

Clinical trial results:

Double-blind, randomised clinical study comparing efficacy and safety of Clindamycin/Benzoyl Peroxide Gel (10 mg/g + 30 mg/g) (Test) vs. DUAC 10 mg/g + 30 mg/g Gel (Reference) vs. Vehicle in patients with papulopustular acne

Summary

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	21 October 2021
Is this the analysis of the primary completion data?	Yes
Primary completion date	01 March 2021
Global end of trial reached?	Yes
Global end of trial date	01 March 2021
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

Evaluation of the efficacy and safety of a new gel containing 10 mg/g Clindamycin and 30 mg/g Benzoyl peroxide vs. DUAC 10 mg/g + 30 mg/g Gel (Reference) vs. vehicle in patients with papulopustular acne

Protection of trial subjects:

In the current clinical trial patients below the age of 18 have been included. In such a case, an age-appropriate written subject information sheet was handed over to adolescent patients and an appropriate information session was to be performed by the investigator. The legal guardian(s) received a comparable document and an information session for adults. Before the start of screening and randomisation for the current clinical trial, the legal guardian(s) had to sign the informed consent form(s) and the adolescent patient the informed assent form. In case any of the parties (legal guardian(s) or adolescent patient) refused their consent, a participation of the adolescent patient in the trial was not possible.

Background therapy:

There was no background therapy.

Evidence for comparator:

The comparator contains the same ingredients in the same concentration as the test product and has a marketing license for the study indication.

Actual start date of recruitment	03 April 2019
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	No

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	Czechia: 676
Worldwide total number of subjects	676
EEA total number of subjects	676

Notes:

Subjects enrolled per age group

In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0

Children (2-11 years)	0
Adolescents (12-17 years)	378
Adults (18-64 years)	298
From 65 to 84 years	0
85 years and over	0

Subject disposition

Recruitment

Recruitment details:

16 study centers in Czechia; first patient first visit: 25 April 2019; last patient last visit: 01 March 2021

Pre-assignment

Screening details:

Main criteria for inclusion: Women, men and adolescents of ≥ 12 years of age; Diagnosis of "papulopustular acne" according to generally accepted criteria; On the face, ≥ 25 non-inflammatory lesions and ≥ 20 inflammatory lesions, thereof ≤ 2 nodular lesions; Investigator's Global Assessment (IGA) of acne severity grade 2, 3 or 4

Period 1

Period 1 title	Treatment Period (overall period)
Is this the baseline period?	Yes
Allocation method	Randomised - controlled
Blinding used	Double blind
Roles blinded	Subject, Investigator, Monitor, Data analyst

Blinding implementation details:

The tubes containing the study medications were neutral white. The attached labels were identical for all three preparations. All three study medications were indistinguishable with respect to visual or odorous characteristics. The random code was transferred to the data base not before the following actions were completed: data base closure, finalisation of the statistical analysis plan, a Blind Data Review and a subsequent Blind Data Report.

Arms

Are arms mutually exclusive?	Yes
Arm title	ClinBPO 30

Arm description:

Test product

Arm type	Experimental
Investigational medicinal product name	Clindamycin/Benzoyl Peroxide Gel (10 mg/g + 30 mg/g)
Investigational medicinal product code	D10AF51
Other name	
Pharmaceutical forms	Gel
Routes of administration	Cutaneous use

Dosage and administration details:

A thin layer of gel should be applied to the affected area once a day. The treatment area was defined as the acne affected areas on the face whereas face was considered as the area bounded by ears, hairline and lower margin of the mandibles. Contact with the mouth, eyes, lips, other mucous membranes or areas of irritated or broken skin should be avoided.

Arm title	Duac (10 mg/g + 30 mg/g)
------------------	--------------------------

Arm description:

Reference Product

Arm type	Active comparator
Investigational medicinal product name	Duac (10 mg/g + 30 mg/g)
Investigational medicinal product code	D10AF51
Other name	
Pharmaceutical forms	Gel
Routes of administration	Cutaneous use

Dosage and administration details:

A thin layer of gel should be applied to the affected area once a day. The treatment area was defined as the acne affected areas on the face whereas face was considered as the area bounded by ears, hairline and lower margin of the mandibles. Contact with the mouth, eyes, lips, other mucous membranes or

areas of irritated or broken skin should be avoided.

Arm title	Vehicle
Arm description: -	
Arm type	Placebo
Investigational medicinal product name	Placebo
Investigational medicinal product code	D10AF51
Other name	
Pharmaceutical forms	Gel
Routes of administration	Cutaneous use

Dosage and administration details:

A thin layer of gel should be applied to the affected area once a day. The treatment area was defined as the acne affected areas on the face whereas face was considered as the area bounded by ears, hairline and lower margin of the mandibles. Contact with the mouth, eyes, lips, other mucous membranes or areas of irritated or broken skin should be avoided.

Gastrointestinal viral infection subjects affected / exposed occurrences (all)	0 / 223 (0.00%) 0	0 / 224 (0.00%) 0	1 / 228 (0.44%) 1

Genital herpes			
subjects affected / exposed	0 / 223 (0.00%)	1 / 224 (0.45%)	0 / 228 (0.00%)
occurrences (all)	0	2	0
Hordeolum			
subjects affected / exposed	0 / 223 (0.00%)	0 / 224 (0.00%)	1 / 228 (0.44%)
occurrences (all)	0	0	1
Impetigo			
subjects affected / exposed	0 / 223 (0.00%)	1 / 224 (0.45%)	0 / 228 (0.00%)
occurrences (all)	0	1	0
Nasopharyngitis			
subjects affected / exposed	4 / 223 (1.79%)	3 / 224 (1.34%)	1 / 228 (0.44%)
occurrences (all)	4	3	1
Oral herpes			
subjects affected / exposed	2 / 223 (0.90%)	1 / 224 (0.45%)	1 / 228 (0.44%)
occurrences (all)	3	1	1
Pharyngitis			
subjects affected / exposed	1 / 223 (0.45%)	1 / 224 (0.45%)	1 / 228 (0.44%)
occurrences (all)	1	1	1
Pulpitis dental			
subjects affected / exposed	0 / 223 (0.00%)	0 / 224 (0.00%)	1 / 228 (0.44%)
occurrences (all)	0	0	1
Rhinitis			
subjects affected / exposed	2 / 223 (0.90%)	1 / 224 (0.45%)	2 / 228 (0.88%)
occurrences (all)	2	1	2
Upper respiratory tract infection			
subjects affected / exposed	3 / 223 (1.35%)	5 / 224 (2.23%)	6 / 228 (2.63%)
occurrences (all)	5	5	7
Urinary tract infection			
subjects affected / exposed	0 / 223 (0.00%)	2 / 224 (0.89%)	0 / 228 (0.00%)
occurrences (all)	0	2	0
Viral infection			
subjects affected / exposed	2 / 223 (0.90%)	1 / 224 (0.45%)	1 / 228 (0.44%)
occurrences (all)	3	1	1

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? No

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

None reported

Notes:
