Notes:

Paediatric regulatory details

Is trial part of an agreed paediatric investigation plan (PIP)	No
Does article 45 of REGULATION (EC) No 1901/2006 apply to this trial?	No
Does article 46 of REGULATION (EC) No 1901/2006 apply to this trial?	No

Notes:

Results analysis stage

Analysis stage	Final
Date of interim/final analysis	15 June 2022
Is this the analysis of the primary completion data?	No
Global end of trial reached?	Yes
Global end of trial date	15 June 2022
Was the trial ended prematurely?	No

Notes:

General information about the trial

Main objective of the trial:

The main objectives of this trial were to assess the safety and tolerability of balstilimab (AGEN2034), determine the maximum tolerated dose of balstilimab in participants with metastatic or locally advanced solid tumours (Phase 1 safety cohort), and to assess the best overall response (BOR) according to Response Evaluation Criteria in Solid Tumors version 1.1 (RECIST 1.1) in participants with recurrent, unresectable, or metastatic cervical cancer that had progressed after a platinum doublet administered for treatment of advanced disease (Phase 2 efficacy expansion cohort).

Protection of trial subjects:

This study was conducted in accordance with International Council for Harmonisation of Technical Requirements for Pharmaceuticals for Human Use (ICH) Good Clinical Practice, and the principles of the Declaration of Helsinki, in addition to following the laws and regulations of the country or countries in which a study is conducted.

Background therapy: -

Evidence for comparator: -

Actual start date of recruitment	27 April 2017
Long term follow-up planned	No
Independent data monitoring committee (IDMC) involvement?	Yes

Notes:

Population of trial subjects

Subjects enrolled per country

Country: Number of subjects enrolled	United States: 65
Country: Number of subjects enrolled	Brazil: 21
Country: Number of subjects enrolled	Chile: 19
Country: Number of subjects enrolled	Australia: 4
Country: Number of subjects enrolled	Poland: 4
Country: Number of subjects enrolled	Spain: 13
Country: Number of subjects enrolled	Belgium: 1
Country: Number of subjects enrolled	Estonia: 3
Country: Number of subjects enrolled	France: 81
Worldwide total number of subjects	211
EEA total number of subjects	102

Notes:

Subjects enrolled per age group	
In utero	0
Preterm newborn - gestational age < 37 wk	0
Newborns (0-27 days)	0
Infants and toddlers (28 days-23 months)	0
Children (2-11 years)	0
Adolescents (12-17 years)	0
Adults (18-64 years)	154
From 65 to 84 years	57
85 years and over	0

Subject disposition

Recruitment

Recruitment details: -

Pre-assignment

Screening details:

For Phase 1 results, at the time of data cut off, 2 participants who completed 24 months of treatment were ongoing in follow up. Phase 1 subject disposition will be updated as soon as data becomes available.

Period 1

Period 1 title	Overall Study (overall period)
Is this the baseline period?	Yes
Allocation method	Not applicable
Blinding used	Not blinded

Arms

Are arms mutually exclusive?	Yes
Arm title	Phase 1: Dose 1

Arm description:

Participants received 1 milligram/kilogram every 2 weeks balstilimab for up to 24 months.

Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.

Arm title	Phase 1: Dose 2
------------------	-----------------

Arm description:

Participants received 3 milligrams/kilogram every 2 weeks balstilimab for up to 24 months.

Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.

Arm title	Phase 1: Dose 3
------------------	-----------------

Arm description:

Participants received 6 milligrams/kilogram every 3 weeks balstilimab for up to 24 months.

Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use

Dosage and administration details:

Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.

Arm title	Phase 1: Dose 4
Arm description: Participants received 10 milligrams/kilogram every 2 weeks balstilimab for up to 24 months.	
Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details: Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.	
Arm title	Phase 1: Dose 5
Arm description: Participants received 10 milligrams/kilogram every 3 weeks balstilimab for up to 24 months.	
Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details: Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.	
Arm title	Phase 2: Recommended Phase 2 Dose
Arm description: Participants received 3 milligrams/kilogram every 2 weeks balstilimab for a maximum of 24 months or until progression, unacceptable toxicity, stopping the study drug, or withdrawal from the study.	
Arm type	Experimental
Investigational medicinal product name	Balstilimab
Investigational medicinal product code	
Other name	AGEN2034, Anti-PD-1
Pharmaceutical forms	Solution for infusion
Routes of administration	Intravenous use
Dosage and administration details: Balstilimab infusions were administered within 60 minutes (-10/+20 minutes) using an infusion pump.

Reporting group title	Phase 1: Dose 5
Reporting group description: Participants received 10 milligrams/kilogram every 3 weeks balstilimab for up to 24 months.	
Reporting group title	Phase 2: Recommended Phase 2 Dose
Reporting group description: Participants received 3 milligrams/kilogram every 2 weeks balstilimab for a maximum of 24 months or until progression, unacceptable toxicity, stopping the study drug, or withdrawal from the study.	
Subject analysis set title	Phase 1: All
Subject analysis set type	Full analysis
Subject analysis set description: All participants that received balstilimab for up to 24 months during Phase 1.	
Subject analysis set title	Intent-to-treat Efficacy Analysis Set (ITT EAS)
Subject analysis set type	Intention-to-treat
Subject analysis set description: All participants who received ≥ 1 dose of study treatment, with measurable disease at baseline (per Independent Endpoint Review Committee [IERC]).	
Subject analysis set title	Dose-limiting Toxicity (DLT) Analysis Set
Subject analysis set type	Sub-group analysis
Subject analysis set description: All participants who were enrolled for DLT evaluation (excluding participants enrolled to backfill cohorts) and either received all study treatment administrations or stopped treatment due to a DLT during the DLT evaluation period.	
Subject analysis set title	Receptor Occupancy Analysis Set
Subject analysis set type	Sub-group analysis
Subject analysis set description: All participants who completed ≥ 1 infusion of study drug, with adequate measurements of programmed cell death protein-1 (PD-1) receptor occupancy on circulating T cells.	
Subject analysis set title	Safety Analysis Set
Subject analysis set type	Safety analysis
Subject analysis set description: All participants who received ≥ 1 dose of study treatment.	
Subject analysis set title	Pharmacokinetic (PK) Analysis Set
Subject analysis set type	Sub-group analysis
Subject analysis set description: All participants who completed ≥ 1 infusion of study drug and who had sufficient evaluable drug concentration measurements prior to and after treatment.	

Primary: Phase 1: Number of Participants Experiencing DLTs for Balstilimab

End point title	Phase 1: Number of Participants Experiencing DLTs for Balstilimab ^[1]
-----------------	--

End point description:

A DLT was defined as any treatment-related toxicity that was National Cancer Institute Common Terminology Criteria for Adverse Event Grade ≥ 3 , confirmed by the safety monitoring committee to be relevant for the study drug treatment, and that occurred during the first 3 weeks of balstilimab treatment in the dose escalation portion of the study (DLT evaluation period).

End point type	Primary
----------------	---------

End point timeframe:

21 Days

Notes:

[1] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only the number of participants is reported for this end point.

End point values	Dose-limiting Toxicity (DLT) Analysis Set			
Subject group type	Subject analysis set			
Number of subjects analysed	18			
Units: Participants	0			

Statistical analyses

No statistical analyses for this end point

Primary: Phase 1: Number of Participants Experiencing Treatment-emergent Adverse Events (TEAEs)

End point title	Phase 1: Number of Participants Experiencing Treatment-emergent Adverse Events (TEAEs) ^[2]
-----------------	---

End point description:

An adverse event (AE) was any untoward medical occurrence in a participant or clinical investigation participant administered a pharmaceutical product, which did not necessarily have a causal relationship with the treatment. TEAEs were AEs with onset dates during the on-treatment period, or the worsening of an event during the on-treatment period.

End point type	Primary
----------------	---------

End point timeframe:

From the time of the first dose to the end of follow-up (up to 2 years after the last dose)

Notes:

[2] - No statistical analyses have been specified for this primary end point. It is expected there is at least one statistical analysis for each primary end point.

Justification: Only the number of participants is reported for this end point.

End point values	Phase 1: All

Pre-dose through 3 months after last dose

Notes:

[30] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the geometric mean and coefficient of variation are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	124 ^[31]			
Units: day*µg/mL				
geometric mean (geometric coefficient of variation)				
Cycle 1 Day 1	174 (± 46.3)			
Cycle 2 Day 1	184 (± 59.7)			

Notes:

[31] - Cycle 1 Day 1 (N=124); Cycle 2 Day 1 (N=28)

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Number of Participants with Serum ADAs for Balstilimab

End point title	Phase 2: Number of Participants with Serum ADAs for Balstilimab ^[32]
-----------------	---

End point description:

Blood samples were collected for serum balstilimab ADA determination.

End point type	Secondary
----------------	-----------

End point timeframe:

Pre-dose through 3 months after last dose

Notes:

[32] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the number of participants is reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	161 ^[33]			
Units: Participant	8			

Notes:

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: ORR

End point title	Phase 2: ORR ^[34]
End point description: ORR was defined as proportion of participants with a BOR of CR or PR, as determined by an IERC per RECIST 1.1.	
End point type	Secondary
End point timeframe: Up to 4 years	

Notes:

[34] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only percentage and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	160 ^[35]			
Units: Percentage of participants				
number (confidence interval 95%)	14.4 (9.8 to 20.6)			

Notes:

[35] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Duration of Response (DOR)

End point title	Phase 2: Duration of Response (DOR) ^[36]
End point description: DOR was defined as time from first observation of response to first observation of documented disease progression (or death within 12 weeks after last tumour assessment), per RECIST 1.1 and as determined by an IERC and the investigator. Participants without an event at analysis cutoff date were censored on date of last tumour assessment. Percentile (25th) is reported with 95% confidence interval.	
End point type	Secondary
End point timeframe: Up to 4 years	

Notes:

[36] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the 25th percentile and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	160 ^[37]			
Units: Month				
number (confidence interval 95%)	6.9 (2.8 to 11.0)			

Notes:

[37] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Disease Control Rate (DCR)

End point title	Phase 2: Disease Control Rate (DCR) ^[38]
-----------------	---

End point description:

DCR was defined as the proportion of participants with CR, PR, or stable disease (SD) for at least 12 weeks.

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 4 years

Notes:

[38] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only percentage and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	160 ^[39]			
Units: Percentage of participants				
number (confidence interval 95%)	50.6 (43.0 to 58.3)			

Notes:

[39] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Tumour Control Rate (TCR)

End point title	Phase 2: Tumour Control Rate (TCR) ^[40]
-----------------	--

End point description:

TCR was defined as proportion of participants who had a BOR of either SD or a confirmed objective response (CR or PR).

End point type	Secondary
----------------	-----------

End point timeframe:

Up to 2 years

Notes:

[40] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only percentage and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	160 ^[41]			
Units: Percentage of participants				
number (confidence interval 95%)	52.5 (44.8 to 60.1)			

Notes:

[41] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Time to Response (TTR)

End point title	Phase 2: Time to Response (TTR) ^[42]
End point description: TTR was defined as the time from the first dose date to first observation of confirmed response.	
End point type	Secondary
End point timeframe: Up to 4 years	

Notes:

[42] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the mean and standard deviation are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	25 ^[43]			
Units: Day				
arithmetic mean (standard deviation)	84.4 (± 58.03)			

Notes:

[43] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Progression-free Survival (PFS)

End point title	Phase 2: Progression-free Survival (PFS) ^[44]
End point description: PFS was defined as time from first treatment administration to first observation of documented disease progression (or death within 12 weeks after last tumour assessment), per RECIST 1.1, as determined by an IERC and investigator. Participants without an event at analysis cutoff date were censored on date of last tumour assessment.	
End point type	Secondary
End point timeframe: Up to 4 years	

Notes:

[44] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the median and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	160 ^[45]			
Units: Month				
median (confidence interval 95%)	2.8 (2.4 to 3.9)			

Notes:

[45] - ITT EAS

Statistical analyses

No statistical analyses for this end point

Secondary: Phase 2: Overall Survival (OS)

End point title	Phase 2: Overall Survival (OS) ^[46]
End point description:	
OS was defined as time from start of treatment to death. For participants who were still alive at the time of data cutoff for trial analysis or who were lost to follow-up, survival was censored at the last recorded date that the participant was known to have been alive as of the cutoff date for analysis.	
End point type	Secondary
End point timeframe:	
Up to 4 years	

Notes:

[46] - The end point is not reporting statistics for all the arms in the baseline period. It is expected all the baseline period arms will be reported on when providing values for an end point on the baseline period.

Justification: Only the median and confidence interval are reported for the participants in Phase 2.

End point values	Phase 2: Recommended Phase 2 Dose			
Subject group type	Reporting group			
Number of subjects analysed	161 ^[47]			
Units: Month				
median (confidence interval 95%)	11.2 (9.6 to 14.6)			

Notes:

Reporting groups

Reporting group title	Phase 1: Dose 1
-----------------------	-----------------

Reporting group description:

Participants received 1 milligram/kilogram every 2 weeks balstilimab for up to 24 months.

Reporting group title	Phase 1: Dose 2
-----------------------	-----------------

Reporting group description:

Participants received 3 milligrams/kilogram every 2 weeks balstilimab for up to 24 months.

Reporting group title	Phase 1: Dose 3
-----------------------	-----------------

Reporting group description:

Participants received 6 milligrams/kilogram every 3 weeks balstilimab for up to 24 months.

Reporting group title	Phase 1: Dose 4
-----------------------	-----------------

Reporting group description:

Participants received 10 milligrams/kilogram every 2 weeks balstilimab for up to 24 months.

Reporting group title	Phase 1: Dose 5
-----------------------	-----------------

Reporting group description:

Participants received 10 milligrams/kilogram every 3 weeks balstilimab for up to 24 months.

Reporting group title	Phase 2: Recommended Phase 2 Dose
-----------------------	-----------------------------------

Reporting group description:

Participants received 3 milligrams/kilogram every 2 weeks balstilimab for a maximum of 24 months or until progression, unacceptable toxicity, stopping the study drug, or withdrawal from the study.

Notes:

[1] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed to this adverse event. These numbers are expected to be equal.

Justification: This serious adverse event only affected female participants.

[2] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed to this adverse event. These numbers are expected to be equal.

Justification: This serious adverse event only affected female participants.

[3] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed to this adverse event. These numbers are expected to be equal.

Justification: This serious adverse event only affected female participants.

Frequency threshold for reporting non-serious adverse events: 5 %

Notes:

[4] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: This non-serious adverse event only affected female participants.

[5] - The number of subjects exposed to this adverse event is less than the total number of subjects exposed for the reporting group. These numbers are expected to be equal.

Justification: This non-serious adverse event only affected female participants.

More information

Substantial protocol amendments (globally)

Were there any global substantial amendments to the protocol? Yes

Date	Amendment
26 September 2017	<ul style="list-style-type: none">- Addition of an expansion cohort in which approximately 40 participants with American Joint Committee on Cancer Stage IV cutaneous squamous cell carcinoma (cSCC) not curable by radiation therapy were to be enrolled.- Addition of an IDMC to monitor the cervical cancer and cSCC expansion cohorts.- Addition of a futility analysis (at >50% information fraction) to expansion cohorts in response to the request from Institutional Review Boards for futility analysis for cervical cancer cohort.- Removed assessment of immune-related RECIST as secondary endpoint. Assessment of tumour response was according to RECIST 1.1.- Removed continuation of treatment after a relapse following CR.- Requirement that participants enrolled in Phase 2 need to provide archival tumour tissue sample.- Added allowance for treatment beyond disease progression.- Added criteria for treatment delay and criteria to resume treatment.- Added specification for palliative radiation therapy as permitted for a single lesion provided it is not to a target lesion and treatment was not administered for tumour control.
24 January 2019	<ul style="list-style-type: none">- Removed the Phase 2 expansion cohort for cSCC. This cohort was removed based on a company strategic decision to focus on the indication of cervical cancer based on the experience in the escalation phase data to date. No participants with cSCC were enrolled.- Reorganized and refined the study objectives and endpoints for Phase 1 versus Phase 2, to (1) be consistent with terminology and definitions for endpoints (for example best overall response versus objective response rate) based on Food and Drug Administration (FDA) guidelines, (2) clearly identify the objectives for Phase 1 versus Phase 2 of the study, and (3) clearly show which endpoints are associated with each objective.- Removed the futility analysis for efficacy endpoints in Phase 2 expansion cohorts. This change was made because the Phase 2 portion of the study was to include a full interim analysis by an IDMC to assess all available data and make a recommendation to the Sponsor, instead of having just a predefined study stop cut-off.- Added expanded electrocardiogram evaluation in Phase 2. This change was made in alignment with PK timepoints to enable an assessment of the effects of study drug on cardiac conduction.- Changed Study Title from "Expansion to Select Solid Tumors" to "Expansion to Cervical Cancer".- Changed dose delay interval that resulted in treatment withdraw from more than 10 weeks to more than 6 weeks.- Changed timing of initial tumour imaging from within 18 days before first dose to within 21 days.- Added tumour PD-L1 expression was to be assessed using an FDA-approved test.
27 September 2019	<ul style="list-style-type: none">- Phase 2 population increase, and post-interim analysis enrollment language clarified.- Statistical calculation changes based on population increase.- Clinical progression criteria defined to accommodate absence of radiologic progression on basis of RECIST 1.1.

Notes:

Interruptions (globally)

Were there any global interruptions to the trial? No

Limitations and caveats

Limitations of the trial such as small numbers of subjects analysed or technical problems leading to unreliable data.

Comprehensive Phase 1 data for subject disposition and non-serious adverse events are currently unavailable. Both will be updated accordingly as soon as the data become available.

Notes:
