)</li><li>• allergic bronchopulmonary aspergillosis (ABPA)</li><li>• invasive pulmonary aspergillosis (IPA)</li><li>• other emerging fungi including yeasts and molds (e.g., saccharomycetes, scopulariopsis)</li></ul> <p>Clarify that subjects will be excluded if they have an invasive fungal disease with central nervous system involvement, unless it is planned to receive combination therapy with ibrexafungerp and another antifungal.</p> <p>Removed exclusion criteria for subjects with invasive fungal diseases of the bone and/or joint.</p> <p>Removed exclusion criteria based on absolute neutrophil count and QTcF interval.</p> <p>Added "legally authorized representative" as potential person giving consent.</p> <p>Developed two separate schedules: one for WC and a separate one for all other fungal diseases.</p> <p>Increased sample size to a total of 200 subjects.</p> <p>Updated to a total study duration of approximately 222 days for each subject (based on the prolongation of treatment to up to 180 days).</p> <p>Included table of efficacy timepoints and outcome definitions for primary and secondary endpoints for each fungal disease.</p>

Notes:

### Interruptions (globally)

Were there any global interruptions to the trial? No

### Limitations and caveats

None reported
